

## A

### Accuracy assessment

Determining Irrigated Areas and Quantifying Blue Water Use in Europe Using Remote Sensing Meteosat Second Generation (MSG) products and Global Land Data Assimilation System (GLDAS) Data. Mireia Romaguera, Maarten S. Krol, Mhd. Suhyb Salama, Arjen Y. Hoekstra, and Zhongbo Su. August: 861–873

A New Method for Segmenting Individual Trees from the Lidar Point Cloud. Wenkai Li, Qinghua Guo, Marek K. Jakubowski, and Maggi Kelly. January: 75–84

### Accuracy assessment — Bio-optical model

A Semi-Analytical Model for the Multitemporal Prediction of Chlorophyll-a in an Iowa Lake Using Hyperion Data. Ramanathan Sugumaran and Justin Thomas. December: 1253–1260

### Accuracy assessment — Building damage classification

Spatial Resolution Imagery Requirements for Identifying Structure Damage in a Hurricane Disaster: A Cognitive Approach. Sarah E. Battersby, Michael E. Hodgson, and Jiayu Wang. June: 625–635

### Accuracy assessment — Burned area products

Accuracy Assessment of Burned Area Products in the Orinoco Basin. Jesús A. Anaya and Emilio Chuvieco. January: 53–60

### Accuracy assessment — Geometric

Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model Improvement. Rupert Müller, Thomas Krauß, Mathias Schneider, and Peter Reinartz. January: 61–74

### Accuracy assessment — Geopositioning

Geopositioning Accuracy Assessment of GeoEye-1 Panchromatic and Multispectral Imagery. Manuel A. Aguilar, Fernando J. Aguilar, María del Mar Saldaña, and Ismael Fernández. March: 247–257

### Accuracy assessment — Horizontal

Mapping Matters. Qassim A. Abdullah. April: 296–297

### Accuracy assessment — Image classification

Application of Time Series Landsat Images to Examining Land-use/Land-cover Dynamic Change. Dengsheng Lu, Scott Hetrick, Emilio Moran, and Guiying Li. July: 747–755

A Framework for Supervised Image Classification with Incomplete Training Samples. June: 595–604

Neuro-fuzzy Classification of Submarine Lava Flow Morphology. J. Timothy McClinton, Scott M. White, and John M. Sinton. June: 605–616

### Accuracy assessment — Imagery resolution

Spatial Resolution Imagery Requirements for Identifying Structure Damage in a Hurricane Disaster: A Cognitive Approach. Sarah E. Battersby, Michael E. Hodgson, and Jiayu Wang. June: 625–635

### Accuracy assessment — Irrigated area maps

Determining Irrigated Areas and Quantifying Blue Water Use in Europe Using Remote Sensing Meteosat Second Generation (MSG) products and Global Land Data Assimilation System (GLDAS) Data. August: 861–873

Development of an Advanced Global Field Survey System (GFSS) for Terrestrial Monitoring and Mapping with a Demonstration for Agricultural Cropland Mapping in Asia. An Ngoc Van, Kyaw Sann Oo, and Wataru Takeuchi. August: 875–884

### Accuracy assessment — Lidar

Calibration and Kinematic Analysis of the Velodyne HDL-64E S2 Lidar Sensor. Craig Glennie. April: 339–347

A New Method for Segmenting Individual Trees from the Lidar Point Cloud. January: 75–84

### Accuracy assessment — Mapping

Incorporating the Downscaled Landsat TM Thermal Band in Land-cover Classification using Random Forest. V.F. Rodríguez-Galiano, B. Ghimire, E. Pardo-Igúzquiza, M. Chica-Olmo, and R.G. Congalton. February: 129–137

A Shape-matching Cropping Index (CI) Mapping Method to Determine Agricultural Cropland Intensities in China using MODIS Time-series Data. Jianhong Liu, Wenquan Zhu, and Xuefeng Cui. August: 829–837

Urban Tree Cover Mapping with Relief-

corrected Aerial Imagery and Lidar. May: 473–484

### Accuracy assessment — Measurement

Development and Assessment of a Digital Stereo Photogrammetric System to Measure Cetaceans at Sea. Abraham Growcott, Pascal Sirguy, and Stephen M. Dawson. March: 237–246

### Accuracy assessment — 2001 NLCD percent tree canopy map

Modeling Percent Tree Canopy Cover: A Pilot Study. John W. Coulston, Gretchen G. Moisen, Barry T. Wilson, Mark V. Finco, Warren B. Cohen, and C. Kenneth Brewer. July: 715–727

### Accuracy assessment — OBO approach

A Framework for Supervised Image Classification with Incomplete Training Samples. Qinghua Guo, Wenkai Li, Desheng Liu, and Jin Chen. June: 595–604

### Accuracy assessment — Pixel-based

Generation of a U.S. National Urban Land-Use Product. James A. Falcone and Colin G. Homer. October: 1057–1068

### Accuracy assessment — Tree crown delineation

A Fusion Approach for Tree Crown Delineation from Lidar Data. Colin J. Gleason and Jungho Im. July: 679–692

### Accuracy assessment — Vertical

A Comparison of SRTM V4 and ASTER GDEM for Hydrological Applications in Low Relief Terrain. Mariano Moreno-de las Heras, Patricia M. Saco, and Garry R. Willgoose. July: 757–766

### Accuracy assessment--Wetlands delineation

An Efficient Remote Sensing Solution to Update the NCWI. Beth R. Stein, Baojuan Zheng, Ioannis Kokkinidis, Nilam Kayastha, Taylor Seigler, Kemal Gök-kaya, Ranjith Gopalakrishnan, Won Hoi Hwang. June: 537–547

### Adaptive control of LODS

An Efficient Point Cloud Management Method Based on a 3D R-Tree. Jun Gong, Qing Zhu, Ruofei Zhong, Yeting Zhang, and Xiao Xie. April: 373–381

### Adaptive neuro-fuzzy inference system (ANFIS)

Neuro-fuzzy Classification of Submarine Lava Flow Morphology. J. Timothy Mc-

# Subject Index

Clinton, Scott M. White, and John M. Sinton. June: 605–616

## **Aerial dispersants**

Operational Utilization of Aerial Multispectral Remote Sensing during Oil Spill Response: Lessons Learned During the Deepwater Horizon (MC-252) Spill. Jan Svejkský, William Lehr, Judd Muskat, George Graettinger, and Joseph Mullin. October: 1089–1102

## **Aerial image mosaicking**

Aerial Image Mosaicking with the Aid of Vector Roads. Dongliang Wang, Youchuan Wan, Jianhua Xiao, Xudong Lai, Wenli Huang, and Jingzhong Xu. November: 1141–1150

## **Aerial imagery**

Building Detection in Complex Scenes Thorough Effective Separation of Buildings from Trees. Mohammad Awrangjeb, Chunsun Zhang, and Clive S. Fraser. July: 729–745

Bundle Block Adjustment of Weakly Connected Aerial Imagery. Yongjun Zhang, Xiaodong Xiong, Xiang Shen, and Zheng Ji. September: 983–988

A Framework for Supervised Image Classification with Incomplete Training Samples. Qinghua Guo, Wenkai Li, Desheng Liu, and Jin Chen. June: 595–604

Urban Tree Cover Mapping with Relief-corrected Aerial Imagery and Lidar. May: 473–484

## **Aerial images**

An Efficient Remote Sensing Solution to Update the NCWI. Beth R. Stein, Baojuan Zheng, Ioannis Kokkinidis, Nilam Kayastha, Taylor Seigler, Kemal Gök-kaya, Ranjith Gopalakrishnan, Won Hoi Hwang. June: 537–547

Semi-automatic Quality Control of Topographic Data Sets. Petra Helmholz, Christian Becker, Uwe Breitkopf, Torsten Büschenfeld, Andreas Busch, Carola Braun, Dietmar Grünreich, Sönke Müller, Jörn Ostermann, Martin Pahl, Franz Rottensteiner, Karsten Vogt, Marcel Ziems, Christian Heipke. September: 959–972

## **Aerial multispectral remote sensing**

Expanding the Utility of Remote Sensing Data for Oil Spill Response. Jan Svejkský and Mark Hess. October: 1011–1014

Operational Utilization of Aerial Multispectral Remote Sensing during Oil Spill Response: Lessons Learned During the Deepwater Horizon (MC-252) Spill. Jan Svejkský, William Lehr, Judd Muskat, George Graettinger, and Joseph Mullin. October: 1089–1102

## **Aerial photographs**

Detect Residential Buildings from Lidar and Aerial Photographs through Object-Oriented Land-Use Classification. Xuelian Meng, Nate Currit, Le Wang, and Xiaojun Yang. January: 35–44

## **Aerial triangulation**

Bundle Block Adjustment of Weakly Connected Aerial Imagery. Yongjun Zhang, Xiaodong Xiong, Xiang Shen, and Zheng Ji. September: 983–988

Mapping Matters. Qassim A. Abdullah. August: 784, December: 1211

## **Affine transformation**

Automatic Registration of High-Resolution Images Using Local Properties of Features. You Kyung Han, Young Gi Byun, Jae Wan Choi, Dong Yeob Han, and Yong Il Kim. March: 211–221

## **African Cultural Heritage Sites and Landscapes Database**

Laser Scanning in Heritage Documentation: The Scanning Pipeline and its Challenges. Heinz Rüther, Roshan Bhurtha, Christoph Held, Ralph Schröder, and Stephen Wessels. April: 309–316

## **Agricultural land cover mapping**

Mapping Crop Types, Irrigated Areas, and Cropping Intensities in Heterogeneous Landscapes of Southern India Using Multi-Temporal Medium-Resolution Imagery: Implications for Assessing Water Use in Agriculture. Elizabeth Heller, Jeanine M. Rhemtulla, Sharachandra Lele, Margaret Kalacska, Shrinivas Badiger, Raja Sengupta, and Navin Raman-kutty. August: 815–827

## **Agricultural productivity**

Assessing Future Risks to Agricultural Productivity, Water Resources and Food Security: How Can Remote Sensing Help? Prasad S. Thenkabail, Jerry W. Knox, Mutlu Ozdogan, Murali Krishna Gumma, Russell G. Congalton, Zhuoting Wu, Cristina Milesi, Alex Finkral, Mike Marshall, Isabella Mariotto, Songcai

You, Chandra Giri, and Pamela Nagler. August: 773–782

## **Agricultural systems**

Mapping Fragmented Agricultural Systems in the Sudano-Sahelian Environments of Africa Using Random Forest and Ensemble Metrics of Coarse Resolution MODIS Imagery. Elodie Vintrou, Mamy Soumaré, Simon Bernard, Agnès Bégué, Christian Baron, and Danny Lo Seen. August: 839–848

## **Agriculture**

Development of an Advanced Global Field Survey System (GFSS) for Terrestrial Monitoring and Mapping with a Demonstration for Agricultural Cropland Mapping in Asia. An Ngoc Van, Kyaw Sann Oo, and Wataru Takeuchi. August: 875–884

Estimating Irrigated Agricultural Water Use through Landsat TM and a Simplified Surface Energy Balance Modeling in the Semi-arid Environments of Arizona. Shai Kaplan and Soe W. Myint. August: 849–859

## **Agropasture**

Application of Time Series Landsat Images to Examining Land-use/Land-cover Dynamic Change. Dengsheng Lu, Scott Hetrick, Emilio Moran, and Guiying Li. July: 747–755

## **Airborne camera**

Mapping Matters. Qassim A. Abdullah. November: 1117

## **Airborne GPS (ABGPS)**

Mapping Matters. Qassim A. Abdullah. December: 1211

## **Airborne hyperspectral scanner**

Estimating Urban Leaf Area Index (LAI) of Individual Trees with Hyperspectral Data. Ryan R. Jensen, Perry J. Hardin, and Andrew J. Hardin. May: 495–504

## **Airborne lidar data**

Automated Georegistration of High-Resolution Satellite Imagery using a RPC Model with Airborne Lidar Information. Jaehong Oh, Changno Lee, Yangdam Eo, and James Bethel. October: 1045–1056

Mapping Individual Tree Species in an Urban Forest Using Airborne Lidar Data and Hyperspectral Imagery. Caiyun Zhang and Fang Qiu. October: 1079–1087

## **Airborne SAR mapping system**

CASMSAR: An Integrated Airborne SAR Mapping System. Jixian Zhang, Zheng Zhao, Guoman Huang and Zhong Lu. November: 1110–1114

## **Airborne visible/infrared imaging spectrometer (AVIRIS)**

A Comparison of Multispectral ASTER and Hyperspectral AVIRIS Multiple End-member Spectral Mixture Analysis for Sagebrush and Herbaceous Cover in Yellowstone. Stacey Fairweather, Christopher Potter, Robert Crabtree, and Shuang Li. January: 23–33

## **Albania**

Grids & Datums Column: Republic of Albania. Clifford J. Mugnier. January: 5–6

## **ALGE model**

Integrating Landsat-7 Imagery with Physics-based Models for Quantitative Mapping of Coastal Waters near River Discharges. Nima Pahlevan, Alfred J. Garrett, Aaron D. Gerace, and John R. Schott. November: 1163–1174

## **“All-in-one” (AIO) classification**

A Framework for Supervised Image Classification with Incomplete Training Samples. Qinghua Guo, Wenkai Li, Desheng Liu, and Jin Chen. June: 595–604

## **American Society for Photogrammetry and Remote Sensing. See ASPRS**

## **Ant Colony System (ACS)**

Determination of Optimum Classifier and Feature Subset in Hyperspectral Images based on Ant Colony System. Farhad Samadzadegan, Hadiseh Hasani, and Toni Schenk. December: 1261–1273

## **Appalachian mountains**

Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235

## **ArcGIS software**

An Era of Epochs. Karen Richardson. September: 905–908

## **ArcMap® GIS**

Modeling Riparian Zones Utilizing DEMs and Flood Height Data. Sinan A. Abood, Ann L. Maclean, and Lacey A. Mason. March: 259–269

## **Arizona**

Estimating Irrigated Agricultural Water Use through Landsat TM and a Simplified Surface Energy Balance Modeling in the Semi-arid Environments of Arizona. Shai Kaplan and Soe W. Myint. August: 849–859

## **Artificial neural networks**

Estimating Urban Leaf Area Index (LAI) of Individual Trees with Hyperspectral Data. Ryan R. Jensen, Perry J. Hardin, and Andrew J. Hardin. May: 495–504

## **ASD field spectroradiometry**

An Empirical Model-based Method for Signal Restoration of SWIR in ASD Field Spectroradiometry. Chinsu Lin, Khongor Tsogt, and Chein-I Chang. February: 119–127

## **Asia**

Development of an Advanced Global Field Survey System (GFSS) for Terrestrial Monitoring and Mapping with a Demonstration for Agricultural Cropland Mapping in Asia. An Ngoc Van, Kyaw Sann Oo, and Wataru Takeuchi. August: 875–884

## **ASPRS**

ASPRS Board of Directors. January: 18, February: 114, March: 205, April: 304, May: 458, June: 578, July: 674, August: 792, September: 922, November: 1124

ASPRS Board of Directors 2012–2013. June: 555

ASPRS Recertification requirements. September: 918

ASPRS Student Advisory Council (SAC). January: 13

ASPRS Vice Presidential Candidates for 2013. December: 1214

ASPRS Yearbook 2012. June: 557–565

CGMP Guidelines Committee’s Guidelines for Procurement of Commercial Geospatial Mapping Products. December: 1199–1207

Christopher Parrish Elected as Assistant Division Director of ASPRS Lidar Division (LD). April: 300

Code of Ethics. August: 895, September: 972

2011–2012 Executive Director Report. June: 562–565

2012 GeoLeague Challenge Winners. June: 537, June: 538, June: 551

James Stuart Blundell Elected as Assistant Division Director of ASPRS Remote

Sensing Applications Division (RSAD). April: 300

LAS 1.4 specification approval. January: 13  
The MAPPS/ASPRS 2012 Specialty Conference on Emerging Mapping and Geospatial Technologies. July: 669, August: 896–898

Matthew Dunbar Elected as Assistant Division Director of ASPRS Geographic Information Systems Division (GISD). April: 299

Member Champions 2011. January: 11, February: 110, March: 204, April: 298, May: 454, June: 552, July: 668

Member Champions 2012. March: 204, April: 298, May: 454, June: 552, July: 668, August: 788, September: 916, October: 1021, November: 1120

Michael Zolttek Elected as Assistant Division Director of ASPRS Professional Practice Division (PPD). April: 300  
2009–2012 National Report. Roberta Lenczowski. July: 656–660

Report on XXII ISPRS Congress. Bobbi Lenczowski. November: 1121–1122

Resolution on U.S. Imaging Program. March: 197

Robert Thomas Elected as Assistant Division Director of ASPRS Photogrammetric Applications Division (PAD). April: 299–300

Stewart Walker Elected as ASPRS Vice President. April: 299

## **ASPRS – Awards**

Abraham Anson Memorial Scholarship. June: 572

ASPRS Announces 2012 ASPRS Outstanding Technical Achievement Award (OTAA) Winner. February: 111

ASPRS Announces 2012 SAIC Estes Memorial Teaching Award Winner. March: 198

ASPRS Conference Management Awards. June: 575

ASPRS Fellow Award. June: 574

2012 ASPRS Fellow Award Winners. March: 199

ASPRS Outstanding Service Award. June: 573

2012 ASPRS Outstanding Technical Achievement Award. June: 570

ASPRS Outstanding Workshop Instructor Award. June: 574

ASPRS Region Newsletter of the Year. June: 576

ASPRS Region of the Year Award. June: 575

# Subject Index

Awards [2012]. June: 570–576  
BAE Systems Award. June: 574–575  
Boeing Award for Best Paper in Image Analysis and Interpretation. June: 571  
ERDAS Award for Best Scientific Paper in Remote Sensing. June: 571  
ESRI Award for Best Scientific Paper in GIS. June: 571  
Francis H. Moffitt Memorial Scholarship. June: 575  
The GeoEye Foundation Award. June: 572  
International Educational Literature Award. June: 573  
John I. Davidson President's Award for Practical Papers. June: 571  
John O. Behrens Institute for Land Information (ILI) Memorial Scholarship. June: 572  
Kenneth J. Osborn Memorial Scholarship. June: 572–573  
Paul R. Wolf Memorial Scholarship. June: 574  
Photogrammetric (Fairchild) Award. June: 570  
Region Website of the Year. June: 576  
Robert E. Altenhofen Memorial Scholarship. June: 571–572  
Robert N. Colwell Memorial Fellowship. June: 570–571  
SAIC Estes Memorial Teaching Award. June: 574  
Talbert Abrams Award. June: 571  
Ta Liang Memorial Award. June: 573  
William A. Fischer Memorial Scholarship. June: 572  
Z/I Imaging Scholarship. June: 573

**ASPRS—Sustaining members.** See **Corporate description**

## **ASTER (Advanced Spaceborne Thermal Emission and Reflection Radiometer)**

Book review: Land Remote Sensing and Global Environmental Change: NASA's Earth Observing System and the Science of ASTER and MODIS by Ramachandran, Bhaskar, Justice, Christopher O., and Abrams, Michael J. Reviewed by Nguy-Robertson, Anthony L. January: 8, January: 11  
A Comparison of Multispectral ASTER and Hyperspectral AVIRIS Multiple End-member Spectral Mixture Analysis for Sagebrush and Herbaceous Cover in Yellowstone. Stacey Fairweather, Christopher Potter, Robert Crabtree, and Shuang Li. January: 23–33  
A Comparison of SRTM V4 and ASTER

GDEM for Hydrological Applications in Low Relief Terrain. Mariano Moreno-de las Heras, Patricia M. Saco, and Garry R. Willgoose. July: 757–766  
Improving Forest Growth Estimates Using a Bayesian Network Approach. Yaseen T. Mustafa, Alfred Stein, Valentyn A. Tolpekin, and Patrick E. Van Laake. January: 45–51

## **Atmospheric corrections**

Topographic Corrections of Satellite Data for Regional Monitoring. Sarah C. Goslee. September: 973–981

## **Australis software**

Development and Assessment of a Digital Stereo Photogrammetric System to Measure Cetaceans at Sea. Abraham Growcott, Pascal Sirguey, and Stephen M. Dawson. March: 237–246

# B

## **Backscatter texture analysis**

Neuro-fuzzy Classification of Submarine Lava Flow Morphology. J. Timothy McClinton, Scott M. White, and John M. Sinton. June: 605–616

## **Band tuning methods**

Comparing the Performance of Empirical, Semi-empirical, and Curve Fitting Models in Predicting Cyanobacterial Pigments. A.L. Nguy-Robertson, L. Li, L. Tedesco, J. Wilson, and E. Soyeux. May: 485–494

## **Bayesian network (BN) approach**

Improving Forest Growth Estimates Using a Bayesian Network Approach. Yaseen T. Mustafa, Alfred Stein, Valentyn A. Tolpekin, and Patrick E. Van Laake. January: 45–51

## **Bees Algorithm (BA)**

Determination of Optimum Classifier and Feature Subset in Hyperspectral Images based on Ant Colony System. Farhad Samadzadegan, Hadiseh Hasani, and Toni Schenk. December: 1261–1273

## **Besançon City**

GeoEye Imagery and Lidar Technology for Small-area Population Estimation: An Epidemiological Viewpoint. Erika Upegui and Jean-François Viel. July: 693–702

## **Beta regression modeling technique**

Modeling Percent Tree Canopy Cover: A Pilot Study. John W. Coulston, Gretchen G. Moisen, Barry T. Wilson, Mark V. Finco, Warren B. Cohen, and C. Kenneth Brewer. July: 715–727

## **Biographies.** See also **Obituaries**

Memorial Address: Francis H. “Frank” Moffitt 1922–2007. Kathleen Moffitt Vinci. June: 566–569

## **Biomass burning emissions**

Accuracy Assessment of Burned Area Products in the Orinoco Basin. Jesús A. Anaya and Emilio Chuvieco. January: 53–60

## **Biomass — Woody plant**

Assessment of Available Rangeland Woody Plant Biomass with a Terrestrial Lidar System. Nian-Wei Ku, Sorin C. Popescu, R. James Ansley, Humberto L. Perotto-Baldivieso, and Anthony M. Filippi. April: 349–361

## **Bio-optical model**

A Semi-Analytical Model for the Multitemporal Prediction of Chlorophyll-a in an Iowa Lake Using Hyperion Data. Ramanathan Sugumaran and Justin Thomas. December: 1253–1260

## **Block adjustment**

Mapping Western China at a Scale of 1:50,000. Jixian Zhang, Qin Yan, Wenhan Xie. April: 289–292

## **Blunder detection**

Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model Improvement. Rupert Müller, Thomas Krauß, Mathias Schneider, and Peter Reinartz. January: 61–74

**Building extraction procedure**

GeoEye Imagery and Lidar Technology for Small-area Population Estimation: An Epidemiological Viewpoint. Erika Upegui and Jean-François Viel. July: 693-702

**Buildings**

Automatic Registration of High-Resolution Images Using Local Properties of Features. You Kyung Han, Young Gi Byun, Jae Wan Choi, Dong Yeob Han, and Yong Il Kim. March: 211-221

A Supervised and Fuzzy-based Approach to Determine Optimal Multi-resolution Image Segmentation Parameters. Hengjian Tong, Travis Maxwell, Yun Zhang, and Vivek Dey. October: 1029-1044

**Bundle adjustment – Orthographic**

Network Orientation Using the Scaled Orthographic Projection for Parameter Initialization. Keith F. Blonquist and Robert T. Pack. May: 505-517

**Bundle block adjustment (BBA)**

Bundle Block Adjustment of Weakly Connected Aerial Imagery. Yongjun Zhang, Xiaodong Xiong, Xiang Shen, and Zheng Ji. September: 983-988

**Burned area (BA) products**

Accuracy Assessment of Burned Area Products in the Orinoco Basin. Jesús A.

