

A

Accuracy assessment

Stitching and Processing Gnomonic Projections for Close-Range Photogrammetry. Luigi Barazzetti, Mattia Previtali, and Marco Scaioni. June: 573–582

Accuracy assessment–Area-based

Classification and Accuracy Assessment for Coarse Resolution Mapping within the Great Lakes Basin, USA. John S. Iiames and Ross S. Lunetta. November: 1015–1026

Accuracy assessment–Bundle adjustment

Basic Products of the ZiYuan-3 Satellite and Accuracy Evaluation. Hongbo Pan, Guo Zhang, Xinming Tang, Deren Li, Xiaoyong Zhu, Ping Zhou, and Yonghua Jiang. December: 1131–1145

Accuracy assessment–Calibration

A Flexible Method for Zoom Lens Calibration and Modeling Using a Planar Checkerboard. Bo Wu, Han Hu, Qing Zhu, and Yeting Zhang. June: 555–571

Accuracy assessment–Change quantification

Range Image Techniques for Fast Detection and Quantification of Changes in Repeatedly Scanned Buildings. Zhizhong Kang, Liqiang Zhang, Huanyin Yue, and Roderik Lindenbergh. August: 695–707

Accuracy assessment–DEM

Influence of a Dense, Low-height Shrub Species on the Accuracy of a Lidar derived DEM. Samuel B. Gould, Nancy F. Glenn, Temuulen T. Sankey, and James P. McNamara. May: 421–431

Accuracy assessment–Elevation

Land Cover Dependent Error in Intermap IFSAR DTM: Lidar Comparison and Fusion Potential. Seamus Coveney. March: 277–286

Accuracy assessment–FKS classifier

Developing an Object-based Hyperspatial Image Classifier with a Case Study Using WorldView-2 Data. Harini Sridharan and Fang Qiu. November: 1027–1036

Accuracy assessment–Geolocation

It Used To Be Dark Here: Geolocation Calibration of the Defense Meteorological Satellite Program Operational Linescan

System. Benjamin T. Tuttle, Sharolyn J. Anderson, Paul C. Sutton, Christopher D. Elvidge, and Kim Baugh. March: 287–297

Accuracy assessment–Horizontal

Mapping Matters. Qassim A. Abdullah. May: 404–405

Accuracy assessment–Image classification

Parcel-Level Identification of Crop Types Using Different Classification Algorithms and Multi-Resolution Imagery in Southeastern Turkey. Ugur Alganci, Elif Sertel, Mutlu Ozdogan, and Cankut Ormeçi. November: 1053–1065

Accuracy assessment–Image product

Metrically Preserving The USGS Aerial Film Archive. Donald Moe and Ryan Longhenry. March: 225–228

Accuracy assessment–Lidar

Assessing Lidar Accuracy with Hexagonal Retro-Reflective Targets. Roberto Canavosio-Zuzelski, James Hogarty, Craig Rodarmel, Mark Lee, and Aaron Braun. July: 663–670

Mapping Matters. Qassim A. Abdullah. July: 599, July: 601

Accuracy assessment–Map

Applicability of Multi-date Land Cover Mapping using Landsat-5 TM Imagery in the Northeastern US. Meghan Graham MacLean and Russell G. Congalton. April: 359–368

Spatio-statistical Predictions of Vernal Pool Locations in Massachusetts: Incorporating the Spatial Component into Ecological Modeling. Tina A. Cormier, Russell G. Congalton, and Kimberly J. Babbitt. January: 25–35

Accuracy assessment–Matching

Improved Nonsampled Contourlet Transform for Multi-sensor Image Registration. Ruirui Wang, Jianwen Ma, Huaguo Huang, and Wei Shi. January: 51–66

Accuracy assessment–OBIA cover

Assessing the Relationship between Ground Measurements and Object-Based Image Analysis of Land Cover Classes in Pinon and Juniper Woodlands. April Hulet, Bruce A. Roundy, Steven L. Petersen, Ryan R. Jensen, and Stephen C. Bunting. September: 799–808

Accuracy Assessment–Optical images

Registration of Optical Images with Lidar Data and Its Accuracy Assessment. Shunyi Zheng, Rongyong Huang, and Yang Zhou. August: 731–741

Accuracy assessment–Point-based

Classification and Accuracy Assessment for Coarse Resolution Mapping within the Great Lakes Basin, USA. John S. Iiames and Ross S. Lunetta. November: 1015–1026

A Framework for the Registration and Segmentation of Heterogeneous Lidar Data. M. Al-Durgham and A. Habib. February: 135–145

Accuracy assessment–Positional

It Used To Be Dark Here: Geolocation Calibration of the Defense Meteorological Satellite Program Operational Linescan System. Benjamin T. Tuttle, Sharolyn J. Anderson, Paul C. Sutton, Christopher D. Elvidge, and Kim Baugh. March: 287–297

Accuracy assessment–RFM

Rational Function Model in Processing Historical Aerial Photographs. Ruijin Ma. April: 337–345

Accuracy assessment–Statistical

A Methodology to Characterize Vertical Accuracies in Lidar-derived Products at Landscape Scales. Wade T. Tinkham, Chad M. Hoffman, Michael J. Falkowski, Alistair M.S. Smith, Hans-Peter Marshall, and Timothy E. Link. August: 709–716

Accuracy assessment–Vector parcel maps

An Automated Approach for the Conflation of Vector Parcel Map with Imagery. Wenbo Song, James M. Keller, Timothy L. Haithcoat, Curt H. Davis, and Jason B. Hinsen. June: 535–543

Adapting neutral models

Assessing the Performance of Linear Feature Models: An Approach to Computational Inference. Eugenio Y. Arima, Robert T. Walker, and Dante G. Vergara. September: 847–855

Adaptive segmentation

New Approaches for Estimating the Local Point Density and its Impact on Lidar Data Segmentation. Zahra Lari and Ayman Habib. February: 195–207

Subject Index

Adaptive shrink operator (ASO)

Improved Nonsampled Contourlet Transform for Multi-sensor Image Registration. Ruirui Wang, Jianwen Ma, Huaguo Huang, and Wei Shi. January: 51–66

Adaptive template matching algorithm

A Coarse Elevation Map-based Registration Method for Super-resolution of Three line Scanner Images. Rongjun Qin, Jianya Gong, Hongli Li, and Xianfeng Huang. August: 717–730

Adaptive Wiener filter (AWF)

Developing Efficient Procedures for Automated Sinkhole Extraction from Lidar DEMs. Xin Miao, Xiaomin Qiu, Shuo-Sheng Wu, Jun Luo, Douglas R. Gouzie, and Hongjie Xie. June: 545–554

Advanced Land Observing Satellite (ALOS)

Characterization of Geological Hazards Using a Globally Observing Spaceborne SAR. Estelle Chaussard and Falk Amelung. November: 982–986

Advanced synthetic aperture radar (ASAR)

Combining Hyperspectral and Radar Imagery for Mangrove Leaf Area Index Modeling. Frankie K. K. Wong and Tung Fung. May: 479–490

Advanced very high resolution radiometer (AVHRR) images

Illustrating the Temporal Progress of Environmental Change. Joann W. Harvey and Edwin J. Green. December: 1159–1170

Aerial camera system

Guidelines for the In Situ Geometric Calibration of the Aerial Camera System. July: 590–595

Aerial film archive

Metrically Preserving The USGS Aerial Film Archive. Donald Moe and Ryan Longhenry. March: 225–228

Aerial imagery

Forward: Special Issue on Mobile Mapping for Disaster Relief. David Alvarez, Piero Boccardo, Maria Antonia Brovelli, Fabio Giulio Tonolo, and Marguerite Madden. October: 901–903

Pedestrian Network Extraction from Fused Aerial Imagery (Orthoimages) and Laser Imagery (Lidar). Piyawan Kasemsupakorn and Hassan A. Karimi. April: 369–379

Registration of Aerial Imagery and Lidar

Data in Desert Areas Using the Centroids of Bushes as Control Information. Na Li, Xianfeng Huang, Fan Zhang, and Le Wang. August: 743–752