Anaya and Emilio Chuvieco. January: 53-60

## C

**Calibration models**

Calibration and Kinematic Analysis of the Velodyne HDL-64E S2 Lidar Sensor. Craig Glennie. April: 339-347

**California**

Identification of Waste Tires Using High-Resolution Multispectral Satellite Imagery. Becky Lauren Quinlan and Patricia G. Foschi. May: 463-471

A New Method for Segmenting Individual Trees from the Lidar Point Cloud. Wenkai Li, Qinghua Guo, Marek K. Jakubowski, and Maggi Kelly. January: 75-84

Phenology-based Crop Classification Algorithm and its Implications on Agricultural Water Use Assessments in California's Central Valley. Liheng Zhong, Peng Gong, and Greg S. Biging. August: 799-813

**Camera calibration**

Development and Assessment of a Digital Stereo Photogrammetric System to Measure Cetaceans at Sea. Abraham Growcott, Pascal Sirguy, and Stephen M. Dawson. March: 237-246

A Flexible Mathematical Method for Camera Calibration in Digital Aerial Photogrammetry. Rongfu Tang, Dieter Fritsch, Michael Cramer, and Werner Schneider. October: 1069-1077

A Webcam-based Photogrammetric System for the Measurement of Facial Landmarks on Newborns. Bruce King. December: 1285-1294

**Camera height**

Automatic Generation of 2.5D Terrain Models without Occluding Routes of Interest. Hao Deng, Liqiang Zhang, Jingtao Ma, Liang Zhang, and Dong Chen. November: 1175-1185

**Camera stability**

Photogrammetric Monitoring of the Construction of a Solar Energy Dish Concentrator. M. R. Shortis and G. Burgess. May: 519-527

**Camera station**

Photogrammetric Monitoring of the Construction of a Solar Energy Dish Con-

centrator. M. R. Shortis and G. Burgess. May: 519–527

## Canada

2011 Survey on Remote Sensing and Geospatial Technologies Training in U.S. and Canadian Colleges and Universities. Steven A. Sader and Thomas Mueller. December: 1193–1198

## Canopy cover

Modeling Percent Tree Canopy Cover: A Pilot Study. John W. Coulston, Gretchen G. Moisen, Barry T. Wilson, Mark V. Finco, Warren B. Cohen, and C. Kenneth Brewer. July: 715–727

## Canopy height model (CHM)

Application of Lidar Terrain Surfaces for Soil Moisture Modeling. Florence Margaret Southee, Paul M. Treitz, and Neal A. Scott. December: 1241–1251

Automated Delineation of Individual Tree Crowns from Lidar Data by Multi-Scale Analysis and Segmentation. Linhai Jing, Baoxin Hu, Jili Li, and Thomas Noland. December: 1275–1284

## CASMSAR

CASMSAR: An Integrated Airborne SAR Mapping System. Jixian Zhang, Zheng Zhao, Guoman Huang and Zhong Lu. November: 1110–1114

## Catenary curve model

A Piecewise Catenary Curve Model Growing for 3D Power Line Reconstruction. Yoonseok Jwa and Gunho Sohn. December: 1227–1240

## Cell-based automatic deformation

Cell-based Automatic Deformation Computation by Analyzing Terrestrial Lidar Point Clouds. Jing Wu, Pierre-Yves Gilliéron, and Bertrand Merminod. April: 317–329

## Central African Republic (C. A. R.)

Grids & Datums Column: Central African Republic. Clifford J. Mugnier. March: 192–194

## Central Australia

A Comparison of SRTM V4 and ASTER GDEM for Hydrological Applications in Low Relief Terrain. Mariano Moreno-de las Heras, Patricia M. Saco, and Garry R. Willgoose. July: 757–766

## Central-perspective projection model

Network Orientation Using the Scaled Orthographic Projection for Parameter Initialization. Keith F. Blonquist and Robert T. Pack. May: 505–517

## Cerrado

Application of Time Series Landsat Images to Examining Land-use/Land-cover Dynamic Change. Dengsheng Lu, Scott Hetrick, Emilio Moran, and Guiying Li. July: 747–755

## Certification

ASPRS Certification List. January: 12, February: 110, February: 202, April: 302, July: 670, May: 450, August: 786, September: 920, October: 1022

## Cetaceans

Development and Assessment of a Digital Stereo Photogrammetric System to Measure Cetaceans at Sea. Abraham Growcott, Pascal Sirguy, and Stephen M. Dawson. March: 237–246

## Chaemacyparis formosensis

An Empirical Model-based Method for Signal Restoration of SWIR in ASD Field Spectroradiometry. Chinsu Lin, Khongor Tsogt, and Chein-I Chang. February: 119–127

## Change detection

Application of Time Series Landsat Images to Examining Land-use/Land-cover Dynamic Change. Dengsheng Lu, Scott Hetrick, Emilio Moran, and Guiying Li. July: 747–755

Mapping Nighttime Flood from MODIS Observations Using Support Vector Machines. Rui Zhang, Donglian Sun, Yunyue Yu, and Mitchell D. Goldberg. November: 1151–1161

## China

CASMSAR: An Integrated Airborne SAR Mapping System. Jixian Zhang, Zheng Zhao, Guoman Huang and Zhong Lu. November: 1110–1114

Integration of Remote Sensing and GIS for Evaluating Soil Erosion Risk in Northwestern Zhejiang, China. Jianqin Huang, Dengsheng Lu, Jin Li, Jiasen Wu, Shiquan Chen, Weiming Zhao, Hongli Ge, Xingzhao Huang, and Xiaojie Yan. September: 935–946

Mapping Western China at a Scale of 1:50,000. Jixian Zhang, Qin Yan, Wenhao Xie. April: 289–292

A Shape-matching Cropping Index (CI) Mapping Method to Determine Agricultural Cropland Intensities in China using MODIS Time-series Data. Jianhong Liu, Wenquan Zhu, and Xuefeng Cui. August: 829–837

## Chlorophyll-a (CHL)

Comparing the Performance of Empirical, Semi-empirical, and Curve Fitting Models in Predicting Cyanobacterial Pigments. A.L. Nguy-Robertson, L. Li, L. Tedesco, J. Wilson, and E. Soyeux. May: 485–494

A Semi-Analytical Model for the Multitemporal Prediction of Chlorophyll-a in an Iowa Lake Using Hyperion Data. Ramathan Sugumaran and Justin Thomas. December: 1253–1260

## Circular Hough Transform

Tree Topology Representation from TLS Point Clouds Using Depth-First Search in Voxel Space. Anita Schilling, Anja Schmidt, and Hans-Gerd Maas. April: 383–392

## Circular map accuracy standard (CMAS)

Mapping Matters. Qassim A. Abdullah. August: 784

## Classification accuracy

An Efficient Remote Sensing Solution to Update the NCWI. Beth R. Stein, Baojuan Zheng, Ioannis Kokkinidis, Nilam Kayastha, Taylor Seigler, Kemal Gök-kaya, Ranjith Gopalakrishnan, Won Hoi Hwang. June: 537–547

Computer-aided Classification of the First Frame of Digital Earths-1 (i.e., Landsat-1) Data. Roger M. Hoffer. July: 653–655

Detect Residential Buildings from Lidar and Aerial Photographs through Object-Oriented Land-Use Classification. Xuelian Meng, Nate Currit, Le Wang, and Xiaojun Yang. January: 35–44

Determination of Optimum Classifier and Feature Subset in Hyperspectral Images based on Ant Colony System. Farhad Samadzadegan, Hadiseh Hasani, and Toni Schenk. December: 1261–1273

A Framework for Supervised Image Classification with Incomplete Training Samples. Qinghua Guo, Wenkai Li, Desheng Liu, and Jin Chen. June: 595–604

Integration of Polarimetric Decomposition, Object-Oriented Image Analysis, and Decision Tree Algorithms for Land-Use and Land-Cover Classification using RADARSAT-2 Polarimetric

- SAR Data. Zhixin Qi, Anthony G.O. Yeh, Xia Li, and Zheng Lin. February: 169–181
- Mapping Crop Types, Irrigated Areas, and Cropping Intensities in Heterogeneous Landscapes of Southern India Using Multi-Temporal Medium-Resolution Imagery: Implications for Assessing Water Use in Agriculture. Elizabeth Heller, Jeanine M. Rhemtulla, Sharachchandra Lele, Margaret Kalacska, Shrinivas Badiger, Raja Sengupta, and Navin Ramanakutty. August: 815–827
- Mapping Nighttime Flood from MODIS Observations Using Support Vector Machines. Rui Zhang, Donglian Sun, Yunyue Yu, and Mitchell D. Goldberg. November: 1151–1161
- Neuro-fuzzy Classification of Submarine Lava Flow Morphology. J. Timothy McClinton, Scott M. White, and John M. Sinton. June: 605–616
- Spatial Resolution Imagery Requirements for Identifying Structure Damage in a Hurricane Disaster: A Cognitive Approach. Sarah E. Battersby, Michael E. Hodgson, and Jiayu Wang. June: 625–635
- Classification accuracy. See also Accuracy Assessment**
- Classification accuracy–Habitat map**  
Objects-based Image Analysis for Mapping Natura 2000 Habitats to Improve Forest Management. Ana Hernando, Lara A. Arroyo, Javier Velázquez, Rosario Tejera. September: 991–999
- Classification accuracy — Land-cover**  
Incorporating the Downscaled Landsat TM Thermal Band in Land-cover Classification using Random Forest. V.F. Rodríguez-Galiano, B. Ghimire, E. Pardo-Igúzquiza, M. Chica-Olmo, and R.G. Congalton. February: 129–137
- Seasonal Variation in Land-Cover Classification Accuracy in a Diverse Region. Priyakant Sinha, Lalit Kumar, and Nick Reid. March: 271–280
- Classification accuracy — Object-based**  
Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235
- Classification accuracy — PBC**  
Phenology-based Crop Classification Algorithm and its Implications on Agricultural Water Use Assessments in California’s Central Valley. Liheng Zhong, Peng Gong, and Greg S. Biging. August: 799–813
- Classification accuracy — Pixel-based**  
Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235
- Classification accuracy — Tree cover**  
Urban Tree Cover Mapping with Relief-corrected Aerial Imagery and Lidar. Brad Lehrbass and Jinfei Wang. May: 473–484
- Classification accuracy — Tree crown**  
A Fusion Approach for Tree Crown Delineation from Lidar Data. Colin J. Gleason and Jung Ho Im. July: 679–692
- Classification accuracy — Urban land use**  
Generation of a U.S. National Urban Land-Use Product. James A. Falcone and Colin G. Homer. October: 1057–1068
- Classification error(s)**  
Urban Tree Cover Mapping with Relief-corrected Aerial Imagery and Lidar. Brad Lehrbass and Jinfei Wang. May: 473–484
- Classification map**  
Determining Irrigated Areas and Quantifying Blue Water Use in Europe Using Remote Sensing Meteosat Second Generation (MSG) products and Global Land Data Assimilation System (GLDAS) Data. Mireia Romaguera, Maarten S. Krol, Mhd. Suhyb Salama, Arjen Y. Hoekstra, and Zhongbo Su. August: 861–873
- Classification techniques — Decision tree**  
Detect Residential Buildings from Lidar and Aerial Photographs through Object-Oriented Land-Use Classification. Xuelian Meng, Nate Currit, Le Wang, and Xiaojun Yang. January: 35–44
- Identification of Waste Tires Using High-Resolution Multispectral Satellite Imagery. Becky Lauren Quinlan and Patricia G. Foschi. May: 463–471
- Integration of Polarimetric Decomposition, Object-Oriented Image Analysis, and Decision Tree Algorithms for Land-Use and Land-Cover Classification using RADARSAT-2 Polarimetric SAR Data. Zhixin Qi, Anthony G.O. Yeh, Xia Li, and Zheng Lin. February: 169–181
- Phenology-based Crop Classification Algorithm and its Implications on Agricultural Water Use Assessments in California’s Central Valley. Liheng Zhong, Peng Gong, and Greg S. Biging. August: 799–813
- Three Decades of War and Food Insecurity in Iraq. Glen R. Gibson, James B. Campbell, Randolph H. Wynne. August: 885–895
- Classification techniques — Hierarchical-based**  
Application of Time Series Landsat Images to Examining Land-use/Land-cover Dynamic Change. Dengsheng Lu, Scott Hetrick, Emilio Moran, and Guiying Li. July: 747–755
- GeoEye Imagery and Lidar Technology for Small-area Population Estimation: An Epidemiological Viewpoint. Erika Upegui and Jean-François Viel. July: 693–702
- Mapping Crop Types, Irrigated Areas, and Cropping Intensities in Heterogeneous Landscapes of Southern India Using Multi-Temporal Medium-Resolution Imagery: Implications for Assessing Water Use in Agriculture. Elizabeth Heller, Jeanine M. Rhemtulla, Sharachchandra Lele, Margaret Kalacska, Shrinivas Badiger, Raja Sengupta, and Navin Ramanakutty. August: 815–827
- Classification techniques — Object-based**  
Phenology-based Crop Classification Algorithm and its Implications on Agricultural Water Use Assessments in California’s Central Valley. Liheng Zhong, Peng Gong, and Greg S. Biging. August: 799–813
- Urban Tree Cover Mapping with Relief-corrected Aerial Imagery and Lidar. Brad Lehrbass and Jinfei Wang. May: 473–484
- Classification techniques — Object-oriented**  
Detect Residential Buildings from Lidar and Aerial Photographs through Object-Oriented Land-Use Classification. Xuelian Meng, Nate Currit, Le Wang, and Xiaojun Yang. January: 35–44

# Subject Index

Estimating Irrigated Agricultural Water Use through Landsat TM and a Simplified Surface Energy Balance Modeling in the Semi-arid Environments of Arizona. Shai Kaplan and Soe W. Myint. August: 849–859

## Classification techniques — One-by-one (OBO)

A Framework for Supervised Image Classification with Incomplete Training Samples. Qinghua Guo, Wenkai Li, Desheng Liu, and Jin Chen. June: 595–604

## Classification techniques — Supervised

A Framework for Supervised Image Classification with Incomplete Training Samples. Qinghua Guo, Wenkai Li, Desheng Liu, and Jin Chen. June: 595–604

## Classification techniques — Wishart supervised

Integration of Polarimetric Decomposition, Object-Oriented Image Analysis, and Decision Tree Algorithms for Land-Use and Land-Cover Classification using RADARSAT-2 Polarimetric SAR Data. Zhixin Qi, Anthony G.O. Yeh, Xia Li, and Zheng Lin. February: 169–181

## Close-range photogrammetry

Photogrammetric Monitoring of the Construction of a Solar Energy Dish Concentrator. M. R. Shortis and G. Burgess. May: 519–527

## Clustering

Elevation, Latitude/Longitude Decorrelation Stretch of Multitemporal LST Imagery. George Ch. Miliareisis. February: 151–160

## Coarse resolution imagery

Mapping Fragmented Agricultural Systems in the Sudano-Sahelian Environments of Africa Using Random Forest and Ensemble Metrics of Coarse Resolution MODIS Imagery. Elodie Vintrou, Mamy Soumaré, Simon Bernard, Agnès Bégué, Christian Baron, and Danny Lo Seen. August: 839–848

Spatial Resolution Imagery Requirements for Identifying Structure Damage in a Hurricane Disaster: A Cognitive Approach. Sarah E. Battersby, Michael E. Hodgson, and Jiayu Wang. June: 625–635

## Coastal water mapping

Integrating Landsat-7 Imagery with Physics-based Models for Quantitative Mapping of Coastal Waters near River Discharges. Nima Pahlevan, Alfred J. Garrett, Aaron D. Gerace, and John R. Schott. November: 1163–1174

## Coastal wetlands

An Efficient Remote Sensing Solution to Update the NCWI. Beth R. Stein, Baojuan Zheng, Ioannis Kokkinidis, Nilam Kayastha, Taylor Seigler, Kemal Gök-kaya, Ranjith Gopalakrishnan, Won Hoi Hwang. June: 537–547

## Cognitive studies

Spatial Resolution Imagery Requirements for Identifying Structure Damage in a Hurricane Disaster: A Cognitive Approach. Sarah E. Battersby, Michael E. Hodgson, and Jiayu Wang. June: 625–635

## Coherency matrix

Integration of Polarimetric Decomposition, Object-Oriented Image Analysis, and Decision Tree Algorithms for Land-Use and Land-Cover Classification using RADARSAT-2 Polarimetric SAR Data. Zhixin Qi, Anthony G.O. Yeh, Xia Li, and Zheng Lin. February: 169–181

## Color information

Building Detection in Complex Scenes Through Effective Separation of Buildings from Trees. Mohammad Awrangjeb, Chunsun Zhang, and Clive S. Fraser. July: 729–745

## Color-infrared (CIR) aerial imagery

Urban Tree Cover Mapping with Relief-corrected Aerial Imagery and Lidar. Brad Lehrbass and Jinfei Wang. May: 473–484

## Commission errors (CE)

Accuracy Assessment of Burned Area Products in the Orinoco Basin. Jesús A. Anaya and Emilio Chuvieco. January: 53–60

## Comparative studies

Comparing the Performance of Empirical, Semi-empirical, and Curve Fitting Models in Predicting Cyanobacterial Pigments. A.L. Nguy-Robertson, L. Li, L. Tedesco, J. Wilson, and E. Soyeux. May: 485–494

A Comparison of Multispectral ASTER and Hyperspectral AVIRIS Multiple End-member Spectral Mixture Analysis for Sagebrush and Herbaceous Cover in Yellowstone. Stacey Fairweather, Christopher Potter, Robert Crabtree, and Shuang Li. January: 23–33

A Comparison of SRTM V4 and ASTER GDEM for Hydrological Applications in Low Relief Terrain. Mariano Moreno-de las Heras, Patricia M. Saco, and Garry R. Willgoose. July: 757–766

Determining Irrigated Areas and Quantifying Blue Water Use in Europe Using Remote Sensing Meteosat Second Generation (MSG) products and Global Land Data Assimilation System (GLDAS) Data. Mireia Romaguera, Maarten S. Krol, Mhd. Suhyb Salama, Arjen Y. Hoekstra, and Zhongbo Su. August: 861–873

Modeling Percent Tree Canopy Cover: A Pilot Study. John W. Coulston, Gretchen G. Moisen, Barry T. Wilson, Mark V. Finco, Warren B. Cohen, and C. Kenneth Brewer. July: 715–727

## Compass

Book review: Global Navigation Satellite Systems: Insights into GPS, GLONASS, Galileo, Compass, and Others by Bhatta, Basudeb. Reviewed by Abuzar, Mohammad. May: 451–452

## Computer-aided classification

Computer-aided Classification of the First Frame of Digital Earth-1 (i.e., Landsat-1) Data. Roger M. Hoffer. July: 653–655

## Confusion matrix

Accuracy Assessment of Burned Area Products in the Orinoco Basin. Jesús A. Anaya and Emilio Chuvieco. January: 53–60

Mapping Crop Types, Irrigated Areas, and Cropping Intensities in Heterogeneous Landscapes of Southern India Using Multi-Temporal Medium-Resolution Imagery: Implications for Assessing Water Use in Agriculture. Elizabeth Heller, Jeanine M. Rhemtulla, Sharachandra Lele, Margaret Kalacska, Shrinivas Badiger, Raja Sengupta, and Navin Raman-kutty. August: 815–827

Mapping Nighttime Flood from MODIS Observations Using Support Vector Machines. Rui Zhang, Donglian Sun, Yunyue Yu, and Mitchell D. Goldberg. November: 1151–1161

- Phenology-based Crop Classification Algorithm and its Implications on Agricultural Water Use Assessments in California's Central Valley. Liheng Zhong, Peng Gong, and Greg S. Biging. August: 799–813
- Semi-automatic Quality Control of Topographic Data Sets. Petra Helmholz, Christian Becker, Uwe Breitkopf, Torsten Büschfeld, Andreas Busch, Carola Braun, Dietmar Grünreich, Sönke Müller, Jörn Ostermann, Martin Pahl, Franz Rottensteiner, Karsten Vogt, Marcel Ziems, Christian Heipke. September: 959–972
- Conifers**
- A New Method for Segmenting Individual Trees from the Lidar Point Cloud. Wenkai Li, Qinghua Guo, Marek K. Jakubowski, and Maggi Kelly. January: 75–84
- Contour smoothing**
- Computing Non-Crossing Smooth Contours on Triangulated Meshes. Yurai Núñez-Rodríguez, Michael A. Johnson, Igor Raskin, and Jesse L. Thé. July: 703–714

## COTH (Crown delineation based on Optimized object recognition, Treetop identification, and Hill-climbing) method

A Fusion Approach for Tree Crown Delineation from Lidar Data. Colin J. Gleason and Jungho Im. July: 679–692

## Craniofacial landmark measurement systems

A Webcam-based Photogrammetric System for the Measurement of Facial Landmarks on Newborns. Bruce King. December: 1285–1294

## Croatia

Grids & Datums Column: Republic of Croatia. Clifford J. Mugnier. July: 662–663

## Cropland mapping

Assessing Future Risks to Agricultural Productivity, Water Resources and Food Security: How Can Remote Sensing Help? Prasad S. Thenkabail, Jerry W. Knox, Mutlu Ozdogan, Murali Krishna Gumma, Russell G. Congalton, Zhuoting Wu, Cristina Milesi, Alex Finkral, Mike Marshall, Isabella Mariotto, Songcai You, Chandra Giri, and Pamela Nagler. August: 773–782

Determining Irrigated Areas and Quantifying Blue Water Use in Europe Using Remote Sensing Meteosat Second Generation (MSG) products and Global Land Data Assimilation System (GLDAS) Data. Mireia Romaguera, Maarten S. Krol, Mhd. Suhyb Salama, Arjen Y. Hoekstra, and Zhongbo Su. August: 861–873

Development of an Advanced Global Field Survey System (GFSS) for Terrestrial Monitoring and Mapping with a Demonstration for Agricultural Cropland Mapping in Asia. An Ngoc Van, Kyaw Sann Oo, and Wataru Takeuchi. August: 875–884

A Shape-matching Cropping Index (CI) Mapping Method to Determine Agricultural Cropland Intensities in China using MODIS Time-series Data. Jianhong Liu, Wenquan Zhu, and Xuefeng Cui. August: 829–837

## Croplands

Forward: Global Croplands and their Water Use for Food Security in the Twenty-first Century. Prasad S. Thenkabail. August: 797–798

## Cropping index (CI)

A Shape-matching Cropping Index (CI) Mapping Method to Determine Agricultural Cropland Intensities in China using MODIS Time-series Data. Jianhong Liu, Wenquan Zhu, and Xuefeng Cui. August: 829–837

## Crop type mapping

Mapping Crop Types, Irrigated Areas, and Cropping Intensities in Heterogeneous Landscapes of Southern India Using Multi-Temporal Medium-Resolution Imagery: Implications for Assessing Water Use in Agriculture. Elizabeth Heller, Jeanine M. Rhemtulla, Sharachandra Lele, Margaret Kalacska, Shrinivas Badiger, Raja Sengupta, and Navin Ramanakutty. August: 815–827

Phenology-based Crop Classification Algorithm and its Implications on Agricultural Water Use Assessments in California's Central Valley. Liheng Zhong, Peng Gong, and Greg S. Biging. August: 799–813

## Cross-track relief displacement correction

Urban Tree Cover Mapping with Relief-corrected Aerial Imagery and Lidar. Brad Lehrbass and Jinfei Wang. May: 473–484

## Cumulative distribution functions (CDF)

Modeling Percent Tree Canopy Cover: A Pilot Study. John W. Coulston, Gretchen G. Moisen, Barry T. Wilson, Mark V. Finco, Warren B. Cohen, and C. Kenneth Brewer. July: 715–727

## Curve-fitting

Comparing the Performance of Empirical, Semi-empirical, and Curve Fitting Models in Predicting Cyanobacterial Pigments. A.L. Nguy-Robertson, L. Li, L. Tedesco, J. Wilson, and E. Soyeux. May: 485–494

Phenology-based Crop Classification Algorithm and its Implications on Agricultural Water Use Assessments in California's Central Valley. Liheng Zhong, Peng Gong, and Greg S. Biging. August: 799–813

## Cyanobacterial pigments

Comparing the Performance of Empirical, Semi-empirical, and Curve Fitting Models in Predicting Cyanobacterial Pigments. A.L. Nguy-Robertson, L. Li, L. Tedesco, J. Wilson, and E. Soyeux. May: 485–494

## D

## Dasymetric mapping

GeoEye Imagery and Lidar Technology for Small-area Population Estimation: An Epidemiological Viewpoint. Erika Upegui and Jean-François Viel. July: 693–702

## Dasymetric method

GeoEye Imagery and Lidar Technology for Small-area Population Estimation: An Epidemiological Viewpoint. Erika Upegui and Jean-François Viel. July: 693–702

## Data acquisition

An Efficient Remote Sensing Solution to Update the NCWI. Beth R. Stein, Baojuan Zheng, Ioannis Kokkinidis, Nilam Kayastha, Taylor Seigler, Kemal Gök-kaya, Ranjith Gopalakrishnan, Won Hoi Hwang. June: 537–547

CASMSAR: An Integrated Airborne SAR Mapping System. Jixian Zhang, Zheng Zhao, Guoman Huang and Zhong Lu. November: 1110–1114

Laser Scanning in Heritage Documentation: The Scanning Pipeline and its Chal-

- lenges. Heinz R  ther, Roshan Bhurtha, Christoph Held, Ralph Schr  der, and Stephen Wessels. April: 309–316
- A Method for Detecting Windows from Mobile Lidar Data. Ruisheng Wang, Frank P. Ferrie, and Jane Macfarlane. November: 1129–1140
- Neuro-fuzzy Classification of Submarine Lava Flow Morphology. J. Timothy McClinton, Scott M. White, and John M. Sinton. June: 605–616
- Data collection**
- Application of Lidar Terrain Surfaces for Soil Moisture Modeling. Florence Margaret Southee, Paul M. Treitz, and Neal A. Scott. December: 1241–1251
- Assessment of Available Rangeland Woody Plant Biomass with a Terrestrial Lidar System. Nian-Wei Ku, Sorin C. Popescu, R. James Ansley, Humberto L. Perotto-Baldivieso, and Anthony M. Filippi. April: 349–361
- Calibration and Kinematic Analysis of the Velodyne HDL-64E S2 Lidar Sensor. Craig Glennie. April: 339–347
- Comparing the Performance of Empirical, Semi-empirical, and Curve Fitting Models in Predicting Cyanobacterial Pigments. A.L. Nguy-Robertson, L. Li, L. Tedesco, J. Wilson, and E. Soyeux. May: 485–494
- Identification of Waste Tires Using High-Resolution Multispectral Satellite Imagery. Becky Lauren Quinlan and Patricia G. Foschi. May: 463–471
- Integrating Remote Sensing and Wavelet Analysis for Studying Fine-scaled Vegetation Spatial Variation among Three Different Ecosystems. Yuhong He, Anum Khan, and Amy Mui. February: 161–168
- Data fusion**
- A Fusion Approach for Tree Crown Delineation from Lidar Data. Colin J. Gleason and Jungho Im. July: 679–692
- Phenology-based Crop Classification Algorithm and its Implications on Agricultural Water Use Assessments in California’s Central Valley. Liheng Zhong, Peng Gong, and Greg S. Biging. August: 799–813
- Data integration**
- Error Propagation in Raster Data Integration: Impacts on Landscape Composition and Configuration. Zachary J. Christman and John Rogan. June: 617–624

# Subject Index

An Efficient Remote Sensing Solution to Update the NCWI. Beth R. Stein, Baojuan Zheng, Ioannis Kokkinidis, Nilam Kayastha, Taylor Seigler, Kemal Gök-kaya, Ranjith Gopalakrishnan, Won Hoi Hwang. June: 537–547

Improving Forest Growth Estimates Using a Bayesian Network Approach. Yaseen T. Mustafa, Alfred Stein, Valentyn A. Tolpekin, and Patrick E. Van Laake. January: 45–51

Mapping Individual Tree Species in an Urban Forest Using Airborne Lidar Data and Hyperspectral Imagery. Caiyun Zhang and Fang Qiu. October: 1079–1087

Mapping Western China at a Scale of 1:50,000. Jixian Zhang, Qin Yan, Wenhan Xie. April: 289–292

## Datums

Grids & Datums Column: Central African Republic. Clifford J. Mugnier. March: 192–194

Grids & Datums Column: Commonwealth of Dominica. Clifford J. Mugnier. April: 293

Grids & Datums Column: Georgia. Clifford J. Mugnier. June: 548

Grids & Datums Column: Maps in the Middle of Nowhere. Clifford J. Mugnier. October: 1015

Grids & Datums Column: Republic of Albania. Clifford J. Mugnier. January: 5–6

Grids & Datums Column: Republic of Croatia. Clifford J. Mugnier. July: 662–663

Grids & Datums Column: Republic of Macedonia. Clifford J. Mugnier. May: 449–450

Grids & Datums column: Republic of Sierra Leone. Clifford J. Mugnier. February: 103

Grids & Datums Column: Republic of South Africa. Clifford J. Mugnier. September: 912–914

Grids & Datums Column: Republic of Uganda. Clifford J. Mugnier. August: 783, August: 786

Grids & Datums Column: Turkmenistan. Clifford J. Mugnier. December: 1209

Grids & Datums Column: United Mexican States. Clifford J. Mugnier. November: 1115–1116

## Deciduous trees

Estimating Urban Leaf Area Index (LAI) of Individual Trees with Hyperspectral Data. Ryan R. Jensen, Perry J. Hardin, and Andrew J. Hardin. May: 495–504

## 2010 Deepwater Horizon (DWH) spill

Expanding the Utility of Remote Sensing Data for Oil Spill Response. Jan Svejksvsky and Mark Hess. October: 1011–1014

Operational Utilization of Aerial Multispectral Remote Sensing during Oil Spill Response: Lessons Learned During the Deepwater Horizon (MC-252) Spill. Jan Svejksvsky, William Lehr, Judd Muskat, George Graettinger, and Joseph Mullin. October: 1089–1102

## Deformation measurement

Cell-based Automatic Deformation Computation by Analyzing Terrestrial Lidar Point Clouds. Jing Wu, Pierre-Yves Gilliéron, and Bertrand Merminod. April: 317–329

## DEM mosaicking

Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model Improvement. Rupert Müller, Thomas Krauß, Mathias Schneider, and Peter Reinartz. January: 61–74

## Depression removal algorithms

Application of Lidar Terrain Surfaces for Soil Moisture Modeling. Florence Margaret Southee, Paul M. Treitz, and Neal A. Scott. December: 1241–1251

## Depth-first search algorithm

Tree Topology Representation from TLS Point Clouds Using Depth-First Search in Voxel Space. Anita Schilling, Anja Schmidt, and Hans-Gerd Maas. April: 383–392

## Digital aerial photogrammetry

A Flexible Mathematical Method for Camera Calibration in Digital Aerial Photogrammetry. Rongfu Tang, Dieter Fritsch, Michael Cramer, and Werner Schneider. October: 1069–1077

## Digital elevation models (DEM). See also Ground digital elevation models (GDEMs)

CASMSAR: An Integrated Airborne SAR Mapping System. Jixian Zhang, Zheng Zhao, Guoman Huang and Zhong Lu. November: 1110–1114

Geopositioning Accuracy Assessment of GeoEye-1 Panchromatic and Multispectral Imagery. Manuel A. Aguilar, Fernando J. Aguilar, María del Mar Saldaña, and Ismael Fernández. March: 247–257

Integration of Remote Sensing and GIS for

Evaluating Soil Erosion Risk in Northwestern Zhejiang, China. Jianqin Huang, Dengsheng Lu, Jin Li, Jiasen Wu, Shiquan Chen, Weiming Zhao, Hongli Ge, Xingzhao Huang, and Xiaojie Yan. September: 935–946

Modeling Riparian Zones Utilizing DEMs and Flood Height Data. Sinan A. Abood, Ann L. Maclean, and Lacey A. Mason. March: 259–269

Terrestrial Laser Scanning for Delineating In-stream Boulders and Quantifying Habitat Complexity Measures. Jonathan P. Resop, Jessica L. Kozarek, and W. Cully Hession. April: 363–371

## Digital line graph (DLG)

CASMSAR: An Integrated Airborne SAR Mapping System. Jixian Zhang, Zheng Zhao, Guoman Huang and Zhong Lu. November: 1110–1114

## Digital orthophoto map (DOM)

CASMSAR: An Integrated Airborne SAR Mapping System. Jixian Zhang, Zheng Zhao, Guoman Huang and Zhong Lu. November: 1110–1114

## Digital stereo photogrammetric system

Development and Assessment of a Digital Stereo Photogrammetric System to Measure Cetaceans at Sea. Abraham Growcott, Pascal Sirguy, and Stephen M. Dawson. March: 237–246

## Digital terrain model (DTM)

Urban Tree Cover Mapping with Relief-corrected Aerial Imagery and Lidar. Brad Lehrbass and Jinfei Wang. May: 473–484

## Dijkstra's algorithm

Aerial Image Mosaicking with the Aid of Vector Roads. Dongliang Wang, Youchuan Wan, Jianhua Xiao, Xudong Lai, Wenli Huang, and Jingzhong Xu. November: 1141–1150

## Disaster management

Expanding the Utility of Remote Sensing Data for Oil Spill Response. Jan Svejksvsky and Mark Hess. October: 1011–1014

Operational Utilization of Aerial Multispectral Remote Sensing during Oil Spill Response: Lessons Learned During the Deepwater Horizon (MC-252) Spill. Jan Svejksvsky, William Lehr, Judd Muskat, George Graettinger, and Joseph Mullin. October: 1089–1102

*PE&RS* October 2013 Special Issue Call for Papers on. August: 789, October: 1068  
 Spatial Resolution Imagery Requirements for Identifying Structure Damage in a Hurricane Disaster: A Cognitive Approach. Sarah E. Battersby, Michael E. Hodgson, and Jiayu Wang. June: 625–635

## Disc Hough Transform

Tree Topology Representation from TLS Point Clouds Using Depth-First Search in Voxel Space. Anita Schilling, Anja Schmidt, and Hans-Gerd Maas. April: 383–392

## Discrete discriminant analysis

Automated Extraction of Road Markings from Mobile Lidar Point Clouds. Bisheng Yang, Lina Fang, Qingquan Li, and Jonathan Li. April: 331–338

## Disocclusion views

Automatic Generation of 2.5D Terrain Models without Occluding Routes of Interest. Hao Deng, Liqiang Zhang, Jingtao Ma, Liang Zhang, and Dong Chen. November: 1175–1185

## DMSC-MkII (Digital Multispectral Camera) imager

Operational Utilization of Aerial Multispectral Remote Sensing during Oil Spill Response: Lessons Learned During the Deepwater Horizon (MC-252) Spill. Jan Svejkovsky, William Lehr, Judd Muskat, George Graettinger, and Joseph Mullin. October: 1089–1102

## Dominica

Grids & Datums Column: Commonwealth of Dominica. Clifford J. Mugnier. April: 293

## 3DOR-Tree

An Efficient Point Cloud Management Method Based on a 3D R-Tree. Jun Gong, Qing Zhu, Ruofei Zhong, Yeting Zhang, and Xiao Xie. April: 373–381

## Downscaling cokriging (DCK)

Incorporating the Downscaled Landsat TM Thermal Band in Land-cover Classification using Random Forest. V.F. Rodríguez-Galiano, B. Ghimire, E. Pardo-Igúzquiza, M. Chica-Olmo, and R.G. Congalton. February: 129–137

# E

## Earth Resources Technology Satellite (ERTS-1)

Computer-aided Classification of the First Frame of Digital ErtS-1 (i.e., Landsat-1) Data. Roger M. Hoffer. July: 653–655

## Eclectic procedure

Computing Non-Crossing Smooth Contours on Triangulated Meshes. Yurái Núñez-Rodríguez, Michael A. Johnson, Igor Raskin, and Jesse L. Thé. July: 703–714

## eCognition

A Supervised and Fuzzy-based Approach to Determine Optimal Multi-resolution Image Segmentation Parameters. Hengjian Tong, Travis Maxwell, Yun Zhang, and Vivek Dey. October: 1029–1044

## Ecological metrics

Terrestrial Laser Scanning for Delineating In-stream Boulders and Quantifying Habitat Complexity Measures. Jonathan P. Resop, Jessica L. Kozarek, and W. Cully Hession. April: 363–371

## Edge detection

A Method for Detecting Windows from Mobile Lidar Data. Ruisheng Wang, Frank P. Ferrie, and Jane Macfarlane. November: 1129–1140

## Edge-matching

Automated Georegistration of High-Resolution Satellite Imagery using a RPC Model with Airborne Lidar Information. Jaehong Oh, Changno Lee, Yangdam Eo, and James Bethel. October: 1045–1056

## Education

2011 Survey on Remote Sensing and Geospatial Technologies Training in U.S. and Canadian Colleges and Universities. Steven A. Sader and Thomas Mueller. December: 1193–1198

## Elevation data

Automatic Generation of 2.5D Terrain Models without Occluding Routes of Interest. Hao Deng, Liqiang Zhang, Jingtao Ma, Liang Zhang, and Dong Chen. November: 1175–1185  
 A Comparison of SRTM V4 and ASTER GDEM for Hydrological Applications in Low Relief Terrain. Mariano Moreno-de las Heras, Patricia M. Saco, and Garry R. Willgoose. July: 757–766

Modeling Riparian Zones Utilizing DEMS and Flood Height Data. Sinan A. Abood, Ann L. Maclean, and Lacey A. Mason. March: 259–269

## Empirical model-based method

An Empirical Model-based Method for Signal Restoration of SWIR in ASD Field Spectroradiometry. Chinsu Lin, Khongor Tsoqt, and Chein-I Chang. February: 119–127

## Enhanced vegetation index (EVI) time-series data

A Shape-matching Cropping Index (CI) Mapping Method to Determine Agricultural Cropland Intensities in China using MODIS Time-series Data. Jianhong Liu, Wenquan Zhu, and Xuefeng Cui. August: 829–837

## Environmental change—Global

Book review: Land Remote Sensing and Global Environmental Change: NASA's Earth Observing System and the Science of ASTER and MODIS by Ramachandran, Bhaskar, Justice, Christopher O., and Abrams, Michael J. Reviewed by Nguy-Robertson, Anthony L. January: 8, January: 11

Book review: Remote Sensing and Global Environmental Change, First Edition by Purkis, Samuel J. and Klemas, V. Reviewed by Zourarakis, Demetrio P. October: 1017, October: 1019

## Envisat

Registration of Multisource Satellite Images by Thin-plate Splines with Highly Reliable Conjugate Points. Joz Wu, Chi Chang, Hsien-Yu Tsai, and Ming-Che Liu. June: 583–593

## Error analysis

Accuracy Assessment of Burned Area Products in the Orinoco Basin. Jesús A. Anaya and Emilio Chuvieco. January: 53–60  
 Bundle Block Adjustment of Weakly Connected Aerial Imagery. Yongjun Zhang, Xiaodong Xiong, Xiang Shen, and Zheng Ji. September: 983–988  
 A Method for Detecting Windows from Mobile Lidar Data. Ruisheng Wang, Frank P. Ferrie, and Jane Macfarlane. November: 1129–1140

# Subject Index

## Error matrix

Application of Time Series Landsat Images to Examining Land-use/Land-cover Dynamic Change. Dengsheng Lu, Scott Hetrick, Emilio Moran, and Guiying Li. July: 747–755

Neuro-fuzzy Classification of Submarine Lava Flow Morphology. J. Timothy McClinton, Scott M. White, and John M. Sinton. June: 605–616

## Error matrix – CIR classification

Urban Tree Cover Mapping with Relief-corrected Aerial Imagery and Lidar. Brad Lehrbass and Jinfei Wang. May: 473–484

## Error propagation

Error Propagation in Raster Data Integration: Impacts on Landscape Composition and Configuration. Zachary J. Christman and John Rogan. June: 617–624

## Error reduction

An Efficient Remote Sensing Solution to Update the NCWI. Beth R. Stein, Baojuan Zheng, Ioannis Kokkinidis, Nilam Kayastha, Taylor Seigler, Kemal Gök-kaya, Ranjith Gopalakrishnan, Won Hoi Hwang. June: 537–547

## Error sources

Accuracy Assessment of Burned Area Products in the Orinoco Basin. Jesús A. Anaya and Emilio Chuvieco. January: 53–60

A Comparison of Multispectral ASTER and Hyperspectral AVIRIS Multiple End-member Spectral Mixture Analysis for Sagebrush and Herbaceous Cover in Yellowstone. Stacey Fairweather, Christopher Potter, Robert Crabtree, and Shuang Li. January: 23–33

Development and Assessment of a Digital Stereo Photogrammetric System to Measure Cetaceans at Sea. Abraham Growcott, Pascal Sirguey, and Stephen M. Dawson. March: 237–246

A Flexible Mathematical Method for Camera Calibration in Digital Aerial Photogrammetry. Rongfu Tang, Dieter Fritsch, Michael Cramer, and Werner Schneider. October: 1069–1077

Generation of a U.S. National Urban Land-Use Product. James A. Falcone and Colin G. Homer. October: 1057–1068

Identification of Waste Tires Using High-Resolution Multispectral Satellite Imagery. Becky Lauren Quinlan and Patricia G. Foschi. May: 463–471

Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235

Mapping Matters. Qassim A. Abdullah. April: 296–297

Photogrammetric Monitoring of the Construction of a Solar Energy Dish Concentrator. M. R. Shortis and G. Burgess. May: 519–527

## Esri

An Era of Epochs. Karen Richardson. September: 905–908

## ETM+ (Enhanced Thematic Mapper Plus) imagery

Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235

Integrating Landsat-7 Imagery with Physics-based Models for Quantitative Mapping of Coastal Waters near River Discharges. Nima Pahlevan, Alfred J. Garrett, Aaron D. Gerace, and John R. Schott. November: 1163–1174

Phenology-based Crop Classification Algorithm and its Implications on Agricultural Water Use Assessments in California's Central Valley. Liheng Zhong, Peng Gong, and Greg S. Biging. August: 799–813

Three Decades of War and Food Insecurity in Iraq. Glen R. Gibson, James B. Campbell, Randolph H. Wynne. August: 885–895

## Europe

Determining Irrigated Areas and Quantifying Blue Water Use in Europe Using Remote Sensing Meteosat Second Generation (MSG) products and Global Land Data Assimilation System (GLDAS) Data. Mireia Romaguera, Maarten S. Krol, Mhd. Suhyb Salama, Arjen Y. Hoekstra, and Zhongbo Su. August: 861–873

## Evapotranspiration (ET)

Determining Irrigated Areas and Quantifying Blue Water Use in Europe Using Remote Sensing Meteosat Second Generation (MSG) products and Global Land Data Assimilation System (GL-

DAS) Data. Mireia Romaguera, Maarten S. Krol, Mhd. Suhyb Salama, Arjen Y. Hoekstra, and Zhongbo Su. August: 861–873

Estimating Irrigated Agricultural Water Use through Landsat TM and a Simplified Surface Energy Balance Modeling in the Semi-arid Environments of Arizona. Shai Kaplan and Soe W. Myint. August: 849–859

## Expectation maximization (EM)-algorithm

Improving Forest Growth Estimates Using a Bayesian Network Approach. Yaseen T. Mustafa, Alfred Stein, Valentyn A. Tolpekin, and Patrick E. Van Laake. January: 45–51

## Exterior orientation parameters (EOP)

Bundle Block Adjustment of Weakly Connected Aerial Imagery. Yongjun Zhang, Xiaodong Xiong, Xiang Shen, and Zheng Ji. September: 983–988

Network Orientation Using the Scaled Orthographic Projection for Parameter Initialization. Keith F. Blonquist and Robert T. Pack. May: 505–517

## F

### Facade detection

A Method for Detecting Windows from Mobile Lidar Data. Ruisheng Wang, Frank P. Ferrie, and Jane Macfarlane. November: 1129–1140

### Facial landmarks

A Webcam-based Photogrammetric System for the Measurement of Facial Landmarks on Newborns. Bruce King. December: 1285–1294

### Factorization method

Network Orientation Using the Scaled Orthographic Projection for Parameter Initialization. Keith F. Blonquist and Robert T. Pack. May: 505–517

### Feature extraction

Automated Extraction of Road Markings from Mobile Lidar Point Clouds. Bisheng Yang, Lina Fang, Qingquan Li, and Jonathan Li. April: 331–338

Automated Georegistration of High-Resolution Satellite Imagery using a RPC Model with Airborne Lidar Information. Jaehong Oh, Changno Lee, Yangdam Eo, and James Bethel. October: 1045–1056