Aerial photogrammetry

An Automatic Approach to UAV Flight Planning and Control for Photogrammetric Applications: A Test Case in the Asturias Region (Spain). David Hernandez-Lopez, Beatriz Felipe-Garcia, Diego Gonzalez-Aguilera, and Benjamin Arias-Perez. January: 87–98

Modeling Image Motion in Airborne Three-Line-Array (TLA) Push-broom Cameras. Guimin Jia, Xiangjun Wang, Hong Wei, and Zhaocai Zhang. January: 67–78

Aerial photographs

An Automated Approach for the Conflation of Vector Parcel Map with Imagery. Wenbo Song, James M. Keller, Timothy L. Haithcoat, Curt H. Davis, and Jason B. Hinsen. June: 535–543

The Effects of Data Selection and Thematic Detail on the Accuracy of High Spatial Resolution Wetland Classifications, Joseph F. Knight, Bryan P. Tolcser, Jennifer M. Corcoran, and Lian P. Rampi. July: 613–623

Rational Function Model in Processing Historical Aerial Photographs. Ruijin Ma. April: 337–345

Agricultural drought–Global

Web-service-based Monitoring and Analysis of Global Agricultural Drought. Meixia Deng, Liping Di, Weiguo Han, Ali L. Yagci, Chunming Peng, and Gil Heo. October: 929–943

Airborne discrete-return lidar

A Multi-Scale Approach to Mapping Canopy Height. Gordon M. Green, Sean C. Ahearn, and Wenge Ni-Meister. February: 183–194

Airborne laser scanning (ALS)

Moving Toward Consistent ALS Monitoring of Forest Attributes across Canada: A Consortium Approach. Chris Hopkinson, Laura Chasmer, David Colville, Richard A. Fournier, Ronald J. Hall, Joan E. Luther, Trevor Milne, Richard M. Petrone, and Benoît St-Onge. February: 159–173

A Random Set Approach for Modeling Integrated Uncertainties of Traffic Islands Derived from Airborne Laser Scanning Points. Liang Zhou and Alfred Stein. September: 835–845

Airborne lidar data

Assessing Lidar Accuracy with Hexagonal Retro-Reflective Targets. Roberto Canavosio-Zuzelski, James Hogarty, Craig Rodarmel, Mark Lee, and Aaron Braun. July: 663–670

Point-based Classification of Power Line Corridor Scene Using Random Forests. Heungsik B. Kim and Gunho Sohn. September: 821–833

Towards Integration of GLAS into a National Fuel Mapping Program. Birgit Peterson, Kurtis Nelson, and Bruce Wylie. February: 175–183

Airborne multispectral images

Histogram Curve Matching Approaches for Object-based Image Classification of Land Cover and Land Use. Sory I. Toure, Douglas A. Stow, John R. Weeks, and Sunil Kumar. May: 433–440

Airborne three-line-array (TLA) push-broom cameras

Modeling Image Motion in Airborne Three-Line-Array (TLA) Push-broom Cameras. Guimin Jia, Xiangjun Wang, Hong Wei, and Zhaocai Zhang. January: 67–78

Airborne topographic lidar

Manual of Airborne Topographic Lidar by Renslow, Michael. Reviewed by Wood, John. May: 406–407

Airborne visible/infrared imaging spectrometer (AVIRIS)

Utility of the Wavelet Transform for LAI Estimation Using Hyperspectral Data. Asim Banskota, Randolph H. Wynne, Shawn P. Serbin, Nilam Kayastha, Valerie A. Thomas, and Philip A. Townsend. July: 653–662

Aircraft

Modeling Image Motion in Airborne Three-Line-Array (TLA) Push-broom Cameras. Guimin Jia, Xiangjun Wang, Hong Wei, and Zhaocai Zhang. January: 67–78

Alaska

Towards Integration of GLAS into a National Fuel Mapping Program. Birgit Peterson, Kurtis Nelson, and Bruce Wylie. February: 175–183

ArcGIS Image Services

Trends in Image Management and Dissemination. Peter Becker. October: 880–885

B

Artificial neural networks (ANN)

Assessing Post-Fire Regeneration in a Mediterranean Mixed Forest Using Lidar Data and Artificial Neural Networks. Haifa Debouk, Ramon Riera-Tatché, and Cristina Vega-García. December: 1121-1130

Asian Association on Remote Sensing (AARS)

Report on 33rd Asian Conference on Remote Sensing (ACRS). Sally E. Goldin. February: 125

ASPRS

ASPRS Accuracy Standards for Digital Geospatial Data. December: 1073-1084
 ASPRS Board of Directors. April: 332, August: 690, February: 128, January: 20, July: 608, June: 518, March: 240, May: 415, November: 994, October: 896, September: 781
 ASPRS Board of Directors 2013-2014. June: 516
 ASPRS Certification Program Accredited by CESB. February: 123
 ASPRS Executive Director James Plasker Announces His Retirement. September: 779
 ASPRS Initiates Development of Manual of Remote Sensing, 4th Edition. July: 605
 ASPRS Launches First eBook – Manual of Airborne Topographic Lidar. September: 778
 ASPRS Lidar Division Releases First LAS Domain Profile. September: 778
 ASPRS Vice Presidential Candidates for 2014. December: 1091
 Cardinal Systems' Mike Kitaif Honored as 2013 ASPRS Florida Region Member of the Year. November: 991
 Code of Ethics. August: 730, July: 637, May: 490
 2013 GeoLeague Challenge Winner. June: 498
 Lynn Usery Elected as ASPRS Vice President. April: 331
 Letter from the *PE&RS* Executive Editor. Kim Tilley. December: 1091
 Member Champions 2012. April: 326, February: 121, January: 13, March: 237, May: 414
 Member Champions 2013. April: 326, August: 686, July: 602, March: 237, May: 414, November: 991, October: 893, September: 776
 Photo Science's Christie and Coleman Elected NCR ASPRS Officers. December: 1092
 Pierre le Roux Elected as Assistant Director

of the Primary Data Acquisition Division. April: 331

Proposed Bylaws Amendment — Sustaining Members Council (SMC) Electoral/Ascension Process. November: 993
 Reviewers for 2012. April: 324
 Student Advisory Council (SAC). January: 12
 Student Advisory Council (SAC) Selects New Members. August: 687
 Young Professional Council (YPC) to Launch Mentor Program and Development Plan for Associate Members. August: 687

ASPRS Foundation. May: 411

ASPRS—Sustaining members. See Corporate description

ASTER temperature-emissivity separation (ASTER_TES)

Temperature and Emissivity Separation from Thermal Airborne Hyperspectral Imager (TASI) Data. Yang Hang, Zhang Lifu, Gao Yingqian, Hu Shunshi, Li Xueke, Zhang Genzhong, and Tong Qinxia. December: 1099-1107

Asturias region

An Automatic Approach to UAV Flight Planning and Control for Photogrammetric Applications: A Test Case in the Asturias Region (Spain). David Hernandez-Lopez, Beatriz Felipe-Garcia, Diego Gonzalez-Aguilera, and Benjamin Arias-Perez. January: 87-98

Atmospheric correction

Temperature and Emissivity Separation from Thermal Airborne Hyperspectral Imager (TASI) Data. Yang Hang, Zhang Lifu, Gao Yingqian, Hu Shunshi, Li Xueke, Zhang Genzhong, and Tong Qinxia. December: 1099-1107

Australia

Markov Land Cover Change Modeling Using Pairs of Time-Series Satellite Images. Priyakant Sinha and Lalit Kumar. November: 1037-1051

Automatic road extraction

Pedestrian Network Extraction from Fused Aerial Imagery (Orthoimages) and Laser Imagery (Lidar). Piyawan Kasemsupakorn and Hassan A. Karimi. April: 369-379

Backscatter

Combining Hyperspectral and Radar Imagery for Mangrove Leaf Area Index Modeling. Frankie K. K. Wong and Tung Fung. May: 479-490

Band clustering (BC)

Band Grouping *versus* Band Clustering in SVM Ensemble Classification of Hyperspectral Imagery. Behnaz Bigdeli, Farhad Samadzadegan, and Peter Reinartz. June: 523-533

Band grouping (BG)

Band Grouping *versus* Band Clustering in SVM Ensemble Classification of Hyperspectral Imagery. Behnaz Bigdeli, Farhad Samadzadegan, and Peter Reinartz. June: 523-533

Bandung City

Land Subsidence Characteristics in Bandung City, Indonesia as Revealed by Spaceborne Geodetic Techniques and Hydrogeological Observations. R.S. Chatterjee, Moh. Fifi k Syafi udin, and Hasanuddin Z. Abidin. July: 639-652

Bare-earth DEM

Mapping Matters. Qassim A. Abdullah. May: 404-405

Bayes error rate of classification

Selecting Key Features for Remote Sensing Classification by Using Decision-Theoretic Rough Set Model. Feng Xie, Dongmei Chen, John Meligrana, Yi Lin, and Wenwei Ren. September: 787-797

Bayesian-based building extraction

Hierarchical Method of Urban Building Extraction Inspired by Human Perception. Chao Tao, Yihua Tan, and Zheng-rong Zou. December: 1109-1119

Bayesian regression tree modeling

Illustrating the Temporal Progress of Environmental Change. Joann W. Harvey and Edwin J. Green. December: 1159-1170

Belarus

Grids & Datums Column: Republic of Belarus. Clifford J. Mugnier. February: 115-116

Biodiversity

Spatio-statistical Predictions of Vernal Pool Locations in Massachusetts: Incorporat-

Subject Index

ing the Spatial Component into Ecological Modeling. Tina A. Cormier, Russell G. Congalton, and Kimberly J. Babbitt. January: 25–35

- Guidelines for the In Situ Geometric Calibration of the Aerial Camera System. July: 590–595
- Photogrammetric Techniques for the De-

termination of Spatio-temporal Velocity Fields at Glaciar San Rafael, Chile. H.-G. Maas, G. Casassa, D. Schneider, E. Schwalbe, and A. Wendt. March: 299–306

Stitching and Processing Gnomonic Projections for Close-Range Photogrammetry. Luigi Barazzetti, Mattia Previtali, and Marco Scaioni. June: 573–582

Using Optical Projection in Close-range Photogrammetry for 6DOF Sensor Positioning. Benrui Zheng, Yue Dong, Angela Davies, Brigid Mullany, and Edward Morse. January: 79–86

Camera models

Rational Function Model in Processing Historical Aerial Photographs. Ruijin Ma. April: 337–345

Camera parameters

Registration of Aerial Imagery and Lidar Data in Desert Areas Using the Centroids of Bushes as Control Information. Na Li, Xianfeng Huang, Fan Zhang, and Le Wang. August: 743–752

Stitching and Processing Gnomonic Projections for Close-Range Photogrammetry. Luigi Barazzetti, Mattia Previtali, and Marco Scaioni. June: 573–582

Canada

Moving Toward Consistent ALS Monitoring of Forest Attributes across Canada: A Consortium Approach. Chris Hopkinson, Laura Chasmer, David Colville, Richard A. Fournier, Ronald J. Hall, Joan E. Luther, Trevor Milne, Richard M. Petrone, and Benoît St-Onge. February: 159–173

A Spatial-Spectral Methodology to Detect Narrow Shadows on Satellite Imagery: A Case Study of Calgary, Canada. Ying Zhang and Bert Guindon. March: 269–276

Canadian Consortium for Lidar Environmental Applications Research (C-CLEAR)

Moving Toward Consistent ALS Monitoring of Forest Attributes across Canada: A Consortium Approach. Chris Hopkinson, Laura Chasmer, David Colville, Richard A. Fournier, Ronald J. Hall, Joan E. Luther, Trevor Milne, Richard M. Petrone, and Benoît St-Onge. February: 159–173

Canopy

The Influence of Multi-season Imagery on Models of Canopy Cover: A Case Study. John W. Coulston, Dennis M. Jacobs,

Chris R. King, and Ivey C. Elmore. May: 469–477

Predicting Surface Fuel Models and Fuel Metrics Using Lidar and CIR Imagery in a Dense, Mountainous Forest. Marek K. Jakubowski, Qinghua Guo, Brandon Collins, Scott Stephens, and Maggi Kelly. January: 37–49

Canopy density metrics

Comparison of Forest Attributes Derived from Two Terrestrial Lidar Systems. Mark J. Ducey, Rasmus Astrup, Stefan Seifert, Hans Pretzsch, Bruce C. Larson, and K. David Coates. March: 245–257

Canopy fuel parameters

Towards Integration of GLAS into a National Fuel Mapping Program. Birgit Peterson, Kurtis Nelson, and Bruce Wylie. February: 175–183

Canopy height model (CHM)

Assessing Post-Fire Regeneration in a Mediterranean Mixed Forest Using Lidar Data and Artificial Neural Networks. Haifa Debouk, Ramon Riera-Tatché, and Cristina Vega-García. December: 1121–1130

A Multi-Scale Approach to Mapping Canopy Height. Gordon M. Green, Sean C. Ahearn, and Wenge Ni-Meister. February: 183–194

Cartographic models

Spatio-statistical Predictions of Vernal Pool Locations in Massachusetts: Incorporating the Spatial Component into Ecological Modeling. Tina A. Cormier, Russell G. Congalton, and Kimberly J. Babbitt. January: 25–35

CCD sensors

Modeling Image Motion in Airborne Three-Line-Array (TLA) Push-broom Cameras. Guimin Jia, Xiangjun Wang, Hong Wei, and Zhao Cai Zhang. January: 67–78

Ceanothus cover

Influence of a Dense, Low-height Shrub Species on the Accuracy of a Lidar derived DEM. Samuel B. Gould, Nancy F. Glenn, Temuulen T. Sankey, and James P. McNamara. May: 421–431

Cellular automata (CA)-based MCM

Markov Land Cover Change Modeling Using Pairs of Time-Series Satellite Images. Priyakant Sinha and Lalit Kumar. November: 1037–1051

Certification

ASPRS Certification List. April: 323, August: 686, February: 122, January: 14, July: 600, June: 508, March: 234, May: 402, October: 886, September: 774

Change detection

Change Detection and Deformation Analysis in Point Clouds: Application to Rock Face Monitoring. Marco Scaioni, Riccardo Roncella, and Mario Ivan Alba. May: 441–455

Illustrating the Temporal Progress of Environmental Change. Joann W. Harvey and Edwin J. Green. December: 1159–1170

Range Image Techniques for Fast Detection and Quantification of Changes in Repeatedly Scanned Buildings. Zhizhong Kang, Liqiang Zhang, Huanyin Yue, and Roderik Lindenbergh. August: 695–707

Change threshold methods

Hybrid Object-based Change Detection and Hierarchical Image Segmentation for Thematic Map Updating. D.C. Duro, S.E. Franklin, and M.G. Dubé. March: 259–268

Chile

Photogrammetric Techniques for the Determination of Spatio-temporal Velocity Fields at Glaciar San Rafael, Chile. H.-G. Maas, G. Casassa, D. Schneider, E. Schwalbe, and A. Wendt. March: 299–306

CIR Imagery

Predicting Surface Fuel Models and Fuel Metrics Using Lidar and CIR Imagery in a Dense, Mountainous Forest. Marek K. Jakubowski, Qinghua Guo, Brandon Collins, Scott Stephens, and Maggi Kelly. January: 37–49

Classification

The Effects of Data Selection and Thematic Detail on the Accuracy of High Spatial Resolution Wetland Classifications. Joseph F. Knight, Bryan P. Tolcser, Jennifer M. Corcoran, and Lian P. Rambi. July: 613–623

Classification accuracy. See also Accuracy Assessment

Predicting Surface Fuel Models and Fuel Metrics Using Lidar and CIR Imagery in a Dense, Mountainous Forest. Marek K. Jakubowski, Qinghua Guo, Brandon Collins, Scott Stephens, and Maggi Kelly. January: 37–49