Automatic Registration of High-Resolution

- Images Using Local Properties of Features. You Kyung Han, Young Gi Byun, Jae Wan Choi, Dong Yeob Han, and Yong Il Kim. March: 211–221
- Determination of Optimum Classifier and Feature Subset in Hyperspectral Images based on Ant Colony System. Farhad Samadzadegan, Hadiseh Hasani, and Toni Schenk. December: 1261–1273
- Integration of Polarimetric Decomposition, Object-Oriented Image Analysis, and Decision Tree Algorithms for Land-Use and Land-Cover Classification using RADARSAT-2 Polarimetric SAR Data. Zhixin Qi, Anthony G.O. Yeh, Xia Li, and Zheng Lin. February: 169–181
- Registration of Multisource Satellite Images by Thin-plate Splines with Highly Reliable Conjugate Points. Joz Wu, Chi Chang, Hsien-Yu Tsai, and Ming-Che Liu. June: 583–593
- Feature matching**
- Automatic Registration of High-Resolution Images Using Local Properties of Features. You Kyung Han, Young Gi Byun, Jae Wan Choi, Dong Yeob Han, and Yong Il Kim. March: 211–221
- Features of interest (FOIs)**
- Automatic Generation of 2.5D Terrain Models without Occluding Routes of Interest. Hao Deng, Liqiang Zhang, Jingtao Ma, Liang Zhang, and Dong Chen. November: 1175–1185
- Feature space construction**
- Mapping Nighttime Flood from MODIS Observations Using Support Vector Machines. Rui Zhang, Donglian Sun, Yunyue Yu, and Mitchell D. Goldberg. November: 1151–1161
- Field survey databases**
- Development of an Advanced Global Field Survey System (GFSS) for Terrestrial Monitoring and Mapping with a Demonstration for Agricultural Cropland Mapping in Asia. An Ngoc Van, Kyaw Sann Oo, and Wataru Takeuchi. August: 875–884
- Film photography**
- Mapping Matters. Qassim A. Abdullah. December: 1211
- Flood height**
- Modeling Riparian Zones Utilizing DEMS and Flood Height Data. Sinan A. Abood, Ann L. Maclean, and Lacey A. Mason. March: 259–269
- Flood mapping — nighttime**
- Mapping Nighttime Flood from MODIS Observations Using Support Vector Machines. Rui Zhang, Donglian Sun, Yunyue Yu, and Mitchell D. Goldberg. November: 1151–1161
- Food security**
- Assessing Future Risks to Agricultural Productivity, Water Resources and Food Security: How Can Remote Sensing Help? Prasad S. Thenkabail, Jerry W. Knox, Mutlu Ozdogan, Murali Krishna Gumma, Russell G. Congalton, Zhuoting Wu, Cristina Milesi, Alex Finkral, Mike Marshall, Isabella Mariotto, Songcai You, Chandra Giri, and Pamela Nagler. August: 773–782
- Forward: Global Croplands and their Water Use for Food Security in the Twenty-first Century. Prasad S. Thenkabail. August: 797–798
- Three Decades of War and Food Insecurity in Iraq. Glen R. Gibson, James B. Campbell, Randolph H. Wynne. August: 885–895
- Forest inventory parameters**
- Tree Topology Representation from TLS Point Clouds Using Depth-First Search in Voxel Space. Anita Schilling, Anja Schmidt, and Hans-Gerd Maas. April: 383–392
- Forest-replacing disturbances**
- Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235
- Forestry**
- Application of Lidar Terrain Surfaces for Soil Moisture Modeling. Florence Margaret Southee, Paul M. Treitz, and Neal A. Scott. December: 1241–1251
- Application of Time Series Landsat Images to Examining Land-use/Land-cover Dynamic Change. Dengsheng Lu, Scott Hetrick, Emilio Moran, and Guiying Li. July: 747–755
- Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235
- Integration of Remote Sensing and GIS for Evaluating Soil Erosion Risk in Northwestern Zhejiang, China. Jianqin Huang, Dengsheng Lu, Jin Li, Jiasen Wu, Shiquan Chen, Weiming Zhao, Hongli Ge, Xingzhao Huang, and Xiaojie Yan. September: 935–946
- Mapping Individual Tree Species in an Urban Forest Using Airborne Lidar Data and Hyperspectral Imagery. Caiyun Zhang and Fang Qiu. October: 1079–1087
- Objects-based Image Analysis for Mapping Natura 2000 Habitats to Improve Forest Management. Ana Hernando, Lara A. Arroyo, Javier Velázquez, Rosario Tejera. September: 991–999
- Forests**
- Automated Delineation of Individual Tree Crowns from Lidar Data by Multi-Scale Analysis and Segmentation. Linhai Jing, Baoxin Hu, Jili Li, and Thomas Noland. December: 1275–1284
- A Fusion Approach for Tree Crown Delineation from Lidar Data. Colin J. Gleason and Jungho Im. July: 679–692
- Improving Forest Growth Estimates Using a Bayesian Network Approach. Yaseen T. Mustafa, Alfred Stein, Valentyn A. Tolpekin, and Patrick E. Van Laake. January: 45–51
- Incorporating the Downscaled Landsat TM Thermal Band in Land-cover Classification using Random Forest. V.F. Rodríguez-Galiano, B. Ghimire, E. Pardo-Igúzquiza, M. Chica-Olmo, and R.G. Congalton. February: 129–137
- A New Method for Segmenting Individual Trees from the Lidar Point Cloud. Wenkai Li, Qinghua Guo, Marek K. Jakubowski, and Maggi Kelly. January: 75–84
- A Supervised and Fuzzy-based Approach to Determine Optimal Multi-resolution Image Segmentation Parameters. Hengjian Tong, Travis Maxwell, Yun Zhang, and Vivek Dey. October: 1029–1044
- Forest Service Forest Inventory and Analysis (FIA) program**
- Modeling Percent Tree Canopy Cover: A Pilot Study. John W. Coulston, Gretchen

Buenemann, Michaela. July: 666–667  
Integration of Remote Sensing and GIS for Evaluating Soil Erosion Risk in Northwestern Zhejiang, China. Jianqin Huang, Dengsheng Lu, Jin Li, Jiasen Wu, Shiquan Chen, Weiming Zhao, Hongli Ge, Xingzhao Huang, and Xiaojie Yan. September: 935–946

Modeling Riparian Zones Utilizing DEMs and Flood Height Data. Sinan A. Abood, Ann L. Maclean, and Lacey A. Mason. March: 259–269

Semi-automatic Quality Control of Topographic Data Sets. Petra Helmholz, Christian Becker, Uwe Breitkopf, Torsten Büschenfeld, Andreas Busch, Carola Braun, Dietmar Grünreich, Sönke Müller, Jörn Ostermann, Martin Pahl, Franz Rottensteiner, Karsten Vogt, Marcel Ziem, Christian Heipke. September: 959–972

## Geometric processing

Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model Improvement. Rupert Müller, Thomas Krauß, Mathias Schneider, and Peter Reinartz. January: 61–74

## Georeferenced feature images

Automated Extraction of Road Markings from Mobile Lidar Point Clouds. Bisheng Yang, Lina Fang, Qingquan Li, and Jonathan Li. April: 331–338

## Georeferencing — Automated

Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model Improvement. Rupert Müller, Thomas Krauß, Mathias Schneider, and Peter Reinartz. January: 61–74

## Georegistration — Automated

Automated Georegistration of High-Resolution Satellite Imagery using a RPC Model with Airborne Lidar Information. Jaehong Oh, Changno Lee, Yangdam Eo, and James Bethel. October: 1045–1056

## Georgia

Grids & Datums Column: Georgia. Clifford J. Mugnier. June: 548

## Geospatial disaster response

PE&RS October 2013 Special Issue Call for Papers on. August: 789, October: 1068

## Geospatial information

Book review: Spatial Statistics: Geospatial Information Modeling and Thematic

Mapping by Mohammed A. Kalkhan.

Reviewed by Kar, Bandana. September: 915–916

Book review: Why ‘Where’ Matters: Understanding and Profiting from GPS, GIS, and Remote Sensing by Ryerson, Robert A. and Aronoff, Stanley. Reviewed by Buenemann, Michaela. July: 666–667

## Geospatial technologies training

2011 Survey on Remote Sensing and Geospatial Technologies Training in U.S. and Canadian Colleges and Universities. Steven A. Sader and Thomas Mueller. December: 1193–1198

## GIS — Mobile

*PE&RS* October 2013 Special Issue Call for Papers on. August: 789, October: 1068

## Glaciers

Book review: Remote Sensing of Glaciers: Techniques for Topographic, Spatial and Thematic Mapping of Glaciers by Pellikka, P.K.E. and Rees, W.G. Reviewed by Gens, Rudiger. January: 7, January: 10

## Global field survey system (GFSS)

Development of an Advanced Global Field Survey System (GFSS) for Terrestrial Monitoring and Mapping with a Demonstration for Agricultural Cropland Mapping in Asia. An Ngoc Van, Kyaw Sann Oo, and Wataru Takeuchi. August: 875–884

## Global land data assimilation system (GLDAS)

Determining Irrigated Areas and Quantifying Blue Water Use in Europe Using Remote Sensing Meteosat Second Generation (MSG) products and Global Land Data Assimilation System (GLDAS) Data. Mireia Romaguera, Maarten S. Krol, Mhd. Suhayb Salama, Arjen Y. Hoekstra, and Zhongbo Su. August: 861–873

## Global navigation satellite system (GNSS)

Book review: Global Navigation Satellite Systems: Insights into GPS, GLONASS, Galileo, Compass, and Others by Bhatta, Basudeb. Reviewed by Abuzar, Mohammad. May: 451–452

Integrated Global Navigation Satellite System (iGNSS) QoS Prediction. Duangduen Roongpiboonsopit and Hassan A. Karimi. February: 139–149

## Global positioning systems (GPS)

Book review: Global Navigation Satellite Systems: Insights into GPS, GLONASS, Galileo, Compass, and Others by Bhatta, Basudeb. Reviewed by Abuzar, Mohammad. May: 451–452

Book review: Why ‘Where’ Matters: Understanding and Profiting from GPS, GIS, and Remote Sensing by Ryerson, Robert A. and Aronoff, Stanley. Reviewed by Buenemann, Michaela. July: 666–667

Book review: Global Navigation Satellite Systems: Insights into GPS, GLONASS, Galileo, Compass, and Others by Bhatta, Basudeb. Reviewed by Abuzar, Mohammad. May: 451–452

## GPS Photo database

Development of an Advanced Global Field Survey System (GFSS) for Terrestrial Monitoring and Mapping with a Demonstration for Agricultural Cropland Mapping in Asia. An Ngoc Van, Kyaw Sann Oo, and Wataru Takeuchi. August: 875–884

## Gradient-based fusion (GF)

A Variational Gradient-based Fusion Method for Visible and SWIR Imagery. Huifang Li, Liangpei Zhang, Huanfeng Shen, and Pingxiang Li. September: 947–958

## Grasslands

A Comparison of Multispectral ASTER and Hyperspectral AVIRIS Multiple End-member Spectral Mixture Analysis for Sagebrush and Herbaceous Cover in Yellowstone. Stacey Fairweather, Christopher Potter, Robert Crabtree, and Shuang Li. January: 23–33

Integrating Remote Sensing and Wavelet Analysis for Studying Fine-scaled Vegetation Spatial Variation among Three Different Ecosystems. Yuhong He, Anum Khan, and Amy Mui. February: 161–168

Mapping Crop Types, Irrigated Areas, and Cropping Intensities in Heterogeneous Landscapes of Southern India Using Multi-Temporal Medium-Resolution Imagery: Implications for Assessing Water Use in Agriculture. Elizabeth Heller, Jeanine M. Rhemtulla, Sharachandra Lele, Margaret Kalacska, Shrinivas Badiger, Raja Sengupta, and Navin Raman-kutty. August: 815–827

Semi-automatic Quality Control of Topo-

graphic Data Sets. Petra Helmholtz, Christian Becker, Uwe Breitkopf, Torsten Büschenfeld, Andreas Busch, Carola Braun, Dietmar Grünreich, Sönke Müller, Jörn Ostermann, Martin Pahl, Franz Rottensteiner, Karsten Vogt, Marcel Ziem, Christian Heipke. September: 959–972

## Ground control points (GCP)

Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model Improvement. Rupert Müller, Thomas Krauß, Mathias Schneider, and Peter Reinartz. January: 61–74

Geopositioning Accuracy Assessment of GeoEye-1 Panchromatic and Multispectral Imagery. Manuel A. Aguilar, Fernando J. Aguilar, María del Mar Saldaña, and Ismael Fernández. March: 247–257

Mapping Western China at a Scale of 1:50,000. Jixian Zhang, Qin Yan, Wenhan Xie. April: 289–292

## Ground digital elevation models (GDEMs)

A Comparison of SRTM V4 and ASTER GDEM for Hydrological Applications in Low Relief Terrain. Mariano Moreno-de las Heras, Patricia M. Saco, and Garry R. Willgoose. July: 757–766

## Ground filtering

Detect Residential Buildings from Lidar and Aerial Photographs through Object-Oriented Land-Use Classification. Xuelian Meng, Nate Currit, Le Wang, and Xiaojun Yang. January: 35–44

## Ground point separation

A Method for Detecting Windows from Mobile Lidar Data. Ruisheng Wang, Frank P. Ferrie, and Jane Macfarlane. November: 1129–1140

## 2010 Gulf of Mexico oil spill

Expanding the Utility of Remote Sensing Data for Oil Spill Response. Jan Svejkovsky and Mark Hess. October: 1011–1014

Operational Utilization of Aerial Multispectral Remote Sensing during Oil Spill Response: Lessons Learned During the Deepwater Horizon (MC-252) Spill. Jan Svejkovsky, William Lehr, Judd Muskat, George Graettinger, and Joseph Mullin. October: 1089–1102

## H

### H/A/Alpha decomposition

Integration of Polarimetric

Decomposition, Object-Oriented Image Analysis, and Decision Tree Algorithms for Land-Use and Land-Cover Classification using RADARSAT-2 Polarimetric SAR Data. Zhixin Qi, Anthony G.O. Yeh, Xia Li, and Zheng Lin. February: 169–181

### Habitat complexity measures — Stream

Terrestrial Laser Scanning for Delineating In-stream Boulders and Quantifying Habitat Complexity Measures. Jonathan P. Resop, Jessica L. Kozarek, and W. Cully Hession. April: 363–371

### Habitat mapping

Objects-based Image Analysis for Mapping Natura 2000 Habitats to Improve Forest Management. Ana Hernando, Lara A. Arroyo, Javier Velázquez, Rosario Tejera. September: 991–999

### Height bin approach

Assessment of Available Rangeland Woody Plant Biomass with a Terrestrial Lidar System. Nian-Wei Ku, Sorin C. Popescu, R. James Ansley, Humberto L. Perotto-Baldivieso, and Anthony M. Filippi. April: 349–361

### Herbaceous cover

A Comparison of Multispectral ASTER and Hyperspectral AVIRIS Multiple End-member Spectral Mixture Analysis for Sagebrush and Herbaceous Cover in Yellowstone. Stacey Fairweather, Christopher Potter, Robert Crabtree, and Shuang Li. January: 23–33

### Heritage documentation

Laser Scanning in Heritage Documentation: The Scanning Pipeline and its Challenges. Heinz Rüther, Roshan Bhurtha, Christoph Held, Ralph Schröder, and Stephen Wessels. April: 309–316

### Heuristic algorithm

Computing Non-Crossing Smooth Contours on Triangulated Meshes. Yurai Núñez-Rodríguez, Michael A. Johnson, Igor Raskin, and Jesse L. Thé. July: 703–714

### Heuristic optimization

A Fusion Approach for Tree Crown Delineation from Lidar Data. Colin J. Gleason and Jungho Im. July: 679–692

### High-resolution lidar intensity return image (HRLI)

Automated Georegistration of High-Resolution Satellite Imagery using a RPC Model with Airborne Lidar Information. Jaehong Oh, Changno Lee, Yangdam Eo, and James Bethel. October: 1045–1056

### High-resolution multibeam sonar bathymetry

Neuro-fuzzy Classification of Submarine Lava Flow Morphology. J. Timothy McClinton, Scott M. White, and John M. Sinton. June: 605–616

### High-resolution multispectral satellite imagery

Identification of Waste Tires Using High-Resolution Multispectral Satellite Imagery. Becky Lauren Quinlan and Patricia G. Foschi. May: 463–471

### High-resolution satellite imagery (HRSI)

Accuracy Assessment of Burned Area Products in the Orinoco Basin. Jesús A. Anaya and Emilio Chuvieco. January: 53–60

Automated Georegistration of High-Resolution Satellite Imagery using a RPC Model with Airborne Lidar Information. Jaehong Oh, Changno Lee, Yangdam Eo, and James Bethel. October: 1045–1056

Semi-automatic Quality Control of Topographic Data Sets. Petra Helmholz, Christian Becker, Uwe Breitkopf, Torsten Büschenfeld, Andreas Busch, Carola Braun, Dietmar Grünreich, Sönke Müller, Jörn Ostermann, Martin Pahl, Franz Rottensteiner, Karsten Vogt, Marcel Ziems, Christian Heipke. September: 959–972

### Hurricane disaster

Spatial Resolution Imagery Requirements for Identifying Structure Damage in a Hurricane Disaster: A Cognitive Approach. Sarah E. Battersby, Michael E. Hodgson, and Jiayu Wang. June: 625–635

### Hydrodynamic modeling

Integrating Landsat-7 Imagery with Physics-based Models for Quantitative Mapping of Coastal Waters near River Discharges. Nima Pahlevan, Alfred J. Garrett, Aaron D. Gerace, and John R. Schott. November: 1163–1174

### Hydrologic estimation

A Comparison of SRTM V4 and ASTER GDEM for Hydrological Applications in Low Relief Terrain. Mariano Moreno-de las Heras, Patricia M. Saco, and Garry R. Willgoose. July: 757–766

Modeling Riparian Zones Utilizing DEMS and Flood Height Data. Sinan A. Abood, Ann L. Maclean, and Lacey A. Mason. March: 259–269

### Hyperion data

A Semi-Analytical Model for the Multitemporal Prediction of Chlorophyll-a in an Iowa Lake Using Hyperion Data. Ramathan Sugumaran and Justin Thomas. December: 1253–1260

### Hyperspectral data

Assessing Future Risks to Agricultural Productivity, Water Resources and Food Security: How Can Remote Sensing Help? Prasad S. Thenkabail, Jerry W. Knox, Mutlu Ozdogan, Murali Krishna Gumma, Russell G. Congalton, Zhuoting Wu, Cristina Milesi, Alex Finkral, Mike Marshall, Isabella Mariotto, Songcai You, Chandra Giri, and Pamela Nagler. August: 773–782

Estimating Urban Leaf Area Index (LAI) of Individual Trees with Hyperspectral Data. Ryan R. Jensen, Perry J. Hardin, and Andrew J. Hardin. May: 495–504

### Hyperspectral remote sensing

An Empirical Model-based Method for Signal Restoration of SWIR in ASD Field Spectroradiometry. Chinsu Lin, Khongor Tsoyt, and Chein-I Chang. February: 119–127

Book review: Hyperspectral Remote Sensing of Vegetation by Thenkabail, Prasad S., Lyon, John G., and Huete, Alfredo. Reviewed by Du, Qian. November: 1119

Determination of Optimum Classifier and Feature Subset in Hyperspectral Images based on Ant Colony System. Farhad Samadzadegan, Hadiseh Hasani, and Toni Schenk. December: 1261–1273

### Hyperspectral satellite imagery

Comparing the Performance of Empirical, Semi-empirical, and Curve Fitting Models in Predicting Cyanobacterial Pigments. A.L. Nguy-Robertson, L. Li, L. Tedesco, J. Wilson, and E. Soyeux. May: 485–494

Mapping Individual Tree Species in an Urban Forest Using Airborne Lidar Data and

Hyperspectral Imagery. Caiyun Zhang and Fang Qiu. October: 1079–1087

## **Ikonos imagery — Applications**

Registration of Multisource Satellite Images by Thin-plate Splines with Highly Reliable Conjugate Points. Joz Wu, Chi Chang, Hsien-Yu Tsai, and Ming-Che Liu. June: 583–593

## **Image acquisition**

CASMSAR: An Integrated Airborne SAR Mapping System. Jixian Zhang, Zheng Zhao, Guoman Huang and Zhong Lu. November: 1110–1114

Estimating Urban Leaf Area Index (LAI) of Individual Trees with Hyperspectral Data. Ryan R. Jensen, Perry J. Hardin, and Andrew J. Hardin. May: 495–504

Integrating Remote Sensing and Wavelet Analysis for Studying Fine-scaled Vegetation Spatial Variation among Three Different Ecosystems. Yuhong He, Anum Khan, and Amy Mui. February: 161–168

Seasonal Variation in Land-Cover Classification Accuracy in a Diverse Region. Priyakant Sinha, Lalit Kumar, and Nick Reid. March: 271–280

A Semi-Analytical Model for the Multitemporal Prediction of Chlorophyll-a in an Iowa Lake Using Hyperion Data. Ramanathan Sugumaran and Justin Thomas. December: 1253–1260

## **Image analysis**

Accuracy Assessment of Burned Area Products in the Orinoco Basin. Jesús A. Anaya and Emilio Chuvieco. January: 53–60

Computer-aided Classification of the First Frame of Digital Earth-1 (i.e., Landsat-1) Data. Roger M. Hoffer. July: 653–655

Development and Assessment of a Digital Stereo Photogrammetric System to Measure Cetaceans at Sea. Abraham Growcott, Pascal Sirguey, and Stephen M. Dawson. March: 237–246

Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235

Topographic Corrections of Satellite Data for Regional Monitoring. Sarah C. Goslee. September: 973–981

## **Image analysis — Automatic**

Semi-automatic Quality Control of Topographic Data Sets. Petra Helmholz, Christian Becker, Uwe Breitkopf, Torsten Büschenfeld, Andreas Busch, Carola Braun, Dietmar Grünreich, Sönke Müller, Jörn Ostermann, Martin Pahl, Franz Rottensteiner, Karsten Vogt, Marcel Ziem, Christian Heipke. September: 959–972

## **Image analysis — Object-based**

Objects-based Image Analysis for Mapping Natura 2000 Habitats to Improve Forest Management. Ana Hernando, Lara A. Arroyo, Javier Velázquez, Rosario Tejera. September: 991–999

## **Image analysis — Object-oriented**

Integration of Polarimetric Decomposition, Object-Oriented Image Analysis, and Decision Tree Algorithms for Land-Use and Land-Cover Classification using RADARSAT-2 Polarimetric SAR Data. Zhixin Qi, Anthony G.O. Yeh, Xia Li, and Zheng Lin. February: 169–181

## **Image analysis operators**

Semi-automatic Quality Control of Topographic Data Sets. Petra Helmholz, Christian Becker, Uwe Breitkopf, Torsten Büschenfeld, Andreas Busch, Carola Braun, Dietmar Grünreich, Sönke Müller, Jörn Ostermann, Martin Pahl, Franz Rottensteiner, Karsten Vogt, Marcel Ziem, Christian Heipke. September: 959–972

## **Image classification**

Application of Time Series Landsat Images to Examining Land-use/Land-cover Dynamic Change. Dengsheng Lu, Scott Hetrick, Emilio Moran, and Guiying Li. July: 747–755

Determination of Optimum Classifier and Feature Subset in Hyperspectral Images based on Ant Colony System. Farhad Samadzadegan, Hadiseh Hasani, and Toni Schenk. December: 1261–1273

Mapping Crop Types, Irrigated Areas, and Cropping Intensities in Heterogeneous Landscapes of Southern India Using Multi-Temporal Medium-Resolution Imagery: Implications for Assessing Water Use in Agriculture. Elizabeth Heller, Jeanine M. Rhemtulla, Sharachchandra Lele, Margaret Kalacska, Shrinivas Badiger, Raja Sengupta, and Navin Raman-kutty. August: 815–827

Seasonal Variation in Land-Cover Classification Accuracy in a Diverse Region. Priyakant Sinha, Lalit Kumar, and Nick Reid. March: 271–280

## **Image classification — Supervised**

A Framework for Supervised Image Classification with Incomplete Training Samples. Qinghua Guo, Wenkai Li, Desheng Liu, and Jin Chen. June: 595–604

## **Image compression**

LIZARDTECH ANNIVERSARY: Celebrating 20 Years of Image Compression with MrSID. Kevin P. Corbley. September: 909–911

## **Image entropy**

Building Detection in Complex Scenes Through Effective Separation of Buildings from Trees. Mohammad Awrangjeb, Chunsun Zhang, and Clive S. Fraser. July: 729–745

## **Image fusion**

A Variational Gradient-based Fusion Method for Visible and SWIR Imagery. Huifang Li, Liangpei Zhang, Huanfeng Shen, and Pingxiang Li. September: 947–958