Subject Index

Selecting Key Features for Remote Sensing Classification by Using Decision-Theoretic Rough Set Model. Feng Xie, Dongmei Chen, John Meligrana, Yi Lin, and Wenwei Ren. September: 787–797

Classification accuracy–Class-weighted

Point-based Classification of Power Line Corridor Scene Using Random Forests. Heungsik B. Kim and Gunho Sohn. September: 821–833

Classification accuracy–Coffee-forest landscapes

Classification of Coffee-Forest Landscapes Using Landsat TM Imagery and Spectral Mixture Analysis. Mikaela Schmitt-Harsh, Sean P. Sweeney, and Tom P. Evans. May: 457–468

Classification accuracy–Image

An Experimental Comparison of Semi-supervised Learning Algorithms for Multi-spectral Image Classification. Enmei Tu, Jie Yang, Jiangxiong Fang, Zhenghong Jia, and Nikola Kasabov. April: 347–357

Applicability of Multi-date Land Cover Mapping using Landsat-5 TM Imagery in the Northeastern US. Meghan Graham MacLean and Russell G. Congalton. April: 359–368

Band Grouping *versus* Band Clustering in SVM Ensemble Classification of Hyperspectral Imagery. Behnaz Bigdeli, Farhad Samadzadegan, and Peter Reinartz. June: 523–533

A Combined Object- and Pixel-Based Image Analysis Framework for Urban Land Cover Classification of VHR Imagery. Bahram Salehi, Yun Zhang, and Ming Zhong. November: 999–1014

Developing an Object-based Hyperspatial Image Classifier with a Case Study Using WorldView-2 Data. Harini Sridharan and Fang Qiu. November: 1027–1036

Histogram Curve Matching Approaches for Object-based Image Classification of Land Cover and Land Use. Sory I. Toure, Douglas A. Stow, John R. Weeks, and Sunil Kumar. May: 433–440

Classification accuracy–Mapping

Classification and Accuracy Assessment for Coarse Resolution Mapping within the Great Lakes Basin, USA. John S. Iames and Ross S. Lunetta. November: 1015–1026

The Effects of Data Selection and Thematic Detail on the Accuracy of High Spatial

Resolution Wetland Classifications, Joseph F. Knight, Bryan P. Tolcser, Jennifer M. Corcoran, and Lian P. Rampi. July: 613–623

Classification and regression tree (CART) technique

Applicability of Multi-date Land Cover Mapping using Landsat-5 TM Imagery in the Northeastern US. Meghan Graham MacLean and Russell G. Congalton. April: 359–368

Spatio-statistical Predictions of Vernal Pool Locations in Massachusetts: Incorporating the Spatial Component into Ecological Modeling. Tina A. Cormier, Russell G. Congalton, and Kimberly J. Babbitt. January: 25–35

Classification technique–Object-based

Developing an Object-based Hyperspatial Image Classifier with a Case Study Using WorldView-2 Data. Harini Sridharan and Fang Qiu. November: 1027–1036

Parcel-Level Identification of Crop Types Using Different Classification Algorithms and Multi-Resolution Imagery in Southeastern Turkey. Ugur Alganci, Elif Sertel, Mutlu Ozdogan, and Cankut Ormeci. November: 1053–1065

Classification technique–Pixel-based

Parcel-Level Identification of Crop Types Using Different Classification Algorithms and Multi-Resolution Imagery in Southeastern Turkey. Ugur Alganci, Elif Sertel, Mutlu Ozdogan, and Cankut Ormeci. November: 1053–1065

Classification technique–Point-based supervised

Point-based Classification of Power Line Corridor Scene Using Random Forests. Heungsik B. Kim and Gunho Sohn. September: 821–833

Classifier ensemble system

Band Grouping *versus* Band Clustering in SVM Ensemble Classification of Hyperspectral Imagery. Behnaz Bigdeli, Farhad Samadzadegan, and Peter Reinartz. June: 523–533

Climate change

Illustrating the Temporal Progress of Environmental Change. Joann W. Harvey and Edwin J. Green. December: 1159–1170

Temperature and Emissivity Separation from Thermal Airborne Hyperspectral Imager (TASI) Data. Yang Hang, Zhang

Lifu, Gao Yingqian, Hu Shunshi, Li Xueke, Zhang Genzhong, and Tong Qinxi. December: 1099–1107

Close-range photogrammetry

Automatic Camera Calibration in Close Range Photogrammetry. Clive S. Fraser. April: 381–388

Stitching and Processing Gnomonic Projections for Close-Range Photogrammetry. Luigi Barazzetti, Mattia Previtali, and Marco Scaioni. June: 573–582

Using Optical Projection in Close-range Photogrammetry for 6DOF Sensor Positioning. Benrui Zheng, Yue Dong, Angela Davies, Brigid Mullany, and Edward Morse. January: 79–86

Cloudiness analysis

Illustrating the Temporal Progress of Environmental Change. Joann W. Harvey and Edwin J. Green. December: 1159–1170

Clustering

Predicting Surface Fuel Models and Fuel Metrics Using Lidar and CIR Imagery in a Dense, Mountainous Forest. Marek K. Jakubowski, Qinghua Guo, Brandon Collins, Scott Stephens, and Maggi Kelly. January: 37–49

Coarse elevation map (CEM)

A Coarse Elevation Map-based Registration Method for Super-resolution of Three line Scanner Images. Rongjun Qin, Jianya Gong, Hongli Li, and Xianfeng Huang. August: 717–730

Coarse resolution mapping

Classification and Accuracy Assessment for Coarse Resolution Mapping within the Great Lakes Basin, USA. John S. Iames and Ross S. Lunetta. November: 1015–1026

Coffee agroforests

Classification of Coffee-Forest Landscapes Using Landsat TM Imagery and Spectral Mixture Analysis. Mikaela Schmitt-Harsh, Sean P. Sweeney, and Tom P. Evans. May: 457–468

Collateral geodetic techniques

Land Subsidence Characteristics in Bandung City, Indonesia as Revealed by Spaceborne Geodetic Techniques and Hydrogeological Observations. R.S. Chatterjee, Moh. Fifi k Syafi udin, and Hasanuddin Z. Abidin. July: 639–652

April: 329, August: 761, June: 572, May: 418, September: 784

Cross-correlation analysis (CCA)

Hybrid Object-based Change Detection and Hierarchical Image Segmentation for Thematic Map Updating. D.C. Duro, S.E. Franklin, and M.G. Dubé. March: 259–268

Crossroad camera calibration range specification

Guidelines for the In Situ Geometric Calibration of the Aerial Camera System. July: 590–595

Crowd-generated information

A Hot Topic: The Role of the Geoweb after Wildfire. Samantha Brennan and Jon Corbett. October: 955–963
 Tweeting Up a Storm: The Promise and Perils of Crisis Mapping. Lea A. Shanley, Ryan Burns, Zachary Bastian, and Edward S. Robson. October: 865–879

Cubist regression trees

Remote Sensing-based House Value Estimation Using an Optimized Regional Regression Model. Zhenyu Lu, Jungho Im, Lindi J. Quackenbush, and Sanglim Yoo. September: 809–820

Curve matching classifiers

Histogram Curve Matching Approaches for Object-based Image Classification of Land Cover and Land Use. Sory I. Toure, Douglas A. Stow, John R. Weeks, and Sunil Kumar. May: 433–440

D

Data acquisition

The Benefits of Improved National Elevation Data. Gregory I. Synder. February: 105–110
 Change Detection and Deformation Analysis in Point Clouds: Application to Rock Face Monitoring. Marco Scaioni, Riccardo Roncella, and Mario Ivan Alba. May: 441–455
 Combining Hyperspectral and Radar Imagery for Mangrove Leaf Area Index Modeling. Frankie K. K. Wong and Tung Fung. May: 479–490
 Forward: Special Issue on Mobile Mapping for Disaster Relief. David Alvarez, Piero Boccardo, Maria Antonia Brovelli, Fabio Giulio Tonolo, and Marguerite Madden. October: 901–903

Color invariant transform

A Spatial-Spectral Methodology to Detect Narrow Shadows on Satellite Imagery: A Case Study of Calgary, Canada. Ying Zhang and Bert Guindon. March: 269–276

Commission errors

A Spatial-Spectral Methodology to Detect Narrow Shadows on Satellite Imagery: A Case Study of Calgary, Canada. Ying Zhang and Bert Guindon. March: 269–276

Community-based research

A Hot Topic: The Role of the Geoweb after Wildfire. Samantha Brennan and Jon Corbett. October: 955–963

Comparative studies

An Experimental Comparison of Semi-supervised Learning Algorithms for Multi-spectral Image Classification. Enmei Tu, Jie Yang, Jiangxiong Fang, Zhenghong Jia, and Nikola Kasabov. April: 347–357
 Applicability of Multi-date Land Cover Mapping using Landsat-5 TM Imagery in the Northeastern US. Meghan Graham MacLean and Russell G. Congalton. April: 359–368
 Classification and Accuracy Assessment for Coarse Resolution Mapping within the Great Lakes Basin, USA. John S. Iames and Ross S. Lunetta. November: 1015–1026
 Comparison of Forest Attributes Derived from Two Terrestrial Lidar Systems. Mark J. Ducey, Rasmus Astrup, Stefan Seifert, Hans Pretzsch, Bruce C. Larson, and K. David Coates. March: 245–257
 A Multi-Scale Approach to Mapping Canopy Height. Gordon M. Green, Sean C. Ahearn, and Wenge Ni-Meister. February: 183–194
 Predicting Surface Fuel Models and Fuel Metrics Using Lidar and CIR Imagery in a Dense, Mountainous Forest. Marek K. Jakubowski, Qinghua Guo, Brandon Collins, Scott Stephens, and Maggi Kelly. January: 37–49
 Selecting Key Features for Remote Sensing Classification by Using Decision-Theoretic Rough Set Model. Feng Xie, Dongmei Chen, John Meligrana, Yi Lin, and Wenwei Ren. September: 787–797

Compression scheme—Lossless

LASzip: Lossless Compression of Lidar Data. Martin Isenburg. February: 208–218

Coordinate systems (CS)

Flat-Earth Thinking Removed. Harold Schuch. August: 677–679
 Geolocation Algorithm for Earth Observation Sensors Onboard the International Space Station. Changyong Dou, Xiaodong Zhang, Hojin Kim, Jaganathan Ranganathan, Doug Olsen, and Huadong Guo. July: 625–637

Corporate description

Airborne Sensing Corporation. March: 239
 GeoBC. March: 239
 SIMEPAR Institute of Technology. October: 894

Correlation analysis

Assessing Post-Fire Regeneration in a Mediterranean Mixed Forest Using Lidar Data and Artificial Neural Networks. Haifa Debouk, Ramon Riera-Tatché, and Cristina Vega-García. December: 1121–1130
 Assessing the Relationship between Ground Measurements and Object-Based Image Analysis of Land Cover Classes in Pinon and Juniper Woodlands. April Hulet, Bruce A. Roundy, Steven L. Petersen, Ryan R. Jensen, and Stephen C. Bunting. September: 799–808
 Band Grouping *versus* Band Clustering in SVM Ensemble Classification of Hyperspectral Imagery. Behnaz Bigdeli, Farhad Samadzadegan, and Peter Reinartz. June: 523–533
 Combining Hyperspectral and Radar Imagery for Mangrove Leaf Area Index Modeling. Frankie K. K. Wong and Tung Fung. May: 479–490
 Improved Nonsampled Contourlet Transform for Multi-sensor Image Registration. Ruirui Wang, Jianwen Ma, Huaguo Huang, and Wei Shi. January: 51–66

Crisis mapping

Tweeting Up a Storm: The Promise and Perils of Crisis Mapping. Lea A. Shanley, Ryan Burns, Zachary Bastian, and Edward S. Robson. October: 865–879

Crops—Agricultural

Parcel-Level Identification of Crop Types Using Different Classification Algorithms and Multi-Resolution Imagery in Southeastern Turkey. Ugur Alganci, Elif Sertel, Mutlu Ozdogan, and Cankut Ormeci. November: 1053–1065
 PE&RS Special Issue: Hyperspectral Remote Sensing of Vegetation and Agricultural Crops. Dr. Prasad S. Thenkabail.

Subject Index

A Framework for the Registration and Segmentation of Heterogeneous Lidar Data. M. Al-Durgham and A. Habib. February: 135–145

Data analysis

Rational Function Model in Processing Historical Aerial Photographs. Ruijin Ma. April: 337–345

Data collection

Assessing Post-Fire Regeneration in a Mediterranean Mixed Forest Using Lidar Data and Artificial Neural Networks. Haifa Debouk, Ramon Riera-Tatché, and Cristina Vega-García. December: 1121–1130

Moving Toward Consistent ALS Monitoring of Forest Attributes across Canada: A Consortium Approach. Chris Hopkinson, Laura Chasmer, David Colville, Richard A. Fournier, Ronald J. Hall, Joan E. Luther, Trevor Milne, Richard M. Petrone, and Benoît St-Onge. February: 159–173

A Multi-Scale Approach to Mapping Canopy Height. Gordon M. Green, Sean C. Ahearn, and Wenge Ni-Meister. February: 183–194

New Approaches for Estimating the Local Point Density and its Impact on Lidar Data Segmentation. Zahra Lari and Ayman Habib. February: 195–207

Data compression

LASzip: Lossless Compression of Lidar Data. Martin Isenburg. February: 208–218

Data dissemination

Design and Function of the European Forest Fire Information System. Daniel McInerney, Jesus San-Miguel-Ayanz, Paolo Corti, Ceri Whitmore, Cristiano Giovando, and Andrea Camia. October: 965–973

Fast-Responder: Mobile Access to Remote Sensing for Disaster Response. Bryan G. Talbot and Lisa M. Talbot. October: 945–954

Data fusion

A Multi-Scale Approach to Mapping Canopy Height. Gordon M. Green, Sean C. Ahearn, and Wenge Ni-Meister. February: 183–194

Data preparation

Pedestrian Network Extraction from Fused Aerial Imagery (Orthoimages) and Laser Imagery (Lidar). Piyawan Kasemsup-

pakorn and Hassan A. Karimi. April: 369–379

Registration of Optical Images with Lidar Data and Its Accuracy Assessment. Shunyi Zheng, Rongyong Huang, and Yang Zhou. August: 731–741

Data privacy

Tweeting Up a Storm: The Promise and Perils of Crisis Mapping. Lea A. Shanley, Ryan Burns, Zachary Bastian, and Edward S. Robson. October: 865–879

Data processing

Generation and Dissemination of a National Virtual 3D City and Landscape Model for the Netherlands. Sander Oude Elberink, Jantien Stoter, Hugo Ledoux, and Tom Commandeur. February: 147–158

Guidelines for the In Situ Geometric Calibration of the Aerial Camera System. July: 590–595

Moving Toward Consistent ALS Monitoring of Forest Attributes across Canada: A Consortium Approach. Chris Hopkinson, Laura Chasmer, David Colville, Richard A. Fournier, Ronald J. Hall, Joan E. Luther, Trevor Milne, Richard M. Petrone, and Benoît St-Onge. February: 159–173

Web-service-based Monitoring and Analysis of Global Agricultural Drought. Meixia Deng, Liping Di, Weiguo Han, Ali L. Yagci, Chunming Peng, and Gil Heo. October: 929–943

Data quality. See also Accuracy assessment

The Benefits of Improved National Elevation Data. Gregory I. Synder. February: 105–110

Data segmentation

A Framework for the Registration and Segmentation of Heterogeneous Lidar Data. M. Al-Durgham and A. Habib. February: 135–145

New Approaches for Estimating the Local Point Density and its Impact on Lidar Data Segmentation. Zahra Lari and Ayman Habib. February: 195–207