## **Image matching**

Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model Improvement. Rupert Müller, Thomas Krauß, Mathias Schneider, and Peter Reinartz. January: 61–74

Automated Georegistration of High-Resolution Satellite Imagery using a RPC Model with Airborne Lidar Information. Jaehong Oh, Changno Lee, Yangdam Eo, and James Bethel. October: 1045–1056

## **Image network orientation**

Network Orientation Using the Scaled Orthographic Projection for Parameter Initialization. Keith F. Blonquist and Robert T. Pack. May: 505–517

## **Image noise**

Improving Forest Growth Estimates Using a Bayesian Network Approach. Yaseen T. Mustafa, Alfred Stein, Valentyn A. Tolpekin, and Patrick E. Van Laake. January: 45–51

## **Image processing**

A Comparison of Multispectral ASTER and Hyperspectral AVIRIS Multiple End-member Spectral Mixture Analysis for

## Invasive species mapping

An Efficient Remote Sensing Solution to Update the NCWI. Beth R. Stein, Baojuan Zheng, Ioannis Kokkinidis, Nilam Kayastha, Taylor Seigler, Kemal Gök-kaya, Ranjith Gopalakrishnan, Won Hoi Hwang. June: 537–547

## Iowa lake

A Semi-Analytical Model for the Multitemporal Prediction of Chlorophyll-a in an Iowa Lake Using Hyperion Data. Ramanathan Sugumaran and Justin Thomas. December: 1253–1260

## Iraq

Three Decades of War and Food Insecurity in Iraq. Glen R. Gibson, James B. Campbell, Randolph H. Wynne. August: 885–895

## Irrigated area mapping

Determining Irrigated Areas and Quantifying Blue Water Use in Europe Using Remote Sensing Meteosat Second Generation (MSG) products and Global Land Data Assimilation System (GLDAS) Data. Mireia Romaguera, Maarten S. Krol, Mhd. Suhyb Salama, Arjen Y. Hoekstra, and Zhongbo Su. August: 861–873

Estimating Irrigated Agricultural Water Use through Landsat TM and a Simplified Surface Energy Balance Modeling in the Semi-arid Environments of Arizona. Shai Kaplan and Soe W. Myint. August: 849–859

Mapping Crop Types, Irrigated Areas, and Cropping Intensities in Heterogeneous Landscapes of Southern India Using Multi-Temporal Medium-Resolution Imagery: Implications for Assessing Water Use in Agriculture. Elizabeth Heller, Jeanine M. Rhemtulla, Sharachchandra Lele, Margaret Kalacska, Shrinivas Badiger, Raja Sengupta, and Navin Raman-kutty. August: 815–827

## Iterative Self-Organizing Data Analysis (ISODATA) clustering algorithm

GeoEye Imagery and Lidar Technology for Small-area Population Estimation: An Epidemiological Viewpoint. Erika Upegui and Jean-François Viel. July: 693–702

## J

### Jig photogrammetry

Photogrammetric Monitoring of the Construction of a Solar Energy Dish Concentrator. M. R. Shortis and G. Burgess. May: 519–527

## K

### Keypoint matching

Registration of Multisource Satellite Images by Thin-plate Splines with Highly Reliable Conjugate Points. Joz Wu, Chi Chang, Hsien-Yu Tsai, and Ming-Che Liu. June: 583–593

### Kinematic calibration analysis

Calibration and Kinematic Analysis of the Velodyne HDL-64E S2 Lidar Sensor. Craig Glennie. April: 339–347

### Knowledge-based photogrammetric-cartographic workstation for quality control. See WIPKA-QS (Wissensbasierter Photogrammetrisch-Kartographischer Arbeitsplatz zur Qualitätssicherung)

## L

### Lake-wide simulation

Integrating Landsat-7 Imagery with Physics-based Models for Quantitative Mapping of Coastal Waters near River Discharges. Nima Pahlevan, Alfred J. Garrett, Aaron D. Gerace, and John R. Schott. November: 1163–1174

### Land-cover classification

Computer-aided Classification of the First Frame of Digital Earths-1 (i.e., Landsat-1) Data. Roger M. Hoffer. July: 653–655

A Framework for Supervised Image Classification with Incomplete Training Samples. Qinghua Guo, Wenkai Li, Desheng Liu, and Jin Chen. June: 595–604

Incorporating the Downscaled Landsat TM Thermal Band in Land-cover Classification using Random Forest. V.F. Rodríguez-Galiano, B. Ghimire, E. Pardo-Igúzquiza, M. Chica-Olmo, and R.G. Congalton. February: 129–137

Mapping Crop Types, Irrigated Areas, and Cropping Intensities in Heterogeneous Landscapes of Southern India Using Multi-Temporal Medium-Resolution Imagery: Implications for Assessing Water Use in Agriculture. Elizabeth Heller,

Jeanine M. Rhemtulla, Sharachchandra Lele, Margaret Kalacska, Shrinivas Badiger, Raja Sengupta, and Navin Raman-kutty. August: 815–827

Objects-based Image Analysis for Mapping Natura 2000 Habitats to Improve Forest Management. Ana Hernando, Lara A. Arroyo, Javier Velázquez, Rosario Tejera. September: 991–999

Seasonal Variation in Land-Cover Classification Accuracy in a Diverse Region. Priyakant Sinha, Lalit Kumar, and Nick Reid. March: 271–280

Semi-automatic Quality Control of Topographic Data Sets. Petra Helmholz, Christian Becker, Uwe Breitkopf, Torsten Büschenfeld, Andreas Busch, Carola Braun, Dietmar Grünreich, Sönke Müller, Jörn Ostermann, Martin Pahl, Franz Rottensteiner, Karsten Vogt, Marcel Ziems, Christian Heipke. September: 959–972

### Land remote sensing

Book review: Land Remote Sensing and Global Environmental Change: NASA's Earth Observing System and the Science of ASTER and MODIS by Ramachandran, Bhaskar. Reviewed by Nguy-Robertson, Anthony L. January: 8

### Landsat Enhanced Thematic Mapper (ETM+) – Applications

Error Propagation in Raster Data Integration: Impacts on Landscape Composition and Configuration. Zachary J. Christman and John Rogan. June: 617–624

Integrating Landsat-7 Imagery with Physics-based Models for Quantitative Mapping of Coastal Waters near River Discharges. Nima Pahlevan, Alfred J. Garrett, Aaron D. Gerace, and John R. Schott. November: 1163–1174

### Landsat Enhanced Thematic Mapper (ETM+) – Imagery

Accuracy Assessment of Burned Area Products in the Orinoco Basin. Jesús A. Anaya and Emilio Chuvieco. January: 53–60

Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model Improvement. Rupert Müller, Thomas Krauß, Mathias Schneider, and Peter Reinartz. January: 61–74

Topographic Corrections of Satellite Data for Regional Monitoring. Sarah C. Goslee. September: 973–981

A Variational Gradient-based Fusion

# Subject Index

Method for Visible and SWIR Imagery. Huifang Li, Liangpei Zhang, Huanfeng Shen, and Pingxiang Li. September: 947–958

## **Landsat imagery normalization**

Modeling Percent Tree Canopy Cover: A Pilot Study. John W. Coulston, Gretchen G. Moisen, Barry T. Wilson, Mark V. Finco, Warren B. Cohen, and C. Kenneth Brewer. July: 715–727

## **Landsat Thematic Mapper (TM) – Applications**

An Efficient Remote Sensing Solution to Update the NCWI. Beth R. Stein, Baojuan Zheng, Ioannis Kokkinidis, Nilam Kayastha, Taylor Seigler, Kemal Gök-kaya, Ranjith Gopalakrishnan, Won Hoi Hwang. June: 537–547

Application of Time Series Landsat Images to Examining Land-use/Land-cover Dynamic Change. Dengsheng Lu, Scott Hetrick, Emilio Moran, and Guiying Li. July: 747–755

Estimating Irrigated Agricultural Water Use through Landsat TM and a Simplified Surface Energy Balance Modeling in the Semi-arid Environments of Arizona. Shai Kaplan and Soe W. Myint. August: 849–859

Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235

Incorporating the Downscaled Landsat TM Thermal Band in Land-cover Classification using Random Forest. V.F. Rodríguez-Galiano, B. Ghimire, E. Pardo-Igúzquiza, M. Chica-Olmo, and R.G. Congalton. February: 129–137

Integration of Remote Sensing and GIS for Evaluating Soil Erosion Risk in Northwestern Zhejiang, China. Jianqin Huang, Dengsheng Lu, Jin Li, Jiasen Wu, Shiquan Chen, Weiming Zhao, Hongli Ge, Xingzhao Huang, and Xiaojie Yan. September: 935–946

Phenology-based Crop Classification Algorithm and its Implications on Agricultural Water Use Assessments in California's Central Valley. Liheng Zhong, Peng Gong, and Greg S. Biging. August: 799–813

Seasonal Variation in Land-Cover Classification Accuracy in a Diverse Region.

Priyakant Sinha, Lalit Kumar, and Nick Reid. March: 271–280

Three Decades of War and Food Insecurity in Iraq. Glen R. Gibson, James B. Campbell, Randolph H. Wynne. August: 885–895

## **Landsat Thematic Mapper (TM) – Imagery**

An Era of Epochs. Karen Richardson. September: 905–908

## **Landscape composition metrics**

A Comparison of SRTM V4 and ASTER GDEM for Hydrological Applications in Low Relief Terrain. Mariano Moreno-de las Heras, Patricia M. Saco, and Garry R. Willgoose. July: 757–766

Error Propagation in Raster Data Integration: Impacts on Landscape Composition and Configuration. Zachary J. Christman and John Rogan. June: 617–624

A Fusion Approach for Tree Crown Delineation from Lidar Data. Colin J. Gleason and Jungho Im. July: 679–692

## **Landscapes – 2.5D**

Automatic Generation of 2.5D Terrain Models without Occluding Routes of Interest. Hao Deng, Liqiang Zhang, Jingtao Ma, Liang Zhang, and Dong Chen. November: 1175–1185

## **Land surface monitoring**

Book review: Land Remote Sensing and Global Environmental Change: NASA's Earth Observing System and the Science of ASTER and MODIS by Ramachandran, Bhaskar, Justice, Christopher O., and Abrams, Michael J. Reviewed by Nguy-Robertson, Anthony L. January: 8, January: 11

## **Land surface temperature (LST) night imagery – Multitemporal**

Elevation, Latitude/Longitude Decorrelation Stretch of Multitemporal LST Imagery. George Ch. Miliareisis. February: 151–160

## **Land-use and land-cover (LULC) classification**

Estimating Irrigated Agricultural Water Use through Landsat TM and a Simplified Surface Energy Balance Modeling in the Semi-arid Environments of Arizona. Shai Kaplan and Soe W. Myint. August: 849–859

Integration of Polarimetric Decomposition, Object-Oriented Image

Analysis, and Decision Tree Algorithms for Land-Use and Land-Cover Classification using RADARSAT-2 Polarimetric SAR Data. Zhixin Qi, Anthony G.O. Yeh, Xia Li, and Zheng Lin. February: 169–181

Three Decades of War and Food Insecurity in Iraq. Glen R. Gibson, James B. Campbell, Randolph H. Wynne. August: 885–895

## **Land-use classification**

Detect Residential Buildings from Lidar and Aerial Photographs through Object-Oriented Land-Use Classification. Xuelian Meng, Nate Currit, Le Wang, and Xiaojun Yang. January: 35–44

## **Land-use grid – Urban**

Generation of a U.S. National Urban Land-Use Product. James A. Falcone and Colin G. Homer. October: 1057–1068

## **Land-use/land-cover distribution mapping**

Application of Time Series Landsat Images to Examining Land-use/Land-cover Dynamic Change. Dengsheng Lu, Scott Hetrick, Emilio Moran, and Guiying Li. July: 747–755

## **Laos**

Development of an Advanced Global Field Survey System (GFSS) for Terrestrial Monitoring and Mapping with a Demonstration for Agricultural Cropland Mapping in Asia. An Ngoc Van, Kyaw Sann Oo, and Wataru Takeuchi. August: 875–884

## **LAS 1.4**

The LAS 1.4 Specification. Lewis Graham. February: 93–102

## **Laser fluorometry**

Operational Utilization of Aerial Multispectral Remote Sensing during Oil Spill Response: Lessons Learned During the Deepwater Horizon (MC-252) Spill. Jan Svejkskovsky, William Lehr, Judd Muskat, George Graettinger, and Joseph Mullin. October: 1089–1102

## **Laser scanning**

Laser Scanning in Heritage Documentation: The Scanning Pipeline and its Challenges. Heinz Rüther, Roshan Bhurtha, Christoph Held, Ralph Schröder, and Stephen Wessels. April: 309–316

## **LAS Working Group (LWG)**

The LAS 1.4 Specification. Lewis Graham.  
February: 93–102

## **Lava morphology — submarine**

Neuro-fuzzy Classification of Submarine  
Lava Flow Morphology. J. Timothy Mc-  
Clinton, Scott M. White, and John M.  
Sinton. June: 605–616

## **Leaf area index (LAI)**

Improving Forest Growth Estimates Using a  
Bayesian Network Approach. Yaseen T.  
Mustafa, Alfred Stein, Valentyn A. Tol-  
pekin, and Patrick E. Van Laake. Janu-  
ary: 45–51

Integrating Remote Sensing and Wavelet  
Analysis for Studying Fine-scaled Veg-  
etation Spatial Variation among Three  
Different Ecosystems. Yuhong He, Anum  
Khan, and Amy Mui. February: 161–168

## **Least squares adjustment approach**

Calibration and Kinematic Analysis of the  
Velodyne HDL-64E S2 Lidar Sensor.  
Craig Glennie. April: 339–347

## **Legendre self-calibration additional param- eters (APs)**

A Flexible Mathematical Method for Cam-  
era Calibration in Digital Aerial Photo-  
grammetry. Rongfu Tang, Dieter Fritsch,  
Michael Cramer, and Werner Schneider.  
October: 1069–1077

## **Lidar — Airborne**

A New Method for Segmenting Individual  
Trees from the Lidar Point Cloud. Wenkai  
Li, Qinghua Guo, Marek K. Jakubowski,  
and Maggi Kelly. January: 75–84

## **Lidar — Applications**

Assessment of Available Rangeland Woody  
Plant Biomass with a Terrestrial Lidar  
System. Nian-Wei Ku, Sorin C. Popescu,  
R. James Ansley, Humberto L. Perotto-  
Baldivieso, and Anthony M. Filippi.  
April: 349–361

Automated Extraction of Road Markings  
from Mobile Lidar Point Clouds. Bish-  
eng Yang, Lina Fang, Qingquan Li, and  
Jonathan Li. April: 331–338

Cell-based Automatic Deformation Com-  
putation by Analyzing Terrestrial Lidar  
Point Clouds. Jing Wu, Pierre-Yves  
Gilliéron, and Bertrand Merminod. April:  
317–329

GeoEye Imagery and Lidar Technology  
for Small-area Population Estimation:

An Epidemiological Viewpoint. Erika  
Upegui and Jean-François Viel. July:  
693–702

Integrated Global Navigation Satellite  
System (iGNSS) QoS Prediction. Duang-  
duen Roongpiboonsopit and Hassan A.  
Karimi. February: 139–149

Mapping Matters. Qassim A. Abdullah.  
April: 296–297, July: 664–665

Urban Tree Cover Mapping with Relief-  
corrected Aerial Imagery and Lidar.  
Brad Lehrbass and Jinfei Wang. May:  
473–484

## **Lidar binary file specification**

The LAS 1.4 Specification. Lewis Graham.  
February: 93–102

## **Lidar data**

An Efficient Remote Sensing Solution to  
Update the NCWI. Beth R. Stein, Bao-  
juan Zheng, Ioannis Kokkinidis, Nilam  
Kayastha, Taylor Seigler, Kemal Gök-  
kaya, Ranjith Gopalakrishnan, Won Hoi  
Hwang. June: 537–547

Automated Delineation of Individual Tree  
Crowns from Lidar Data by Multi-Scale  
Analysis and Segmentation. Linhai Jing,  
Baixin Hu, Jili Li, and Thomas Noland.  
December: 1275–1284

Breaklines and Lidar Data. Lewis Graham.  
March: 189–191

Building Detection in Complex Scenes  
Thorough Effective Separation of Build-  
ings from Trees. Mohammad Awrangjeb,  
Chunshun Zhang, and Clive S. Fraser.  
July: 729–745

Evaluating the Benefits of Octree-based  
Indexing for Lidar Data. Abu Saleh Mo-  
hammad Mosa, Bianca Schön, Michela  
Bertolotto, and Debra F. Laefer. Septem-  
ber: 927–934

A Fusion Approach for Tree Crown Delinea-  
tion from Lidar Data. Colin J. Gleason  
and Jungho Im. July: 679–692

Mapping Matters. Qassim A. Abdullah. No-  
vember: 1117

## **Lidar data — Mobile**

A Method for Detecting Windows from Mo-  
bile Lidar Data. Ruisheng Wang, Frank  
P. Ferrie, and Jane Macfarlane. Novem-  
ber: 1129–1140

## **Lidar-derived terrain variables**

Application of Lidar Terrain Surfaces for  
Soil Moisture Modeling. Florence Mar-  
garet Southee, Paul M. Treitz, and Neal  
A. Scott. December: 1241–1251

## **Lidar photographs**

Detect Residential Buildings from Lidar and  
Aerial Photographs through Object-Ori-  
ented Land-Use Classification. Xuelian  
Meng, Nate Currit, Le Wang, and Xiao-  
jun Yang. January: 35–44

## **Lidar — Terrestrial**

Assessment of Available Rangeland Woody  
Plant Biomass with a Terrestrial Lidar  
System. Nian-Wei Ku, Sorin C. Popescu,  
R. James Ansley, Humberto L. Perotto-  
Baldivieso, and Anthony M. Filippi.  
April: 349–361

Cell-based Automatic Deformation Com-  
putation by Analyzing Terrestrial Lidar  
Point Clouds. Jing Wu, Pierre-Yves  
Gilliéron, and Bertrand Merminod. April:  
317–329

Forward: Special Issue—Advances in  
Terrestrial Lidar Techniques and Ap-  
plications. Bruce King and Jonathan Li.  
March: 307–308

## **Linear algorithm**

Network Orientation Using the Scaled Or-  
thographic Projection for Parameter Ini-  
tialization. Keith F. Blonquist and Robert  
T. Pack. May: 505–517

## **Linear Map Accuracy Standard (LMAS)**

Mapping Matters. Qassim A. Abdullah. Au-  
gust: 784

## **Linear model**

An Empirical Model-based Method for Signal  
Restoration of SWIR in ASD Field Spec-  
roradiometry. Chinsu Lin, Khongor Tsogt,  
and Chein-I Chang. February: 119–127

## **LizardTech®**

LIZARDTECH ANNIVERSARY: Celebrat-  
ing 20 Years of Image Compression with  
MrSID. Kevin P. Corbley. September:  
909–911

## **Local matching**

Automatic Registration of High-Resolution  
Images Using Local Properties of Fea-  
tures. You Kyung Han, Young Gi Byun,  
Jae Wan Choi, Dong Yeob Han, and  
Yong Il Kim. March: 211–221

## **LOD model management approach**

An Efficient Point Cloud Management  
Method Based on a 3D R-Tree. Jun  
Gong, Qing Zhu, Ruofei Zhong, Yeting  
Zhang, and Xiao Xie. April: 373–381

# Subject Index

## Logarithm transformation

Assessment of Available Rangeland Woody Plant Biomass with a Terrestrial Lidar System. Nian-Wei Ku, Sorin C. Popescu, R. James Ansley, Humberto L. Perotto-Baldivieso, and Anthony M. Filippi. April: 349–361

## Logistic model (LOGM)

An Empirical Model-based Method for Signal Restoration of SWIR in ASD Field Spectroradiometry. Chinsu Lin, Khongor Tsogt, and Chein-I Chang. February: 119–127

## Low gradient terrain

A Comparison of SRTM V4 and ASTER GDEM for Hydrological Applications in Low Relief Terrain. Mariano Moreno-de las Heras, Patricia M. Saco, and Garry R. Willgoose. July: 757–766

## Low-resolution satellite imagery

Semi-automatic Quality Control of Topographic Data Sets. Petra Helmholz, Christian Becker, Uwe Breitkopf, Torsten Büschenfeld, Andreas Busch, Carola Braun, Dietmar Grünreich, Sönke Müller, Jörn Ostermann, Martin Pahl, Franz Rottensteiner, Karsten Vogt, Marcel Ziems, Christian Heipke. September: 959–972

## M

### Macedonia

Grids & Datums Column: Republic of Macedonia. Clifford J. Mugnier. May: 449–450

### Malaprabha basin

Mapping Crop Types, Irrigated Areas, and Cropping Intensities in Heterogeneous Landscapes of Southern India Using Multi-Temporal Medium-Resolution Imagery: Implications for Assessing Water Use in Agriculture. Elizabeth Heller, Jeanine M. Rhemtulla, Sharachchandra Lele, Margaret Kalacska, Shrinivas Badiger, Raja Sengupta, and Navin Ramanakutty. August: 815–827

### Mali

Mapping Fragmented Agricultural Systems in the Sudano-Sahelian Environments of Africa Using Random Forest and Ensemble Metrics of Coarse Resolution MODIS Imagery. Elodie Vintrou, Mamy Soumaré, Simon Bernard, Agnès Bégué,

Christian Baron, and Danny Lo Seen. August: 839–848

## Management Association for Private Photogrammetric Surveyors. See MAPPS

## Map design

Book review: Making Maps: A Visual Guide to Map Design for GIS (Second Edition) by Krygier, John and Wood, Denis. Reviewed by Crosby, Michael K. May: 453

## Mapping — Heterogeneous landscape

Incorporating the Downscaled Landsat TM Thermal Band in Land-cover Classification using Random Forest. V.F. Rodríguez-Galiano, B. Ghimire, E. Pardo-Igúzquiza, M. Chica-Olmo, and R.G. Congalton. February: 129–137

## Mapping history

Grids & Datums Column: Central African Republic. Clifford J. Mugnier. March: 192–194

Grids & Datums Column: Commonwealth of Dominica. Clifford J. Mugnier. April: 293

Grids & Datums Column: Georgia. Clifford J. Mugnier. June: 548

Grids & Datums Column: Maps in the Middle of Nowhere. Clifford J. Mugnier. October 1015

Mapping Western China at a Scale of 1:50,000. Jixian Zhang, Qin Yan, Wenhan Xie. April: 289–292

## Mapping — Wetlands

An Efficient Remote Sensing Solution to Update the NCWI. Beth R. Stein, Baojuan Zheng, Ioannis Kokkinidis, Nilam Kayastha, Taylor Seigler, Kemal Gökakaya, Ranjith Gopalakrishnan, Won Hoi Hwang. June: 537–547

## MAPPS

The MAPPS/ASPRS 2012 Specialty Conference on Emerging Mapping and Geospatial Technologies. July: 669, August: 896–898, September: 1000–1001

## Maps

Mapping Crop Types, Irrigated Areas, and Cropping Intensities in Heterogeneous Landscapes of Southern India Using Multi-Temporal Medium-Resolution Imagery: Implications for Assessing Water Use in Agriculture. Elizabeth Heller, Jeanine M. Rhemtulla, Sharachchandra Lele, Margaret Kalacska, Shrinivas Ba-

diger, Raja Sengupta, and Navin Raman-kutty. August: 815–827

## Maps — CHL

A Semi-Analytical Model for the Multitemporal Prediction of Chlorophyll-a in an Iowa Lake Using Hyperion Data. Ramanathan Sugumaran and Justin Thomas. December: 1253–1260

## Maps — Flood

Mapping Nighttime Flood from MODIS Observations Using Support Vector Machines. Rui Zhang, Donglian Sun, Yunyue Yu, and Mitchell D. Goldberg. November: 1151–1161

## Maps — Raster-based categorical

Error Propagation in Raster Data Integration: Impacts on Landscape Composition and Configuration. Zachary J. Christman and John Rogan. June: 617–624

## Maps — Tree crown

Automated Delineation of Individual Tree Crowns from Lidar Data by Multi-Scale Analysis and Segmentation. Linhai Jing, Baoxin Hu, Jili Li, and Thomas Noland. December: 1275–1284

## Marker-controlled watershed segmentation

Automated Delineation of Individual Tree Crowns from Lidar Data by Multi-Scale Analysis and Segmentation. Linhai Jing, Baoxin Hu, Jili Li, and Thomas Noland. December: 1275–1284

## Measurement errors

Development and Assessment of a Digital Stereo Photogrammetric System to Measure Cetaceans at Sea. Abraham Growcott, Pascal Sirguey, and Stephen M. Dawson. March: 237–246

A Webcam-based Photogrammetric System for the Measurement of Facial Landmarks on Newborns. Bruce King. December: 1285–1294

## Mesquite tree biomass

Assessment of Available Rangeland Woody Plant Biomass with a Terrestrial Lidar System. Nian-Wei Ku, Sorin C. Popescu, R. James Ansley, Humberto L. Perotto-Baldivieso, and Anthony M. Filippi. April: 349–361

## Meta-heuristic optimization algorithms

Determination of Optimum Classifier and Feature Subset in Hyperspectral Images based on Ant Colony System. Farhad Sa-

madzadegan, Hadiseh Hasani, and Toni Schenk. December: 1261–1273

## Meteosat second generation (MSG) satellites

Determining Irrigated Areas and Quantifying Blue Water Use in Europe Using Remote Sensing Meteosat Second Generation (MSG) products and Global Land Data Assimilation System (GLDAS) Data. Mireia Romaguera, Maarten S. Krol, Mhd. Suhyb Salama, Arjen Y. Hoekstra, and Zhongbo Su. August: 861–873

## Mexico

Grids & Datums Column: United Mexican States. Clifford J. Mugnier. November: 1115–1116

## Mines — Reclaimed coal

Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235

## Mirror panel slope error

Photogrammetric Monitoring of the Construction of a Solar Energy Dish Concentrator. M. R. Shortis and G. Burgess. May: 519–527

## Mobile GIS

*PE&RS* October 2013 Special Issue Call for Papers on. August: 789, October: 1068

## Mobile laser scanners

Calibration and Kinematic Analysis of the Velodyne HDL-64E S2 Lidar Sensor. Craig Glennie. April: 339–347

## Moderate Resolution Imaging Spectroradiometer (MODIS) — Applications

Mapping Fragmented Agricultural Systems in the Sudano-Sahelian Environments of Africa Using Random Forest and Ensemble Metrics of Coarse Resolution MODIS Imagery. Elodie Vintrou, Mamy Soumaré, Simon Bernard, Agnès Bégué, Christian Baron, and Danny Lo Seen. August: 839–848

Mapping Nighttime Flood from MODIS Observations Using Support Vector Machines. Rui Zhang, Donglian Sun, Yunyue Yu, and Mitchell D. Goldberg. November: 1151–1161

Phenology-based Crop Classification Algorithm and its Implications on Agricultural

Water Use Assessments in California's Central Valley. Liheng Zhong, Peng Gong, and Greg S. Biging. August: 799–813

A Shape-matching Cropping Index (CI) Mapping Method to Determine Agricultural Cropland Intensities in China using MODIS Time-series Data. Jianhong Liu, Wenquan Zhu, and Xuefeng Cui. August: 829–837

## Moderate Resolution Imaging Spectroradiometer (MODIS) — Imagery

Book review: Land Remote Sensing and Global Environmental Change: NASA's Earth Observing System and the Science of ASTER and MODIS by Ramachandran, Bhaskar, Justice, Christopher O., and Abrams, Michael J. Reviewed by Nguy-Robertson, Anthony L. January: 8, January: 11

Integration of Polarimetric Decomposition, Object-Oriented Image Analysis, and Decision Tree Algorithms for Land-Use and Land-Cover Classification using RADARSAT-2 Polarimetric SAR Data. Zhixin Qi, Anthony G.O. Yeh, Xia Li, and Zheng Lin. February: 169–181

## **Object-oriented land-use classification**

Detect Residential Buildings from Lidar and Aerial Photographs through Object-Oriented Land-Use Classification. Xuelian Meng, Nate Currit, Le Wang, and Xiaojun Yang. January: 35–44

## **Object recognition algorithm**

A Fusion Approach for Tree Crown Delineation from Lidar Data. Colin J. Gleason and Jungho Im. July: 679–692

## **Occlusion-free navigation — Interactive**

Automatic Generation of 2.5D Terrain Models without Occluding Routes of Interest. Hao Deng, Liqiang Zhang, Jingtao Ma, Liang Zhang, and Dong Chen. November: 1175–1185

## **Octree-based indexing**

Evaluating the Benefits of Octree-based Indexing for Lidar Data. Abu Saleh Mohammad Mosa, Bianca Schön, Michela Bertolotto, and Debra F. Laefer. September: 927–934

## **Octree data structure**

An Efficient Point Cloud Management Method Based on a 3D R-Tree. Jun Gong, Qing Zhu, Ruofei Zhong, Yeting Zhang, and Xiao Xie. April: 373–381

## **Oil mapping algorithm**

Operational Utilization of Aerial Multispectral Remote Sensing during Oil Spill Response: Lessons Learned During the Deepwater Horizon (MC-252) Spill. Jan Svejksky, William Lehr, Judd Muskat, George Graettinger, and Joseph Mullin. October: 1089–1102

## **Oil spill response**

Expanding the Utility of Remote Sensing Data for Oil Spill Response. Jan Svejksky and Mark Hess. October: 1011–1014  
Operational Utilization of Aerial Multispectral Remote Sensing during Oil Spill Response: Lessons Learned During the Deepwater Horizon (MC-252) Spill. Jan Svejksky, William Lehr, Judd Muskat, George Graettinger, and Joseph Mullin. October: 1089–1102

## **One-by-one (OBO) classification framework**

A Framework for Supervised Image Classification with Incomplete Training Samples. Qinghua Guo, Wenkai Li, Desheng Liu, and Jin Chen. June: 595–604

## **Ontario**

Automated Delineation of Individual Tree Crowns from Lidar Data by Multi-Scale Analysis and Segmentation. Linhai Jing, Baoxin Hu, Jili Li, and Thomas Noland. December: 1275–1284

## **Optical satellite data**

Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model

Improvement. Rupert Müller, Thomas Krauß, Mathias Schneider, and Peter Reinartz. January: 61–74

## **Optimization technique**

Integrating Landsat-7 Imagery with Physics-based Models for Quantitative Mapping of Coastal Waters near River Discharges. Nima Pahlevan, Alfred J. Garrett, Aaron D. Gerace, and John R. Schott. November: 1163–1174

## **Oracle Extensible Indexing Framework (OEIF)**

Evaluating the Benefits of Octree-based Indexing for Lidar Data. Abu Saleh Mohammad Mosa, Bianca Schön, Michela Bertolotto, and Debra F. Laefer. September: 927–934

## **Orinoco River basin**

Accuracy Assessment of Burned Area Products in the Orinoco Basin. Jesús A. Anaya and Emilio Chuvieco. January: 53–60

## **Orthographic projection — Scaled**

Network Orientation Using the Scaled Orthographic Projection for Parameter Initialization. Keith F. Blonquist and Robert T. Pack. May: 505–517

## **Orthorectified imagery**

Geopositioning Accuracy Assessment of GeoEye-1 Panchromatic and Multispectral Imagery. Manuel A. Aguilar, Fernando J. Aguilar, María del Mar Saldaña, and Ismael Fernández. March: 247–257  
Urban Tree Cover Mapping with Relief-corrected Aerial Imagery and Lidar. Brad Lehrbass and Jinfei Wang. May: 473–484

## **Outlier detection**

Registration of Multisource Satellite Images by Thin-plate Splines with Highly Reliable Conjugate Points. Joz Wu, Chi Chang, Hsien-Yu Tsai, and Ming-Che Liu. June: 583–593

## **Outlier-removal techniques**

Automated Georegistration of High-Resolution Satellite Imagery using a RPC Model with Airborne Lidar Information. Jaehong Oh, Changno Lee, Yangdam Eo, and James Bethel. October: 1045–1056

## P

### Pan-sharpening

Identification of Waste Tires Using High-Resolution Multispectral Satellite Imagery. Becky Lauren Quinlan and Patricia G. Foschi. May: 463–471

### Parameter estimation

Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model Improvement. Rupert Müller, Thomas Krauß, Mathias Schneider, and Peter Reinartz. January: 61–74

Calibration and Kinematic Analysis of the Velodyne HDL-64E S2 Lidar Sensor. Craig Glennie. April: 339–347

Cell-based Automatic Deformation Computation by Analyzing Terrestrial Lidar Point Clouds. Jing Wu, Pierre-Yves Gilliéron, and Bertrand Merminod. April: 317–329

Comparing the Performance of Empirical, Semi-empirical, and Curve Fitting Models in Predicting Cyanobacterial Pigments. A.L. Nguy-Robertson, L. Li, L. Tedesco, J. Wilson, and E. Soyeux. May: 485–494

Determination of Optimum Classifier and Feature Subset in Hyperspectral Images based on Ant Colony System. Farhad Samadzadegan, Hadiseh Hasani, and Toni Schenk. December: 1261–1273

Development and Assessment of a Digital Stereo Photogrammetric System to Measure Cetaceans at Sea. Abraham Growcott, Pascal Sirguey, and Stephen M. Dawson. March: 237–246

Integrated Global Navigation Satellite System (iGNSS) QoS Prediction. Duanguen Roongpiboonsopit and Hassan A. Karimi. February: 139–149

Integration of Remote Sensing and GIS for Evaluating Soil Erosion Risk in Northwestern Zhejiang, China. Jianqin Huang, Dengsheng Lu, Jin Li, Jiasen Wu, Shiquan Chen, Weiming Zhao, Hongli Ge, Xingzhao Huang, and Xiaojie Yan. September: 935–946

Network Orientation Using the Scaled Orthographic Projection for Parameter Initialization. Keith F. Blonquist and Robert T. Pack. May: 505–517

A Piecewise Catenary Curve Model Growing for 3D Power Line Reconstruction. Yoonseok Jwa and Gunho Sohn. December: 1227–1240

A Webcam-based Photogrammetric System

for the Measurement of Facial Landmarks on Newborns. Bruce King. December: 1285–1294

### Parameter estimation — Polarimetric

Integration of Polarimetric Decomposition, Object-Oriented Image Analysis, and Decision Tree Algorithms for Land-Use and Land-Cover Classification using RADARSAT-2 Polarimetric SAR Data. Zhixin Qi, Anthony G.O. Yeh, Xia Li, and Zheng Lin. February: 169–181

### Pareto boundary (PB)

Accuracy Assessment of Burned Area Products in the Orinoco Basin. Jesús A. Anaya and Emilio Chuvieco. January: 53–60

### Pauli decomposition

Integration of Polarimetric Decomposition, Object-Oriented Image Analysis, and Decision Tree Algorithms for Land-Use and Land-Cover Classification using RADARSAT-2 Polarimetric SAR Data. Zhixin Qi, Anthony G.O. Yeh, Xia Li, and Zheng Lin. February: 169–181

### Percent elevation index (PEI)

Application of Lidar Terrain Surfaces for Soil Moisture Modeling. Florence Margaret Southee, Paul M. Treitz, and Neal A. Scott. December: 1241–1251

### Percentile height statistics

Assessment of Available Rangeland Woody Plant Biomass with a Terrestrial Lidar System. Nian-Wei Ku, Sorin C. Popescu, R. James Ansley, Humberto L. Perotto-Baldivieso, and Anthony M. Filippi. April: 349–361

### Phenology-based classification (PBC) approach

Phenology-based Crop Classification Algorithm and its Implications on Agricultural Water Use Assessments in California's Central Valley. Liheng Zhong, Peng Gong, and Greg S. Biging. August: 799–813

### Photon counting lidar

Mapping Matters. Qassim A. Abdullah. July: 664–665

### Phycocyanin (PC)

Comparing the Performance of Empirical, Semi-empirical, and Curve Fitting Models in Predicting Cyanobacterial Pig-

ments. A.L. Nguy-Robertson, L. Li, L. Tedesco, J. Wilson, and E. Soyeux. May: 485–494

### Physics-based models

Integrating Landsat-7 Imagery with Physics-based Models for Quantitative Mapping of Coastal Waters near River Discharges. Nima Pahlevan, Alfred J. Garrett, Aaron D. Gerace, and John R. Schott. November: 1163–1174

### Physiological Principles Predicting Growth (3-PG) model

Improving Forest Growth Estimates Using a Bayesian Network Approach. Yaseen T. Mustafa, Alfred Stein, Valentyn A. Tolpekin, and Patrick E. Van Laake. January: 45–51

### Picea abies

A Fusion Approach for Tree Crown Delineation from Lidar Data. Colin J. Gleason and Jungho Im. July: 679–692

### Point clouds

An Efficient Point Cloud Management Method Based on a 3D R-Tree. Jun Gong, Qing Zhu, Ruofei Zhong, Yeting Zhang, and Xiao Xie. April: 373–381

Assessment of Available Rangeland Woody Plant Biomass with a Terrestrial Lidar System. Nian-Wei Ku, Sorin C. Popescu, R. James Ansley, Humberto L. Perotto-Baldivieso, and Anthony M. Filippi. April: 349–361

Laser Scanning in Heritage Documentation: The Scanning Pipeline and its Challenges. Heinz Rüther, Roshan Bhurtha, Christoph Held, Ralph Schröder, and Stephen Wessels. April: 309–316

A New Method for Segmenting Individual Trees from the Lidar Point Cloud. Wenkai Li, Qinghua Guo, Marek K. Jakubowski, and Maggi Kelly. January: 75–84

### Point clouds — Mobile

Automated Extraction of Road Markings from Mobile Lidar Point Clouds. Bisheng Yang, Lina Fang, Qingquan Li, and Jonathan Li. April: 331–338

### Point Data Record Formats (PDRF)

The LAS 1.4 Specification. Lewis Graham. February: 93–102

### Point filtering

Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model Improvement. Rupert Müller, Thomas

Krauß, Mathias Schneider, and Peter Reinartz. January: 61–74

## Point splitting

Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model Improvement. Rupert Müller, Thomas Krauß, Mathias Schneider, and Peter Reinartz. January: 61–74

## Polarimetric decomposition

Integration of Polarimetric Decomposition, Object-Oriented Image Analysis, and Decision Tree Algorithms for Land-Use and Land-Cover Classification using RADARSAT-2 Polarimetric SAR Data. Zhixin Qi, Anthony G.O. Yeh, Xia Li, and Zheng Lin. February: 169–181

## Polarimetric SAR (POLSAR) data

Integration of Polarimetric Decomposition, Object-Oriented Image Analysis, and Decision Tree Algorithms for Land-Use and Land-Cover Classification using RADARSAT-2 Polarimetric SAR Data. Zhixin Qi, Anthony G.O. Yeh, Xia Li, and Zheng Lin. February: 169–181

## Polynomial approximation

A Flexible Mathematical Method for Camera Calibration in Digital Aerial Photogrammetry. Rongfu Tang, Dieter Fritsch, Michael Cramer, and Werner Schneider. October: 1069–1077

## Population estimation studies

GeoEye Imagery and Lidar Technology for Small-area Population Estimation: An Epidemiological Viewpoint. Erika Upegui and Jean-François Viel. July: 693–702

## Position and orientation system (POS) integrated BBA

Bundle Block Adjustment of Weakly Connected Aerial Imagery. Yongjun Zhang, Xiaodong Xiong, Xiang Shen, and Zheng Ji. September: 983–988

## Positioning quality

Integrated Global Navigation Satellite System (iGNSS) QoS Prediction. Duangduen Roongpiboonsopit and Hassan A. Karimi. February: 139–149

## Power line model – Three-dimensional

A Piecewise Catenary Curve Model Growing for 3D Power Line Reconstruction.

Yoonseok Jwa and Gunho Sohn. December: 1227–1240

## Principal component analysis (PCA)

Elevation, Latitude/Longitude Decorrelation Stretch of Multitemporal LST Imagery. George Ch. Miliareisis. February: 151–160

Estimating Urban Leaf Area Index (LAI) of Individual Trees with Hyperspectral Data. Ryan R. Jensen, Perry J. Hardin, and Andrew J. Hardin. May: 495–504

Seasonal Variation in Land-Cover Classification Accuracy in a Diverse Region. Priyakant Sinha, Lalit Kumar, and Nick Reid. March: 271–280

## Q

### Quadratic b-splines

Computing Non-Crossing Smooth Contours on Triangulated Meshes. Yurai Núñez-Rodríguez, Michael A. Johnson, Igor Raskin, and Jesse L. Thé. July: 703–714

### Quality control – Semi-automatic

Semi-automatic Quality Control of Topographic Data Sets. Petra Helmholz, Christian Becker, Uwe Breikopf, Torsten Büschenfeld, Andreas Busch, Carola Braun, Dietmar Grünreich, Sönke Müller, Jörn Ostermann, Martin Pahl, Franz Rottensteiner, Karsten Vogt, Marcel Ziem, Christian Heipke. September: 959–972

### Quality of service (QoS) prediction

Integrated Global Navigation Satellite System (iGNSS) QoS Prediction. Duangduen Roongpiboonsopit and Hassan A. Karimi. February: 139–149

### QuickBird – Applications

Integrating Remote Sensing and Wavelet Analysis for Studying Fine-scaled Vegetation Spatial Variation among Three Different Ecosystems. Yuhong He, Anum Khan, and Amy Mui. February: 161–168

Registration of Multisource Satellite Images by Thin-plate Splines with Highly Reliable Conjugate Points. Joz Wu, Chi Chang, Hsien-Yu Tsai, and Ming-Che Liu. June: 583–593

### QuickBird – Imagery

Identification of Waste Tires Using High-Resolution Multispectral Satellite Imagery. Becky Lauren Quinlan and Patricia G. Foschi. May: 463–471

Objects-based Image Analysis for Mapping Natura 2000 Habitats to Improve Forest Management. Ana Hernando, Lara A. Arroyo, Javier Velázquez, Rosario Tejera. September: 991–999

A Supervised and Fuzzy-based Approach to Determine Optimal Multi-resolution Image Segmentation Parameters. Hengjian Tong, Travis Maxwell, Yun Zhang, and Vivek Dey. October: 1029–1044

## R

### Radar data

An Efficient Remote Sensing Solution to Update the NCWI. Beth R. Stein, Baojuan Zheng, Ioannis Kokkinidis, Nilam Kayastha, Taylor Seigler, Kemal Gök-kaya, Ranjith Gopalakrishnan, Won Hoi Hwang. June: 537–547

### RADARSAT-2

Integration of Polarimetric Decomposition, Object-Oriented Image Analysis, and Decision Tree Algorithms for Land-Use and Land-Cover Classification using RADARSAT-2 Polarimetric SAR Data. Zhixin Qi, Anthony G.O. Yeh, Xia Li, and Zheng Lin. February: 169–181

### Rainfall conditions

Seasonal Variation in Land-Cover Classification Accuracy in a Diverse Region. Priyakant Sinha, Lalit Kumar, and Nick Reid. March: 271–280

### Random Forest (RF) modeling technique

Incorporating the Downscaled Landsat TM Thermal Band in Land-cover Classification using Random Forest. V.F. Rodríguez-Galiano, B. Ghimire, E. Pardo-Igúzquiza, M. Chica-Olmo, and R.G. Congalton. February: 129–137

Mapping Fragmented Agricultural Systems in the Sudano-Sahelian Environments of Africa Using Random Forest and Ensemble Metrics of Coarse Resolution MODIS Imagery. Elodie Vintrou, Mamy Soumaré, Simon Bernard, Agnès Bégué, Christian Baron, and Danny Lo Seen. August: 839–848

Modeling Percent Tree Canopy Cover: A Pilot Study. John W. Coulston, Gretchen G. Moisen, Barry T. Wilson, Mark V. Finco, Warren B. Cohen, and C. Kenneth Brewer. July: 715–727

# Subject Index

## Rangelands

Assessment of Available Rangeland Woody Plant Biomass with a Terrestrial Lidar System. Nian-Wei Ku, Sorin C. Popescu, R. James Ansley, Humberto L. Perotto-Baldivieso, and Anthony M. Filippi. April: 349–361

## RANSAC (Random Sample Consensus) algorithm

Registration of Multisource Satellite Images by Thin-plate Splines with Highly Reliable Conjugate Points. Joz Wu, Chi Chang, Hsien-Yu Tsai, and Ming-Che Liu. June: 583–593

## Raster data transformation

Error Propagation in Raster Data Integration: Impacts on Landscape Composition and Configuration. Zachary J. Christman and John Rogan. June: 617–624

## Rational polynomial coefficient (RPC) model

Automated Georegistration of High-Resolution Satellite Imagery using a RPC Model with Airborne Lidar Information. Jaehong Oh, Changno Lee, Yangdam Eo, and James Bethel. October: 1045–1056

## Rayleigh scattering

A Variational Gradient-based Fusion Method for Visible and SWIR Imagery. Huifang Li, Liangpei Zhang, Huanfeng Shen, and Pingxiang Li. September: 947–958

## Reclamation

Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235

## Reflectance spectra

An Empirical Model-based Method for Signal Restoration of SWIR in ASD Field Spectroradiometry. Chinsu Lin, Khongor Tsogt, and Chein-I Chang. February: 119–127

A Comparison of Multispectral ASTER and Hyperspectral AVIRIS Multiple End-member Spectral Mixture Analysis for Sagebrush and Herbaceous Cover in Yellowstone. Stacey Fairweather, Christopher Potter, Robert Crabtree, and Shuang Li. January: 23–33

## Regional monitoring

Topographic Corrections of Satellite Data for Regional Monitoring. Sarah C. Goslee. September: 973–981

## Regression analysis

Modeling Riparian Zones Utilizing DEMS and Flood Height Data. Sinan A. Abood, Ann L. Maclean, and Lacey A. Mason. March: 259–269

Topographic Corrections of Satellite Data for Regional Monitoring. Sarah C. Goslee. September: 973–981

## Regression analysis — Linear

Application of Lidar Terrain Surfaces for Soil Moisture Modeling. Florence Margaret Southee, Paul M. Treitz, and Neal A. Scott. December: 1241–1251

Elevation, Latitude/Longitude Decorrelation Stretch of Multitemporal LST Imagery. George Ch. Miliareisis. February: 151–160

## Regression models

An Empirical Model-based Method for Signal Restoration of SWIR in ASD Field Spectroradiometry. Chinsu Lin, Khongor Tsogt, and Chein-I Chang. February: 119–127