Data selection

The Effects of Data Selection and Thematic Detail on the Accuracy of High Spatial Resolution Wetland Classifications, Joseph F. Knight, Bryan P. Tolcser, Jennifer M. Corcoran, and Lian P. Rampi. July: 613–623

Dataset

An Experimental Comparison of Semi-supervised Learning Algorithms for Multi-spectral Image Classification. Enmei Tu, Jie Yang, Jiangxiong Fang, Zhenghong Jia, and Nikola Kasabov. April: 347–357

Band Grouping *versus* Band Clustering in SVM Ensemble Classification of Hyperspectral Imagery. Behnaz Bigdeli, Farhad Samadzadegan, and Peter Reinartz. June: 523–533

Basic Products of the ZiYuan-3 Satellite and Accuracy Evaluation. Hongbo Pan, Guo Zhang, Xinming Tang, Deren Li, Xiaoyong Zhu, Ping Zhou, and Yonghua Jiang. December: 1131–1145

A Combined Object- and Pixel-Based Image Analysis Framework for Urban Land Cover Classification of VHR Imagery. Bahram Salehi, Yun Zhang, and Ming Zhong. November: 999–1014

3D Tree Reconstruction from Simulated Small Footprint Waveform Lidar. Jiaying Wu, Kerry Cawse-Nicholson, and Jan van Aardt. December: 1147–1157

A Framework for the Registration and Segmentation of Heterogeneous Lidar Data. M. Al-Durgham and A. Habib. February: 135–145

Improved Nonsampled Contourlet Transform for Multi-sensor Image Registration. Ruirui Wang, Jianwen Ma, Huaguo Huang, and Wei Shi. January: 51–66

Influence of a Dense, Low-height Shrub Species on the Accuracy of a Lidar derived DEM. Samuel B. Gould, Nancy F. Glenn, Temuulen T. Sankey, and James P. McNamara. May: 421–431

Markov Land Cover Change Modeling Using Pairs of Time-Series Satellite Images. Priyakant Sinha and Lalit Kumar. November: 1037–1051

A Multi-Scale Approach to Mapping Canopy Height. Gordon M. Green, Sean C. Ahearn, and Wenge Ni-Meister. February: 183–194

Rational Function Model in Processing Historical Aerial Photographs. Ruijin Ma. April: 337–345

Registration of Optical Images with Lidar Data and Its Accuracy Assessment. Shunyi Zheng, Rongyong Huang, and Yang Zhou. August: 731–741

Trends in Image Management and Dissemination. Peter Becker. October: 880–885

Worldwide Elevation Data via Web-Based Image Services. Cody Benkelman and Peter Becker. February: 111–114

Dataset–Geospatial

The Effects of Data Selection and Thematic Detail on the Accuracy of High Spatial Resolution Wetland Classifications, Joseph F. Knight, Bryan P. Tolcser, Jennifer M. Corcoran, and Lian P. Rampi. July: 613–623

Dataset–Heterogeneous laser scanning

A Framework for the Registration and Segmentation of Heterogeneous Lidar Data. M. Al-Durgham and A. Habib. February: 135–145

Dataset–National three-dimensional (3D)

Generation and Dissemination of a National Virtual 3D City and Landscape Model for the Netherlands. Sander Oude Elberink, Jantien Stoter, Hugo Ledoux, and Tom Commandeur. February: 147–158

Dataset–Three-dimensional

Towards Integration of GLAS into a National Fuel Mapping Program. Birgit Peterson, Kurtis Nelson, and Bruce Wylie. February: 175–183

Data sources

A Spatial-Spectral Methodology to Detect Narrow Shadows on Satellite Imagery: A Case Study of Calgary, Canada. Ying Zhang and Bert Guindon. March: 269–276

Worldwide Elevation Data via Web-Based Image Services. Cody Benkelman and Peter Becker. February: 111–114

Datums

Grids & Datums Column: Bosnia and Herzegovina. Clifford J. Mugnier. March: 229–230

Grids & Datums Column: Federal Republic of Somalia. Clifford J. Mugnier. September: 775

Grids & Datums Column: State of Burma. Clifford J. Mugnier. October: 887–888, October: 890

Grids & Datums Column: Togolese Republic. Clifford J. Mugnier. November: 987–988

Decision support system

Design and Function of the European Forest Fire Information System. Daniel McInerney, Jesus San-Miguel-Ayanz, Paolo Corti, Ceri Whitmore, Cristiano Giovando, and Andrea Camia. October: 965–973

Decision-theoretic rough set model (DTRSM)

Selecting Key Features for Remote Sensing Classification by Using Decision-Theoretic Rough Set Model. Feng Xie, Dongmei Chen, John Meligrana, Yi Lin, and Wenwei Ren. September: 787–797

Decision tree classifier

The Effects of Data Selection and Thematic Detail on the Accuracy of High Spatial Resolution Wetland Classifications, Joseph F. Knight, Bryan P. Tolcser, Jennifer M. Corcoran, and Lian P. Rampi. July: 613–623

Decompression

LASzip: Lossless Compression of Lidar Data. Martin Isenburg. February: 208–218

Defense Meteorological Satellite Program's Operational Linescan System (DMSP OLS)

It Used To Be Dark Here: Geolocation Calibration of the Defense Meteorological Satellite Program Operational Linescan System. Benjamin T. Tuttle, Sharolyn J. Anderson, Paul C. Sutton, Christopher D. Elvidge, and Kim Baugh. March: 287–297

Deformation analysis

Change Detection and Deformation Analysis in Point Clouds: Application to Rock Face Monitoring. Marco Scaioni, Riccardo Roncella, and Mario Ivan Alba. May: 441–455

3D Elevation Program (3DEP)

The Benefits of Improved National Elevation Data. Gregory I. Synder. February: 105–110

Desert areas

Registration of Aerial Imagery and Lidar Data in Desert Areas Using the Centroids of Bushes as Control Information. Na Li, Xianfeng Huang, Fan Zhang, and Le Wang. August: 743–752

Differential evolution (DE) optimization algorithm

Remote Sensing-based House Value Estimation Using an Optimized Regional Regression Model. Zhenyu Lu, Jungho Im, Lindi J. Quackenbush, and Sanglim Yoo. September: 809–820

Differential synthetic aperture radar interferometry (DINSAR)

Land Subsidence Characteristics in Bandung City, Indonesia as Revealed by Spaceborne Geodetic Techniques and Hydrogeological Observations. R.S. Chatterjee, Moh. Fifi k Syafi udin, and Hasanuddin Z. Abidin. July: 639–652

Digital aerial camera

Registration of Optical Images with Lidar Data and Its Accuracy Assessment. Shunyi Zheng, Rongyong Huang, and Yang Zhou. August: 731–741

Surveyor Switches to Digital Aerial Camera, Efficiently Captures High-Quality Images. Jerry Skaw. January: 5

Digital airborne camera imagery

Mapping Matters. Qassim A. Abdullah. February: 119–120

Digital elevation model (DEM)

Basic Products of the ZiYuan-3 Satellite and Accuracy Evaluation. Hongbo Pan, Guo Zhang, Xinming Tang, Deren Li, Xiaoyong Zhu, Ping Zhou, and Yonghua Jiang. December: 1131–1145

Change Detection and Deformation Analysis in Point Clouds: Application to Rock Face Monitoring. Marco Scaioni, Riccardo Roncella, and Mario Ivan Alba. May: 441–455

Developing Efficient Procedures for Automated Sinkhole Extraction from Lidar DEMs. Xin Miao, Xiaomin Qiu, Shuo-Sheng Wu, Jun Luo, Douglas R. Gouzie, and Hongjie Xie. June: 545–554

Influence of a Dense, Low-height Shrub

Feature extraction

Developing Efficient Procedures for Automated Sinkhole Extraction from Lidar DEMs. Xin Miao, Xiaomin Qiu, Shuo-Sheng Wu, Jun Luo, Douglas R. Gouzie, and Hongjie Xie. June: 545–554

Illustrating the Temporal Progress of Environmental Change. Joann W. Harvey and Edwin J. Green. December: 1159–1170