Assessment of Available Rangeland Woody Plant Biomass with a Terrestrial Lidar System. Nian-Wei Ku, Sorin C. Popescu, R. James Ansley, Humberto L. Perotto-Baldivieso, and Anthony M. Filippi. April: 349–361

## Regression models — Linear

Elevation, Latitude/Longitude Decorrelation Stretch of Multitemporal LST Imagery. George Ch. Miliareisis. February: 151–160

A Semi-Analytical Model for the Multitemporal Prediction of Chlorophyll-a in an Iowa Lake Using Hyperion Data. Ramanathan Sugumaran and Justin Thomas. December: 1253–1260

## Regression models — Multiple

Estimating Urban Leaf Area Index (LAI) of Individual Trees with Hyperspectral Data. Ryan R. Jensen, Perry J. Hardin, and Andrew J. Hardin. May: 495–504

Integration of Remote Sensing and GIS for Evaluating Soil Erosion Risk in Northwestern Zhejiang, China. Jianqin Huang, Dengsheng Lu, Jin Li, Jiasen Wu, Shiquan Chen, Weiming Zhao, Hongli Ge, Xingzhao Huang, and Xiaojie Yan. September: 935–946

## Relative edge cross correlation (RECC)

Automated Georegistration of High-Resolution Satellite Imagery using a RPC Model with Airborne Lidar Information. Jaehong Oh, Changno Lee, Yangdam Eo, and James Bethel. October: 1045–1056

## Relief-corrected multispectral aerial imagery

Urban Tree Cover Mapping with Relief-corrected Aerial Imagery and Lidar. Brad Lehrbass and Jinfei Wang. May: 473–484

## Relief displacement measurement

Urban Tree Cover Mapping with Relief-corrected Aerial Imagery and Lidar. Brad Lehrbass and Jinfei Wang. May: 473–484

## Remote sensing

# Subject Index

## Rocks — In-stream

Terrestrial Laser Scanning for Delineating In-stream Boulders and Quantifying Habitat Complexity Measures. Jonathan P. Resop, Jessica L. Kozarek, and W. Cully Hession. April: 363–371

## R-Tree data structure

An Efficient Point Cloud Management Method Based on a 3D R-Tree. Jun Gong, Qing Zhu, Ruofei Zhong, Yeting Zhang, and Xiao Xie. April: 373–381

## r-tree index

Evaluating the Benefits of Octree-based Indexing for Lidar Data. Abu Saleh Mohammad Mosa, Bianca Schön, Michela Bertolotto, and Debra F. Laefer. September: 927–934

## Rule-based procedure

Building Detection in Complex Scenes Thorough Effective Separation of Buildings from Trees. Mohammad Awrangjeb, Chunsun Zhang, and Clive S. Fraser. July: 729–745

## S

## Sagebrush cover

A Comparison of Multispectral ASTER and Hyperspectral AVIRIS Multiple End-member Spectral Mixture Analysis for Sagebrush and Herbaceous Cover in Yellowstone. Stacey Fairweather, Christopher Potter, Robert Crabtree, and Shuang Li. January: 23–33

## Satellite data processing

Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model Improvement. Rupert Müller, Thomas Krauß, Mathias Schneider, and Peter Reinartz. January: 61–74

## Satellite imagery

GeoEye Imagery and Lidar Technology for Small-area Population Estimation: An Epidemiological Viewpoint. Erika Upegui and Jean-François Viel. July: 693–702

Topographic Corrections of Satellite Data for Regional Monitoring. Sarah C. Goslee. September: 973–981

## Satellite imagery — Multisource

Registration of Multisource Satellite Images by Thin-plate Splines with Highly Reliable Conjugate Points. Joz Wu, Chi

Chang, Hsien-Yu Tsai, and Ming-Che Liu. June: 583–593

## Savanna ecosystem

Accuracy Assessment of Burned Area Products in the Orinoco Basin. Jesús A. Anaya and Emilio Chuvieco. January: 53–60

## Scale-invariant feature transform (SIFT) algorithm

Automatic Registration of High-Resolution Images Using Local Properties of Features. You Kyung Han, Young Gi Byun, Jae Wan Choi, Dong Yeob Han, and Yong Il Kim. March: 211–221

Registration of Multisource Satellite Images by Thin-plate Splines with Highly Reliable Conjugate Points. Joz Wu, Chi Chang, Hsien-Yu Tsai, and Ming-Che Liu. June: 583–593

## Scanner calibration

Calibration and Kinematic Analysis of the Velodyne HDL-64E S2 Lidar Sensor. Craig Glennie. April: 339–347

## Sea

Development and Assessment of a Digital Stereo Photogrammetric System to Measure Cetaceans at Sea. Abraham Growcott, Pascal Sirguey, and Stephen M. Dawson. March: 237–246

## Seafloor classification — Semi-automated

Neuro-fuzzy Classification of Submarine Lava Flow Morphology. J. Timothy McClinton, Scott M. White, and John M. Sinton. June: 605–616

## Seamline networks

Aerial Image Mosaicking with the Aid of Vector Roads. Dongliang Wang, Youchuan Wan, Jianhua Xiao, Xudong Lai, Wenli Huang, and Jingzhong Xu. November: 1141–1150

## Seasonal spectral variability

Seasonal Variation in Land-Cover Classification Accuracy in a Diverse Region. Priyakant Sinha, Lalit Kumar, and Nick Reid. March: 271–280

## Selective variance reduction (SVR)

Elevation, Latitude/Longitude Decorrelation Stretch of Multitemporal LST Imagery. George Ch. Miliareisis. February: 151–160

## Semi-arid sagebrush regions

A Comparison of Multispectral ASTER and Hyperspectral AVIRIS Multiple End-

member Spectral Mixture Analysis for Sagebrush and Herbaceous Cover in Yellowstone. Stacey Fairweather, Christopher Potter, Robert Crabtree, and Shuang Li. January: 23–33

## Semi-empirical algorithms

Comparing the Performance of Empirical, Semi-empirical, and Curve Fitting Models in Predicting Cyanobacterial Pigments. A.L. Nguy-Robertson, L. Li, L. Tedesco, J. Wilson, and E. Soyeux. May: 485–494

## Sensitivity analysis

Modeling Riparian Zones Utilizing DEMS and Flood Height Data. Sinan A. Abood, Ann L. Maclean, and Lacey A. Mason. March: 259–269

Neuro-fuzzy Classification of Submarine Lava Flow Morphology. J. Timothy McClinton, Scott M. White, and John M. Sinton. June: 605–616

Terrestrial Laser Scanning for Delineating In-stream Boulders and Quantifying Habitat Complexity Measures. Jonathan P. Resop, Jessica L. Kozarek, and W. Cully Hession. April: 363–371

## Sensor model parameters

Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model Improvement. Rupert Müller, Thomas Krauß, Mathias Schneider, and Peter Reinartz. January: 61–74

## Sensor models

Geopositioning Accuracy Assessment of GeoEye-1 Panchromatic and Multispectral Imagery. Manuel A. Aguilar, Fernando J. Aguilar, María del Mar Saldaña, and Ismael Fernández. March: 247–257

## Sensor orientation

Geopositioning Accuracy Assessment of GeoEye-1 Panchromatic and Multispectral Imagery. Manuel A. Aguilar, Fernando J. Aguilar, María del Mar Saldaña, and Ismael Fernández. March: 247–257

Mapping Matters. Qassim A. Abdullah. August: 784

## SG4 jig photogrammetry

Photogrammetric Monitoring of the Construction of a Solar Energy Dish Concentrator. M. R. Shortis and G. Burgess. May: 519–527

## Shape-matching method

A Shape-matching Cropping Index (CI) Mapping Method to Determine Agricultural Cropland Intensities in China using MODIS Time-series Data. Jianhong Liu, Wenquan Zhu, and Xuefeng Cui. August: 829–837

## Short-wave infrared (SWIR) imagery

A Variational Gradient-based Fusion Method for Visible and SWIR Imagery. Huifang Li, Liangpei Zhang, Huanfeng Shen, and Pingxiang Li. September: 947–958

## Shortwave infrared (SWIR) water absorption

An Empirical Model-based Method for Signal Restoration of SWIR in ASD Field Spectroradiometry. Chinsu Lin, Khongor Tsogt, and Chein-I Chang. February: 119–127

## Shuttle Radar Topography Mission elevation model (SRTM V4)

A Comparison of SRTM V4 and ASTER GDEM for Hydrological Applications in Low Relief Terrain. Mariano Moreno-de las Heras, Patricia M. Saco, and Garry R. Willgoose. July: 757–766

## Side-scan sonar backscatter imagery

Neuro-fuzzy Classification of Submarine Lava Flow Morphology. J. Timothy McClinton, Scott M. White, and John M. Sinton. June: 605–616

## Sierra Leone

Grids & Datums column: Republic of Sierra Leone. Clifford J. Mugnier. February: 103

## Sierra Nevada Mountains

A New Method for Segmenting Individual Trees from the Lidar Point Cloud. Wenkai Li, Qinghua Guo, Marek K. Jakubowski, and Maggi Kelly. January: 75–84

## Sigmoid model (SIGM)

An Empirical Model-based Method for Signal Restoration of SWIR in ASD Field Spectroradiometry. Chinsu Lin, Khongor Tsogt, and Chein-I Chang. February: 119–127

## Signal echo digitizing

Mapping Matters. Qassim A. Abdullah. February: 105–108

## Signal propagation models

Integrated Global Navigation Satellite System (iGNSS) QoS Prediction. Duangduen Roongpiboonsopit and Hassan A. Karimi. February: 139–149

## Signal-to-noise ratio (SNR)

An Empirical Model-based Method for Signal Restoration of SWIR in ASD Field Spectroradiometry. Chinsu Lin, Khongor Tsogt, and Chein-I Chang. February: 119–127

## Simple band ratio algorithms

Comparing the Performance of Empirical, Semi-empirical, and Curve Fitting Models in Predicting Cyanobacterial Pigments. A.L. Nguy-Robertson, L. Li, L. Tedesco, J. Wilson, and E. Soyeux. May: 485–494

## Simplified remote sensing of evapotranspiration (S-RESET) model

Estimating Irrigated Agricultural Water Use through Landsat TM and a Simplified Surface Energy Balance Modeling in the Semi-arid Environments of Arizona. Shai Kaplan and Soe W. Myint. August: 849–859

## Simulated annealing (SA)

Determination of Optimum Classifier and Feature Subset in Hyperspectral Images based on Ant Colony System. Farhad Samadzadegan, Hadiseh Hasani, and Toni Schenk. December: 1261–1273

## Single-imagery studies

Mapping Crop Types, Irrigated Areas, and Cropping Intensities in Heterogeneous Landscapes of Southern India Using Multi-Temporal Medium-Resolution Imagery: Implications for Assessing Water Use in Agriculture. Elizabeth Heller, Jeanine M. Rhemtulla, Sharachandra Lele, Margaret Kalacska, Shrinivas Badiger, Raja Sengupta, and Navin Ramanakutty. August: 815–827

## Small footprint discrete return airborne lidar point cloud

A New Method for Segmenting Individual Trees from the Lidar Point Cloud. Wenkai Li, Qinghua Guo, Marek K. Jakubowski, and Maggi Kelly. January: 75–84

## Softwares

An Era of Epochs. Karen Richardson. September: 905–908

Development and Assessment of a Digital Stereo Photogrammetric System to Measure Cetaceans at Sea. Abraham Growcott, Pascal Sirguy, and Stephen M. Dawson. March: 237–246

## Soil erosion

Integration of Remote Sensing and GIS for Evaluating Soil Erosion Risk in Northwestern Zhejiang, China. Jianqin Huang, Dengsheng Lu, Jin Li, Jiasen Wu, Shiquan Chen, Weiming Zhao, Hongli Ge, Xingzhao Huang, and Xiaojie Yan. September: 935–946

## Soil moisture modeling

Application of Lidar Terrain Surfaces for Soil Moisture Modeling. Florence Margaret Southee, Paul M. Treitz, and Neal A. Scott. December: 1241–1251

## Solar energy dish concentrator

Photogrammetric Monitoring of the Construction of a Solar Energy Dish Concentrator. M. R. Shortis and G. Burgess. May: 519–527

## South Africa

Grids & Datums Column: Republic of South Africa. Clifford J. Mugnier. September: 912–914

## Southern India

Mapping Crop Types, Irrigated Areas, and Cropping Intensities in Heterogeneous Landscapes of Southern India Using Multi-Temporal Medium-Resolution Imagery: Implications for Assessing Water Use in Agriculture. Elizabeth Heller, Jeanine M. Rhemtulla, Sharachandra Lele, Margaret Kalacska, Shrinivas Badiger, Raja Sengupta, and Navin Ramanakutty. August: 815–827

## Spain

Incorporating the Downscaled Landsat TM Thermal Band in Land-cover Classification using Random Forest. V.F. Rodríguez-Galiano, B. Ghimire, E. Pardo-Igúzquiza, M. Chica-Olmo, and R.G. Congalton. February: 129–137

## Spatial analysis

Improving Forest Growth Estimates Using a Bayesian Network Approach. Yaseen T. Mustafa, Alfred Stein, Valentyn A. Tolpekin, and Patrick E. Van Laake. January: 45–51

# Subject Index

## **Spatial Database Management System (SDBMS)**

Evaluating the Benefits of Octree-based Indexing for Lidar Data. Abu Saleh Mohammad Mosa, Bianca Schön, Michela Bertolotto, and Debra F. Laefer. September: 927–934

## **Spatial distance**

Automatic Registration of High-Resolution Images Using Local Properties of Features. You Kyung Han, Young Gi Byun, Jae Wan Choi, Dong Yeob Han, and Yong Il Kim. March: 211–221

## **Spatial distribution**

Elevation, Latitude/Longitude Decorrelation Stretch of Multitemporal LST Imagery. George Ch. Miliareisis. February: 151–160

## **Spatial enhancement**

A Variational Gradient-based Fusion Method for Visible and SWIR Imagery. Huifang Li, Liangpei Zhang, Huanfeng Shen, and Pingxiang Li. September: 947–958

## **Spatial information**

An Efficient Remote Sensing Solution to Update the NCWI. Beth R. Stein, Baojuan Zheng, Ioannis Kokkinidis, Nilam Kayastha, Taylor Seigler, Kemal Gök-kaya, Ranjith Gopalakrishnan, Won Hoi Hwang. June: 537–547

Tree Topology Representation from TLS Point Clouds Using Depth-First Search in Voxel Space. Anita Schilling, Anja Schmidt, and Hans-Gerd Maas. April: 383–392

## **Spatial resolution**

Incorporating the Downscaled Landsat TM Thermal Band in Land-cover Classification using Random Forest. V.F. Rodríguez-Galiano, B. Ghimire, E. Pardo-Igúzquiza, M. Chica-Olmo, and R.G. Congalton. February: 129–137

Integrating Remote Sensing and Wavelet Analysis for Studying Fine-scaled Vegetation Spatial Variation among Three Different Ecosystems. Yuhong He, Anum Khan, and Amy Mui. February: 161–168

## **Spatial resolution imagery**

Spatial Resolution Imagery Requirements for Identifying Structure Damage in a Hurricane Disaster: A Cognitive Approach. Sarah E. Battersby, Michael

E. Hodgson, and Jiayu Wang. June: 625–635

## **Spatial statistics**

Book review: Spatial Statistics: Geospatial Information Modeling and Thematic Mapping by Mohammed A. Kalkhan. Reviewed by Kar, Bandana. September: 915–916

## **Spectral indices**

Comparing the Performance of Empirical, Semi-empirical, and Curve Fitting Models in Predicting Cyanobacterial Pigments. A.L. Nguy-Robertson, L. Li, L. Tedesco, J. Wilson, and E. Soyeux. May: 485–494

Estimating Urban Leaf Area Index (LAI) of Individual Trees with Hyperspectral Data. Ryan R. Jensen, Perry J. Hardin, and Andrew J. Hardin. May: 495–504

## **Spectral information**

Urban Tree Cover Mapping with Relief-corrected Aerial Imagery and Lidar. Brad Lehrbass and Jinfei Wang. May: 473–484

## **Spectral mixture analysis (SMA)**

A Comparison of Multispectral ASTER and Hyperspectral AVIRIS Multiple End-member Spectral Mixture Analysis for Sagebrush and Herbaceous Cover in Yellowstone. Stacey Fairweather, Christopher Potter, Robert Crabtree, and Shuang Li. January: 23–33

## **Sperm whales**

Development and Assessment of a Digital Stereo Photogrammetric System to Measure Cetaceans at Sea. Abraham Growcott, Pascal Sirguey, and Stephen M. Dawson. March: 237–246

## **“Split-detect-merge” procedure**

Cell-based Automatic Deformation Computation by Analyzing Terrestrial Lidar Point Clouds. Jing Wu, Pierre-Yves Gilliéron, and Bertrand Merminod. April: 317–329

## **SPOT-5 sensor**

Registration of Multisource Satellite Images by Thin-plate Splines with Highly Reliable Conjugate Points. Joz Wu, Chi Chang, Hsien-Yu Tsai, and Ming-Che Liu. June: 583–593

## **Spruce plantation**

A Fusion Approach for Tree Crown Delineation from Lidar Data. Colin J. Gleason and Jungho Im. July: 679–692

## **Stochastic constrained non-linear adjustment method**

A Piecewise Catenary Curve Model Growing for 3D Power Line Reconstruction. Yoonseok Jwa and Gunho Sohn. December: 1227–1240

## **Structure damage — Residential**

Spatial Resolution Imagery Requirements for Identifying Structure Damage in a Hurricane Disaster: A Cognitive Approach. Sarah E. Battersby, Michael E. Hodgson, and Jiayu Wang. June: 625–635

## **Sudano-Sahelian environment**

Mapping Fragmented Agricultural Systems in the Sudano-Sahelian Environments of Africa Using Random Forest and Ensemble Metrics of Coarse Resolution MODIS Imagery. Elodie Vintrou, Mamy Soumaré, Simon Bernard, Agnès Bégué, Christian Baron, and Danny Lo Seen. August: 839–848

## **Supervised approach**

A Supervised and Fuzzy-based Approach to Determine Optimal Multi-resolution Image Segmentation Parameters. Hengjian Tong, Travis Maxwell, Yun Zhang, and Vivek Dey. October: 1029–1044

## **Support vector machines (SVM)**

Determination of Optimum Classifier and Feature Subset in Hyperspectral Images based on Ant Colony System. Farhad Samadzadegan, Hadiseh Hasani, and Toni Schenk. December: 1261–1273

Mapping Nighttime Flood from MODIS Observations Using Support Vector Machines. Rui Zhang, Donglian Sun, Yunyue Yu, and Mitchell D. Goldberg. November: 1151–1161

## **Surface reconstruction**

Laser Scanning in Heritage Documentation: The Scanning Pipeline and its Challenges. Heinz Rütther, Roshan Bhurtha, Christoph Held, Ralph Schröder, and Stephen Wessels. April: 309–316

## **Synthetic aperture radar (SAR) imaging**

Operational Utilization of Aerial Multispectral Remote Sensing during Oil Spill

Response: Lessons Learned During the Deepwater Horizon (MC-252) Spill. Jan Svejkovsky, William Lehr, Judd Muskat, George Graettinger, and Joseph Mullin. October: 1089–1102

Registration of Multisource Satellite Images by Thin-plate Splines with Highly Reliable Conjugate Points. Joz Wu, Chi Chang, Hsien-Yu Tsai, and Ming-Che Liu. June: 583–593

### **Synthetic image network**

Network Orientation Using the Scaled Orthographic Projection for Parameter Initialization. Keith F. Blonquist and Robert T. Pack. May: 505–517

## **T**

### **Tasseled cap greenness/brightness index (TC G/B)**

Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235

### **Tasseled Cap (TC) transformation**

Seasonal Variation in Land-Cover Classification Accuracy in a Diverse Region. Priyakant Sinha, Lalit Kumar, and Nick Reid. March: 271–280

### **Technical certification. See Certification** **Technical innovation**

Mapping Western China at a Scale of 1:50,000. Jixian Zhang, Qin Yan, Wenhao Xie. April: 289–292

### **Terrain indices**

Application of Lidar Terrain Surfaces for Soil Moisture Modeling. Florence Margaret Southee, Paul M. Treitz, and Neal A. Scott. December: 1241–1251

### **Terrain models**

Automatic Generation of 2.5D Terrain Models without Occluding Routes of Interest. Hao Deng, Liqiang Zhang, Jingtao Ma, Liang Zhang, and Dong Chen. November: 1175–1185

### **Terrestrial laser scanner (TLS)**

Terrestrial Laser Scanning for Delineating In-stream Boulders and Quantifying Habitat Complexity Measures. Jonathan P. Resop, Jessica L. Kozarek, and W. Cully Hession. April: 363–371

Tree Topology Representation from TLS Point Clouds Using Depth-First Search in Voxel Space. Anita Schilling, Anja Schmidt, and Hans-Gerd Maas. April: 383–392

### **Terrestrial monitoring and mapping**

Development of an Advanced Global Field Survey System (GFSS) for Terrestrial Monitoring and Mapping with a Demonstration for Agricultural Cropland Mapping in Asia. An Ngoc Van, Kyaw Sann Oo, and Wataru Takeuchi. August: 875–884

### **Texture metrics**

Mapping Fragmented Agricultural Systems in the Sudano-Sahelian Environments of Africa Using Random Forest and Ensemble Metrics of Coarse Resolution MODIS Imagery. Elodie Vintrou, Mamy Soumaré, Simon Bernard, Agnès Bégué, Christian Baron, and Danny Lo Seen. August: 839–848

### **Texturing**

Laser Scanning in Heritage Documentation: The Scanning Pipeline and its Challenges. Heinz Rütger, Roshan Bhurtha, Christoph Held, Ralph Schröder, and Stephen Wessels. April: 309–316

### **Thermal imagery**

Expanding the Utility of Remote Sensing Data for Oil Spill Response. Jan Svejkovsky and Mark Hess. October: 1011–1014

Operational Utilization of Aerial Multispectral Remote Sensing during Oil Spill Response: Lessons Learned During the Deepwater Horizon (MC-252) Spill. Jan Svejkovsky, William Lehr, Judd Muskat, George Graettinger, and Joseph Mullin. October: 1089–1102

### **Thin-plate spline interpolation**

Registration of Multisource Satellite Images by Thin-plate Splines with Highly Reliable Conjugate Points. Joz Wu, Chi Chang, Hsien-Yu Tsai, and Ming-Che Liu. June: 583–593

### **Three-dimensional data**

Assessment of Available Rangeland Woody Plant Biomass with a Terrestrial Lidar System. Nian-Wei Ku, Sorin C. Popescu, R. James Ansley, Humberto L. Perotto-Baldivieso, and Anthony M. Filippi. April: 349–361

Breaklines and Lidar Data. Lewis Graham. March: 189–191

Evaluating the Benefits of Octree-based Indexing for Lidar Data. Abu Saleh Mohammad Mosa, Bianca Schön, Michela Bertolotto, and Debra F. Laefer. September: 927–934

Integrating Landsat-7 Imagery with Physics-based Models for Quantitative Mapping of Coastal Waters near River Discharges. Nima Pahlevan, Alfred J. Garrett, Aaron D. Gerace, and John R. Schott. November: 1163–1174

Mapping Matters. Qassim A. Abdullah. November: 1117

A Piecewise Catenary Curve Model Growing for 3D Power Line Reconstruction. Yoonseok Jwa and Gunho Sohn. December: 1227–1240