Improved Nonsampled Contourlet Transform for Multi-sensor Image Registration. Ruirui Wang, Jianwen Ma, Huaguo Huang, and Wei Shi. January: 51–66

Pedestrian Network Extraction from Fused Aerial Imagery (Orthoimages) and Laser Imagery (Lidar). Piyawan Kasemsuppakorn and Hassan A. Karimi. April: 369–379

Feature extraction–Wavelet-based

A Combined Object- and Pixel-Based Image Analysis Framework for Urban Land Cover Classification of VHR Imagery. Bahram Salehi, Yun Zhang, and Ming Zhong. November: 999–1014

Feature matching

An Automated Approach for the Conflation of Vector Parcel Map with Imagery. Wenbo Song, James M. Keller, Timothy L. Haithcoat, Curt H. Davis, and Jason B. Hinsien. June: 535–543

Improved Nonsampled Contourlet Transform for Multi-sensor Image Registration. Ruirui Wang, Jianwen Ma, Huaguo Huang, and Wei Shi. January: 51–66

Feature selection

Band Grouping *versus* Band Clustering in SVM Ensemble Classification of Hyperspectral Imagery. Behnaz Bigdeli, Farhad Samadzadegan, and Peter Reinartz. June: 523–533

Selecting Key Features for Remote Sensing Classification by Using Decision-Theoretic Rough Set Model. Feng Xie, Dongmei Chen, John Meligrana, Yi Lin, and Wenwei Ren. September: 787–797

Film preservation systems

Metrically Preserving The USGS Aerial Film Archive. Donald Moe and Ryan Longhenry. March: 225–228

Filtering errors

Influence of a Dense, Low-height Shrub Species on the Accuracy of a Lidar derived DEM. Samuel B. Gould, Nancy F. Glenn, Temuulen T. Sankey, and James P. McNamara. May: 421–431

Finnish Archipelago Sea

Geospatial Web Services for Responding to Ecological Risks Posed by Oil Spills. Anas Altartouri, Eva Ehrnsten, Inari Helle, Riikka Venesjärvi, and Ari Jolma. October: 905–914

Fire Information Systems (FIS)

Design and Function of the European Forest Fire Information System. Daniel McInerney, Jesus San-Miguel-Ayanz, Paolo Corti, Ceri Whitmore, Cristiano Giovando, and Andrea Camia. October: 965–973

Fire Mapping Project

A Hot Topic: The Role of the Geoweb after Wildfire. Samantha Brennan and Jon Corbett. October: 955–963

Flight curvature

Flat-Earth Thinking Removed. Harold Schuch. August: 677–679

Flight planning and control–Automatic

An Automatic Approach to UAV Flight Planning and Control for Photogrammetric Applications: A Test Case in the Asturias Region (Spain). David Hernandez-Lopez, Beatriz Felipe-Garcia, Diego Gonzalez-Aguilera, and Benjamin Arias-Perez. January: 87–98

Flood disaster management

Geospatial Web-based Sensor Information Model for Integrating Satellite Observation: An Example in The Field of Flood Disaster Management. Chuli Hu, Nengcheng Chen, and Jia Li. October: 915–927

Flood observation-supporting satellite sensors (FO-SSs)

Geospatial Web-based Sensor Information Model for Integrating Satellite Observation: An Example in The Field of Flood Disaster Management. Chuli Hu, Nengcheng Chen, and Jia Li. October: 915–927

Focus-of-expansion approach

A Flexible Method for Zoom Lens Calibration and Modeling Using a Planar

Checkerboard. Bo Wu, Han Hu, Qing Zhu, and Yeting Zhang. June: 555–571

Forest fires. See Wildland fire

Forest inventory

Comparison of Forest Attributes Derived from Two Terrestrial Lidar Systems. Mark J. Ducey, Rasmus Astrup, Stefan Seifert, Hans Pretzsch, Bruce C. Larson, and K. David Coates. March: 245–257

Moving Toward Consistent ALS Monitoring of Forest Attributes across Canada: A Consortium Approach. Chris Hopkinson, Laura Chasmer, David Colville, Richard A. Fournier, Ronald J. Hall, Joan E. Luther, Trevor Milne, Richard M. Petrone, and Benoît St-Onge. February: 159–173

Forestry

Moving Toward Consistent ALS Monitoring of Forest Attributes across Canada: A Consortium Approach. Chris Hopkinson, Laura Chasmer, David Colville, Richard A. Fournier, Ronald J. Hall, Joan E. Luther, Trevor Milne, Richard M. Petrone, and Benoît St-Onge. February: 159–173

Predicting Surface Fuel Models and Fuel Metrics Using Lidar and CIR Imagery in a Dense, Mountainous Forest. Marek K. Jakubowski, Qinghua Guo, Brandon Collins, Scott Stephens, and Maggi Kelly. January: 37–49

Utility of the Wavelet Transform for LAI Estimation Using Hyperspectral Data. Asim Banskota, Randolph H. Wynne, Shawn P. Serbin, Nilam Kayastha, Valerie A. Thomas, and Philip A. Townsend. July: 653–662

Forests

Assessing Post-Fire Regeneration in a Mediterranean Mixed Forest Using Lidar Data and Artificial Neural Networks. Haifa Debouk, Ramon Riera-Tatché, and Cristina Vega-García. December: 1121–1130

Forward greedy searching algorithm (FGSA)

Selecting Key Features for Remote Sensing Classification by Using Decision-Theoretic Rough Set Model. Feng Xie, Dongmei Chen, John Meligrana, Yi Lin, and Wenwei Ren. September: 787–797

Fraction images

Classification of Coffee-Forest Landscapes Using Landsat TM Imagery and Spectral Mixture Analysis. Mikaela Schmitt-

Harsh, Sean P. Sweeney, and Tom P. Evans. May: 457–468

Fuel metrics

Predicting Surface Fuel Models and Fuel Metrics Using Lidar and CIR Imagery in a Dense, Mountainous Forest. Marek K. Jakubowski, Qinghua Guo, Brandon Collins, Scott Stephens, and Maggi Kelly. January: 37–49

Towards Integration of GLAS into a National Fuel Mapping Program. Birgit Peterson, Kurtis Nelson, and Bruce Wylie. February: 175–183

Fuzzy Kolmogorov-Smirnov (FKS) classifier

Developing an Object-based Hyperspatial Image Classifier with a Case Study Using WorldView-2 Data. Harini Sridharan and Fang Qiu. November: 1027–1036

Fuzzy metrics

Assessing the Performance of Linear Feature Models: An Approach to Computational Inference. Eugenio Y. Arima, Robert T. Walker, and Dante G. Vergara. September: 847–855

G

Gambia

Grids & Datums Column: Republic of The Gambia. Clifford J. Mugnier. January: 7–8

Gaussian mixture models (GMM)

Hierarchical Method of Urban Building Extraction Inspired by Human Perception. Chao Tao, Yihua Tan, and Zheng-rong Zou. December: 1109–1119

Genetic algorithms (GA)

Remote Sensing-based House Value Estimation Using an Optimized Regional Regression Model. Zhenyu Lu, Jungho Im, Lindi J. Quackenbush, and Sanglim Yoo. September: 809–820

Utility of the Wavelet Transform for LAI Estimation Using Hyperspectral Data. Asim Banskota, Randolph H. Wynne, Shawn P. Serbin, Nilam Kayastha, Valerie A. Thomas, and Philip A. Townsend. July: 653–662

Geographically weighted regression

Remote Sensing-based House Value Estimation Using an Optimized Regional Regression Model. Zhenyu Lu, Jungho Im,

Lindi J. Quackenbush, and Sanglim Yoo. September: 809–820

Geographic Information Science and Technology (GIS&T)

Teaching Geographic Information Science and Technology in Higher Education by Unwin, David J., Foote, Kenneth E., Tate, Nicholas J. and DiBiase, David. Reviewed by Buenemann, Michaela. June: 509–510

Geographic information system (GIS)