### **Time-series data**

Application of Time Series Landsat Images to Examining Land-use/Land-cover Dynamic Change. Dengsheng Lu, Scott Hetrick, Emilio Moran, and Guiying Li. July: 747–755

A Shape-matching Cropping Index (CI) Mapping Method to Determine Agricultural Cropland Intensities in China using MODIS Time-series Data. Jianhong Liu, Wenquan Zhu, and Xuefeng Cui. August: 829–837

### **TIR (Thermal Infrared) band**

Incorporating the Downscaled Landsat TM Thermal Band in Land-cover Classification using Random Forest. V.F. Rodríguez-Galiano, B. Ghimire, E. Pardo-Igúzquiza, M. Chica-Olmo, and R.G. Congalton. February: 129–137

### **Tire Identification from Reflectance (TIRe) model**

Identification of Waste Tires Using High-Resolution Multispectral Satellite Imagery. Becky Lauren Quinlan and Patricia G. Foschi. May: 463–471

### **Topographic correction methods**

Topographic Corrections of Satellite Data for Regional Monitoring. Sarah C. Goslee. September: 973–981

### **Topographic geo-spatial data**

Semi-automatic Quality Control of Topographic Data Sets. Petra Helmholtz, Christian Becker, Uwe Breitkopf, Torsten Büschenfeld, Andreas Busch, Carola Braun, Dietmar Grünreich, Sönke Mül-

# Subject Index

ler, Jörn Ostermann, Martin Pahl, Franz Rottensteiner, Karsten Vogt, Marcel Ziem, Christian Heipke. September: 959–972

## Topographic mapping

Bundle Block Adjustment of Weakly Connected Aerial Imagery. Yongjun Zhang, Xiaodong Xiong, Xiang Shen, and Zheng Ji. September: 983–988

## Topographic wetness index (TWI)

Application of Lidar Terrain Surfaces for Soil Moisture Modeling. Florence Margaret Southee, Paul M. Treitz, and Neal A. Scott. December: 1241–1251

## Total station (TS) surveying

Terrestrial Laser Scanning for Delineating In-stream Boulders and Quantifying Habitat Complexity Measures. Jonathan P. Resop, Jessica L. Kozarek, and W. Cully Hession. April: 363–371

## Training sample problems — Incomplete

A Framework for Supervised Image Classification with Incomplete Training Samples. Qinghua Guo, Wenkai Li, Desheng Liu, and Jin Chen. June: 595–604

## Trajectories — Mined-land

Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235

## Trajectory-based methods

Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235

## Tree

An Empirical Model-based Method for Signal Restoration of SWIR in ASD Field Spectroradiometry. Chinsu Lin, Khongor Tsogt, and Chein-I Chang. February: 119–127

Assessment of Available Rangeland Woody Plant Biomass with a Terrestrial Lidar System. Nian-Wei Ku, Sorin C. Popescu, R. James Ansley, Humberto L. Perotto-Baldivieso, and Anthony M. Filippi. April: 349–361

Building Detection in Complex Scenes Thorough Effective Separation of Buildings from Trees. Mohammad Awrangjeb,

Chunshun Zhang, and Clive S. Fraser. July: 729–745

Estimating Urban Leaf Area Index (LAI) of Individual Trees with Hyperspectral Data. Ryan R. Jensen, Perry J. Hardin, and Andrew J. Hardin. May: 495–504

Tree Topology Representation from TLS Point Clouds Using Depth-First Search in Voxel Space. Anita Schilling, Anja Schmidt, and Hans-Gerd Maas. April: 383–392

## Tree cover mapping — Urban

Urban Tree Cover Mapping with Relief-corrected Aerial Imagery and Lidar. Brad Lehrbass and Jinfei Wang. May: 473–484

## Tree crown delineation

Automated Delineation of Individual Tree Crowns from Lidar Data by Multi-Scale Analysis and Segmentation. Linhai Jing, Baoxin Hu, Jili Li, and Thomas Noland. December: 1275–1284

A Fusion Approach for Tree Crown Delineation from Lidar Data. Colin J. Gleason and Jungho Im. July: 679–692

Terrestrial Laser Scanning for Delineating In-stream Boulders and Quantifying Habitat Complexity Measures. Jonathan P. Resop, Jessica L. Kozarek, and W. Cully Hession. April: 363–371

## Tree reflectance spectra

Estimating Urban Leaf Area Index (LAI) of Individual Trees with Hyperspectral Data. Ryan R. Jensen, Perry J. Hardin, and Andrew J. Hardin. May: 495–504

## Tree segmentation — Individual

A New Method for Segmenting Individual Trees from the Lidar Point Cloud. Wenkai Li, Qinghua Guo, Marek K. Jakubowski, and Maggi Kelly. January: 75–84

## Treetop-based species identification

Mapping Individual Tree Species in an Urban Forest Using Airborne Lidar Data and Hyperspectral Imagery. Caiyun Zhang and Fang Qiu. October: 1079–1087

## Triangle partitioning algorithm

Computing Non-Crossing Smooth Contours on Triangulated Meshes. Yuray Núñez-Rodríguez, Michael A. Johnson, Igor Raskin, and Jesse L. Thé. July: 703–714

## Triangulated irregular networks (TINs)

Computing Non-Crossing Smooth Contours on Triangulated Meshes. Yuray Núñez-Rodríguez, Michael A. Johnson, Igor Raskin, and Jesse L. Thé. July: 703–714

Integrated Global Navigation Satellite System (iGNSS) QoS Prediction. Duanguan Roongpiboonsopit and Hassan A. Karimi. February: 139–149

## Turkmenistan

Grids & Datums Column: Turkmenistan. Clifford J. Mugnier. December: 1209

## U

## Uganda

Grids & Datums Column: Republic of Uganda. Clifford J. Mugnier. August: 783, August: 786

## United States

Estimating Urban Leaf Area Index (LAI) of Individual Trees with Hyperspectral Data. Ryan R. Jensen, Perry J. Hardin, and Andrew J. Hardin. May: 495–504

Generation of a U.S. National Urban Land-Use Product. James A. Falcone and Colin G. Homer. October: 1057–1068

Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235

Modeling Percent Tree Canopy Cover: A Pilot Study. John W. Coulston, Gretchen G. Moisen, Barry T. Wilson, Mark V. Finco, Warren B. Cohen, and C. Kenneth Brewer. July: 715–727

2009–2012 National Report. Roberta Lenczowski. July: 656–660

2011 Survey on Remote Sensing and Geospatial Technologies Training in U.S. and Canadian Colleges and Universities. Steven A. Sader and Thomas Mueller. December: 1193–1198

Topographic Corrections of Satellite Data for Regional Monitoring. Sarah C. Goslee. September: 973–981

## United States — Mexico border

Identification of Waste Tires Using High-Resolution Multispectral Satellite Imagery. Becky Lauren Quinlan and Patricia G. Foschi. May: 463–471

## Urban areas

- Book review: Remote Sensing of Urban and Suburban Areas by Rashed, Tarek and Jürgens, Carsten. Reviewed by Lodhi, Mahtab A. April: 294–295
- Estimating Urban Leaf Area Index (LAI) of Individual Trees with Hyperspectral Data. Ryan R. Jensen, Perry J. Hardin, and Andrew J. Hardin. May: 495–504
- A Method for Detecting Windows from Mobile Lidar Data. Ruisheng Wang, Frank P. Ferrie, and Jane Macfarlane. November: 1129–1140

## Urban forest mapping

- Mapping Individual Tree Species in an Urban Forest Using Airborne Lidar Data and Hyperspectral Imagery. Caiyun Zhang and Fang Qiu. October: 1079–1087

## Urban land-use classification

- Detect Residential Buildings from Lidar and Aerial Photographs through Object-Oriented Land-Use Classification. Xuelian Meng, Nate Currit, Le Wang, and Xiaojun Yang. January: 35–44
- Generation of a U.S. National Urban Land-Use Product. James A. Falcone and Colin G. Homer. October: 1057–1068

## Urban tree cover mapping

- Urban Tree Cover Mapping with Relief-corrected Aerial Imagery and Lidar. Brad Lehrbass and Jinfei Wang. May: 473–484

## V

## Variable Length Record (VLR)

- The LAS 1.4 Specification. Lewis Graham. February: 93–102

## Variational gradient-based fusion method

- A Variational Gradient-based Fusion Method for Visible and SWIR Imagery. Huifang Li, Liangpei Zhang, Huanfeng Shen, and Pingxiang Li. September: 947–958

## Vector road-based method

- Aerial Image Mosaicking with the Aid of Vector Roads. Dongliang Wang, Youchuan Wan, Jianhua Xiao, Xudong Lai, Wenli Huang, and Jingzhong Xu. November: 1141–1150

## Vegetation

- Application of Time Series Landsat Images to Examining Land-use/Land-cover Dynamic Change. Dengsheng Lu, Scott Hetrick, Emilio Moran, and Guiying Li. July: 747–755
- Book review: Hyperspectral Remote Sensing of Vegetation by Thenkabail, Prasad S., Lyon, John G., and Huete, Alfredo. Reviewed by Du, Qian. November: 1119
- A Comparison of Multispectral ASTER and Hyperspectral AVIRIS Multiple End-member Spectral Mixture Analysis for Sagebrush and Herbaceous Cover in Yellowstone. Stacey Fairweather, Christopher Potter, Robert Crabtree, and Shuang Li. January: 23–33
- Incorporating the Downscaled Landsat TM Thermal Band in Land-cover Classification using Random Forest. V.F. Rodríguez-Galiano, B. Ghimire, E. Pardo-Igúzquiza, M. Chica-Olmo, and R.G. Congalton. February: 129–137
- Integration of Remote Sensing and GIS for Evaluating Soil Erosion Risk in Northwestern Zhejiang, China. Jianqin Huang, Dengsheng Lu, Jin Li, Jiasen Wu, Shiquan Chen, Weiming Zhao, Hongli Ge, Xingzhao Huang, and Xiaojie Yan. September: 935–946
- Modeling Riparian Zones Utilizing DEMS and Flood Height Data. Sinan A. Abood, Ann L. Maclean, and Lacey A. Mason. March: 259–269

## Vegetation cover

- Topographic Corrections of Satellite Data for Regional Monitoring. Sarah C. Goslee. September: 973–981

## Vegetation disturbance and regrowth

- Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235

## Vegetation indices (VI)

- Identifying Revegetated Mines as Disturbance/Recovery Trajectories Using an Interannual Landsat Chronosequence. Susmita Sen, Carl E. Zipper, Randolph H. Wynne, and Patricia F. Donovan. March: 223–235
- Topographic Corrections of Satellite Data for Regional Monitoring. Sarah C. Goslee. September: 973–981

## Vegetation patterns

- Integrating Remote Sensing and Wavelet Analysis for Studying Fine-scaled Vegetation Spatial Variation among Three Different Ecosystems. Yuhong He, Anum Khan, and Amy Mui. February: 161–168

## Velodyne HDL- 64E S2 scanning lidar system

- Calibration and Kinematic Analysis of the Velodyne HDL-64E S2 Lidar Sensor. Craig Glennie. April: 339–347

## Very high-resolution (VHR) sensors

- Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model Improvement. Rupert Müller, Thomas Krauß, Mathias Schneider, and Peter Reinartz. January: 61–74

## Vietnam

- Development of an Advanced Global Field Survey System (GFSS) for Terrestrial Monitoring and Mapping with a Demonstration for Agricultural Cropland Mapping in Asia. An Ngoc Van, Kyaw Sann Oo, and Wataru Takeuchi. August: 875–884

## Visible imagery

- A Variational Gradient-based Fusion Method for Visible and SWIR Imagery. Huifang Li, Liangpei Zhang, Huanfeng Shen, and Pingxiang Li. September: 947–958

## Visual analysis

- Identification of Waste Tires Using High-Resolution Multispectral Satellite Imagery. Becky Lauren Quinlan and Patricia G. Foschi. May: 463–471

## Volcanic eruptions

- Neuro-fuzzy Classification of Submarine Lava Flow Morphology. J. Timothy McClinton, Scott M. White, and John M. Sinton. June: 605–616

## Voxel space analysis

- Tree Topology Representation from TLS Point Clouds Using Depth-First Search in Voxel Space. Anita Schilling, Anja Schmidt, and Hans-Gerd Maas. April: 383–392

# Subject Index

## W

### War

Three Decades of War and Food Insecurity in Iraq. Glen R. Gibson, James B. Campbell, Randolph H. Wynne. August: 885–895

### Waste tire piles

Identification of Waste Tires Using High-Resolution Multispectral Satellite Imagery. Becky Lauren Quinlan and Patricia G. Foschi. May: 463–471

### Water quality

A Semi-Analytical Model for the Multitemporal Prediction of Chlorophyll-a in an Iowa Lake Using Hyperion Data. Ramathan Sugumaran and Justin Thomas. December: 1253–1260

### Water resources

Assessing Future Risks to Agricultural Productivity, Water Resources and Food Security: How Can Remote Sensing Help? Prasad S. Thenkabail, Jerry W. Knox, Mutlu Ozdogan, Murali Krishna Gumma, Russell G. Congalton, Zhuoting Wu, Cristina Milesi, Alex Finkral, Mike Marshall, Isabella Mariotto, Songcai You, Chandra Giri, and Pamela Nagler. August: 773–782

### Watershed segmentation

A Fusion Approach for Tree Crown Delineation from Lidar Data. Colin J. Gleason and Jungho Im. July: 679–692

### Water use

Estimating Irrigated Agricultural Water Use through Landsat TM and a Simplified Surface Energy Balance Modeling in the Semi-arid Environments of Arizona. Shai Kaplan and Soe W. Myint. August: 849–859

Forward: Global Croplands and their Water Use for Food Security in the Twenty-first Century. Prasad S. Thenkabail. August: 797–798

Phenology-based Crop Classification Algorithm and its Implications on Agricultural Water Use Assessments in California's Central Valley. Liheng Zhong, Peng Gong, and Greg S. Biging. August: 799–813

### Waveform data

The LAS 1.4 Specification. Lewis Graham. February: 93–102

Mapping Matters. Qassim A. Abdullah. February: 105–108

### Wavelet analysis

Integrating Remote Sensing and Wavelet Analysis for Studying Fine-scaled Vegetation Spatial Variation among Three Different Ecosystems. Yuhong He, Anum Khan, and Amy Mui. February: 161–168

### Webcam-based photogrammetric system

A Webcam-based Photogrammetric System for the Measurement of Facial Landmarks on Newborns. Bruce King. December: 1285–1294

### Web mapping

Book review: Advances in Web-based GIS, Mapping Services and Applications by Li, Songnian, Dragicevic, Suzana and Veenendall, Bert. Reviewed by Westmoreland, Sally J. August: 785–786

### Web services – Geo-enabled

PE&RS October 2013 Special Issue Call for Papers on. August: 789, October: 1068

### Western Mapping Project

Mapping Western China at a Scale of 1:50,000. Jixian Zhang, Qin Yan, Wenhan Xie. April: 289–292

### Wetlands

An Efficient Remote Sensing Solution to Update the NCWI. Beth R. Stein, Baojuan Zheng, Ioannis Kokkinidis, Nilam Kayastha, Taylor Seigler, Kemal Gökçaya, Ranjith Gopalakrishnan, Won Hoi Hwang. June: 537–547

### Wide Dynamic Range Vegetation Index (WDRVI)

Integrating Remote Sensing and Wavelet Analysis for Studying Fine-scaled Vegetation Spatial Variation among Three Different Ecosystems. Yuhong He, Anum Khan, and Amy Mui. February: 161–168

### Window detection

A Method for Detecting Windows from Mobile Lidar Data. Ruisheng Wang, Frank P. Ferrie, and Jane Macfarlane. November: 1129–1140

### WIPKA-QS (Wissensbasierter Photogrammetrisch-Kartographischer Arbeitsplatz zur Qualitätssicherung)

Semi-automatic Quality Control of Topographic Data Sets. Petra Helmholz, Christian Becker, Uwe Breitkopf, Tor-

sten Büschenfeld, Andreas Busch, Carola Braun, Dietmar Grünreich, Sönke Müller, Jörn Ostermann, Martin Pahl, Franz Rottensteiner, Karsten Vogt, Marcel Ziems, Christian Heipke. September: 959–972

### Woody plants

Assessment of Available Rangeland Woody Plant Biomass with a Terrestrial Lidar System. Nian-Wei Ku, Sorin C. Popescu, R. James Ansley, Humberto L. Perotto-Baldivieso, and Anthony M. Filippi. April: 349–361

## Y

### Yellowstone National Park

A Comparison of Multispectral ASTER and Hyperspectral AVIRIS Multiple End-member Spectral Mixture Analysis for Sagebrush and Herbaceous Cover in Yellowstone. Stacey Fairweather, Christopher Potter, Robert Crabtree, and Shuang Li. January: 23–33

## A

### Abdullah, Qassim A.

Mapping Matters. February: 105–108, April: 296–297, July: 664–665, August: 784, November: 1117, December: 1211

### Abood, Sinan A.

Modeling Riparian Zones Utilizing DEMS and Flood Height Data. March: 259–269

### Abuzar, Mohammad

Book review: Global Navigation Satellite Systems: Insights into GPS, GLONASS, Galileo, Compass, and Others. May: 451–452

### Aguilar, Fernando J.

Geopositioning Accuracy Assessment of GeoEye-1 Panchromatic and Multispectral Imagery. March: 247–257

### Aguilar, Manuel A.

Geopositioning Accuracy Assessment of GeoEye-1 Panchromatic and Multispectral Imagery. March: 247–257

### Anaya, Jesús A.

Accuracy Assessment of Burned Area Products in the Orinoco Basin. January: 53–60

### Ansley, R. James

Assessment of Available Rangeland Woody Plant Biomass with a Terrestrial Lidar System. April: 349–361

### Arroyo, Lara A.

Objects-based Image Analysis for Mapping Natura 2000 Habitats to Improve Forest Management. September: 991–999

### Awrangjeb, Mohammad

Building Detection in Complex Scenes Through Effective Separation of Buildings from Trees. July: 729–745

## B

### Badiger, Shrinivas

Mapping Crop Types, Irrigated Areas, and Cropping Intensities in Heterogeneous Landscapes of Southern India Using Multi-Temporal Medium-Resolution Imagery: Implications for Assessing Water Use in Agriculture. August: 815–827

Grids & Datums Column: Turkmenistan. December: 1209

Grids & Datums Column: United Mexican States. November: 1115–1116

## Mui, Amy

Integrating Remote Sensing and Wavelet Analysis for Studying Fine-scaled Vegetation Spatial Variation among Three Different Ecosystems. February: 161–168

## Müller, Rupert

Automated Georeferencing of Optical Satellite Data with Integrated Sensor Model Improvement. January: 61–74

## Müller, Sönke

Semi-automatic Quality Control of Topographic Data Sets. September: 959–972

## Mullin, Joseph

Operational Utilization of Aerial Multispectral Remote Sensing during Oil Spill Response: Lessons Learned During the Deepwater Horizon (MC-252) Spill. October: 1089–1102

## Muskat, Judd

Operational Utilization of Aerial Multispectral Remote Sensing during Oil Spill Response: Lessons Learned During the Deepwater Horizon (MC-252) Spill. October: 1089–1102

## Mustafa, Yaseen T.

Improving Forest Growth Estimates Using a Bayesian Network Approach. January: 45–51

## Myint, Soe W.

Estimating Irrigated Agricultural Water Use through Landsat TM and a Simplified Surface Energy Balance Modeling in the Semi-arid Environments of Arizona. August: 849–859

## N

## Nagler, Pamela

Assessing Future Risks to Agricultural Productivity, Water Resources and Food Security: How Can Remote Sensing Help?. August: 773–782

## Ngoc Van, An

Development of an Advanced Global Field Survey System (GFSS) for Terrestrial Monitoring and Mapping with a Demonstration for Agricultural Cropland Mapping in Asia. August: 875–884

## Nguy-Robertson, Anthony L.

Book review: Land Remote Sensing and Global Environmental Change: NASA's Earth Observing System and the Science of ASTER and MODIS. January: 8, January: 11  
Comparing the Performance of Empirical, Semi-empirical, and Curve Fitting Models in Predicting Cyanobacterial Pigments. May: 485–494

## Noland, Thomas

Automated Delineation of Individual Tree Crowns from Lidar Data by Multi-Scale Analysis and Segmentation. December: 1275–1284

## Núñez-Rodríguez, Yurai

Computing Non-Crossing Smooth Contours on Triangulated Meshes. July: 703–714

## O

## Oh, Jaehong

Automated Georegistration of High-Resolution Satellite Imagery using a RPC Model with Airborne Lidar Information. October: 1045–1056

## Oo, Kyaw Sann

Development of an Advanced Global Field Survey System (GFSS) for Terrestrial Monitoring and Mapping with a Demonstration for Agricultural Cropland Mapping in Asia. August: 875–884

## Ostermann, Jörn

Semi-automatic Quality Control of Topographic Data Sets. September: 959–972

## Ozdogan, Mutlu

Assessing Future Risks to Agricultural Productivity, Water Resources and Food Security: How Can Remote Sensing Help?. August: 773–782

## P

## Pack, Robert T.

Network Orientation Using the Scaled Orthographic Projection for Parameter Initialization. May: 505–517

## Pahlevan, Nima

Integrating Landsat-7 Imagery with Physics-based Models for Quantitative Mapping of Coastal Waters near River Discharges. November: 1163–1174

## Pahl, Martin

Semi-automatic Quality Control of Topographic Data Sets. September: 959–972

## Pardo-Igúzquiza, E.

Incorporating the Downscaled Landsat TM Thermal Band in Land-cover Classification using Random Forest. February: 129–137

## Patias, Petros

Book review: Advances in Environmental Remote Sensing: Sensors, Algorithms, and Applications. February: 104

## Perotto-Baldivieso, Humberto L.

Assessment of Available Rangeland Woody Plant Biomass with a Terrestrial Lidar System. April: 349–361

## Plasker, James R.

2011-2012 Executive Director Report. June: 562–565

## Popescu, Sorin C.

Assessment of Available Rangeland Woody Plant Biomass with a Terrestrial Lidar System. April: 349–361

## Potter, Christopher

A Comparison of Multispectral ASTER and Hyperspectral AVIRIS Multiple End-member Spectral Mixture Analysis for Sagebrush and Herbaceous Cover in Yellowstone. January: 23–33

## Q

## Qiu, Fang

Mapping Individual Tree Species in an Urban Forest Using Airborne Lidar Data and Hyperspectral Imagery. October: 1079–1087

## Qi, Zhixin

Integration of Polarimetric Decomposition, Object-Oriented Image Analysis, and Decision Tree Algorithms for Land-Use and Land-Cover Classification using RADARSAT-2 Polarimetric SAR Data. February: 169–181

## Quinlan, Becky Lauren

Identification of Waste Tires Using High-Resolution Multispectral Satellite Imagery. May: 463–471

## R

## Ramankutty, Navin

Mapping Crop Types, Irrigated Areas, and Cropping Intensities in Heterogeneous Landscapes of Southern India Using Multi-Temporal Medium-Resolution Imagery: Implications for Assessing Water Use in Agriculture. August: 815–827

# Author Index

## **Raskin, Igor**

Computing Non-Crossing Smooth Contours on Triangulated Meshes. July: 703–714

## **Reid, Nick**

Seasonal Variation in Land-Cover Classification Accuracy in a Diverse Region. March: 271–280