An Automated Approach for the Conflation of Vector Parcel Map with Imagery. Wenbo Song, James M. Keller, Timothy L. Haithcoat, Curt H. Davis, and Jason B. Hinsen. June: 535–543

An Introduction to Using GIS in Marine Biology by MacLeod, Colin D. Reviewed by Wedding, Lisa M. December: 1089–1090

Design and Function of the European Forest Fire Information System. Daniel McInerney, Jesus San-Miguel-Ayanz, Paolo Corti, Ceri Whitmore, Cristiano Giovando, and Andrea Camia. October: 965–973

Fast-Responder: Mobile Access to Remote Sensing for Disaster Response. Bryan G. Talbot and Lisa M. Talbot. October: 945–954

A Least-Cost Algorithm Approach to Trail Design Using GIS. Ioannis Kokkinidis, Beth R. Stein, Jayashree Surendrababu, Taylor Seigler, Won Hoi Hwang, Laura Lorentz, and Catherine Howey. June: 498–505

Trends in Image Management and Dissemination. Peter Becker. October: 880–885

Worldwide Elevation Data via Web-Based Image Services. Cody Benkelman and Peter Becker. February: 111–114

Geographic object-based image analysis (GEOBIA)

Histogram Curve Matching Approaches for Object-based Image Classification of Land Cover and Land Use. Sory I. Toure, Douglas A. Stow, John R. Weeks, and Sunil Kumar. May: 433–440

Geolocation algorithm-Forward

Geolocation Algorithm for Earth Observation Sensors Onboard the International Space Station. Changyong Dou, Xiaodong Zhang, Hojin Kim, Jaganathan Ranganathan, Doug Olsen, and Huadong Guo. July: 625–637

Geolocation calibration

It Used To Be Dark Here: Geolocation Calibration of the Defense Meteorological Satellite Program Operational Linescan System. Benjamin T. Tuttle, Sharolyn J. Anderson, Paul C. Sutton, Christopher D. Elvidge, and Kim Baugh. March: 287–297

Geological hazards

Characterization of Geological Hazards Using a Globally Observing Spaceborne SAR. Estelle Chaussard and Falk Amelung. November: 982–986

Geometry-based algorithm

An Automatic Approach to UAV Flight Planning and Control for Photogrammetric Applications: A Test Case in the Asturias Region (Spain). David Hernandez-Lopez, Beatriz Felipe-Garcia, Diego Gonzalez-Aguilera, and Benjamin Arias-Perez. January: 87–98

Geoprocessing modeling issues

Web-service-based Monitoring and Analysis of Global Agricultural Drought. Meixia Deng, Liping Di, Weiguo Han, Ali L. Yagci, Chunming Peng, and Gil Heo. October: 929–943

Geo-referenced image products

It Used To Be Dark Here: Geolocation Calibration of the Defense Meteorological Satellite Program Operational Linescan System. Benjamin T. Tuttle, Sharolyn J. Anderson, Paul C. Sutton, Christopher D. Elvidge, and Kim Baugh. March: 287–297

Georeferencing

Change Detection and Deformation Analysis in Point Clouds: Application to Rock Face Monitoring. Marco Scaioni, Riccardo Roncella, and Mario Ivan Alba. May: 441–455

Photogrammetric Techniques for the Determination of Spatio-temporal Velocity Fields at Glaciar San Rafael, Chile. H.-G. Maas, G. Casassa, D. Schneider, E. Schwalbe, and A. Wendt. March: 299–306

Geospatial data

Forward: Special Issue on Mobile Mapping for Disaster Relief. David Alvarez, Piero Boccardo, Maria Antonia Brovelli, Fabio Giulio Tonolo, and Marguerite Madden. October: 901–903

Subject Index

Geospatial Sensor Web

Geospatial Web-based Sensor Information Model for Integrating Satellite Observation: An Example in The Field of Flood Disaster Management. Chuli Hu, Nengcheng Chen, and Jia Li. October: 915–927

Geospatial Web (Geoweb)

A Hot Topic: The Role of the Geoweb after Wildfire. Samantha Brennan and Jon Corbett. October: 955–963

Understanding the Spatio-Temporal Pattern of Tweets. Yue Li and Jie Shan. September: 769–773

Geospatial Web Services

Design and Function of the European Forest Fire Information System. Daniel McInerney, Jesus San-Miguel-Ayanz, Paolo Corti, Ceri Whitmore, Cristiano Giovando, and Andrea Camia. October: 965–973

Glaciar San Rafael

Photogrammetric Techniques for the Determination of Spatio-temporal Velocity Fields at Glaciar San Rafael, Chile. H.-G. Maas, G. Casassa, D. Schneider, E. Schwalbe, and A. Wendt. March: 299–306

GLAS

Towards Integration of GLAS into a National Fuel Mapping Program. Birgit Peterson, Kurtis Nelson, and Bruce Wylie. February: 175–183

Global Agricultural Drought Monitoring and Forecasting System (GADMFS)

Web-service-based Monitoring and Analysis of Global Agricultural Drought. Meixia Deng, Liping Di, Weiguo Han, Ali L. Yagci, Chunming Peng, and Gil Heo. October: 929–943

Global ordinary least square (GOLS) regression

Remote Sensing-based House Value Estimation Using an Optimized Regional Regression Model. Zhenyu Lu, Jungho Im, Lindi J. Quackenbush, and Sanglim Yoo. September: 809–820

Global positioning systems (GPS)

It Used To Be Dark Here: Geolocation Calibration of the Defense Meteorological Satellite Program Operational Linescan System. Benjamin T. Tuttle, Sharolyn J. Anderson, Paul C. Sutton, Christopher

D. Elvidge, and Kim Baugh. March: 287–297

Land Cover Dependent Error in Intermap IFSAR DTM: Lidar Comparison and Fusion Potential. Seamus Coveney. March: 277–286

Land Subsidence Characteristics in Bandung City, Indonesia as Revealed by Spaceborne Geodetic Techniques and Hydrogeological Observations. R.S. Chatterjee, Moh. Fifi k Syafi udin, and Hasanuddin Z. Abidin. July: 639–652

Gnomonic projections

Stitching and Processing Gnomonic Projections for Close-Range Photogrammetry. Luigi Barazzetti, Mattia Previtali, and Marco Scaioni. June: 573–582

Great Lakes Basin (GLB)

Classification and Accuracy Assessment for Coarse Resolution Mapping within the Great Lakes Basin, USA. John S. Iames and Ross S. Lunetta. November: 1015–1026

Ground-based cover measurements

Assessing the Relationship between Ground Measurements and Object-Based Image Analysis of Land Cover Classes in Pinyon and Juniper Woodlands. April Hulet, Bruce A. Roundy, Steven L. Petersen, Ryan R. Jensen, and Stephen C. Bunting. September: 799–808

Ground-classified returns (GCRs)

Influence of a Dense, Low-height Shrub Species on the Accuracy of a Lidar derived DEM. Samuel B. Gould, Nancy F. Glenn, Temuulen T. Sankey, and James P. McNamara. May: 421–431

Ground deformation monitoring

Characterization of Geological Hazards Using a Globally Observing Spaceborne SAR. Estelle Chaussard and Falk Amelung. November: 982–986

Ground inventory data

Assessing Post-Fire Regeneration in a Mediterranean Mixed Forest Using Lidar Data and Artificial Neural Networks. Haifa Debouk, Ramon Riera-Tatché, and Cristina Vega-García. December: 1121–1130

Ground water extraction

Land Subsidence Characteristics in Bandung City, Indonesia as Revealed by Spaceborne Geodetic Techniques and

Hydrogeological Observations. R.S. Chatterjee, Moh. Fifi k Syafi udin, and Hasanuddin Z. Abidin. July: 639–652

Gulf of Finland

Geospatial Web Services for Responding to Ecological Risks Posed by Oil Spills. Anas Altartouri, Eva Ehrnsten, Inari Helle, Riikka Venesjärvi, and Ari Jolma. October: 905–914

H

Haar wavelet transform (DWT)

Utility of the Wavelet Transform for LAI Estimation Using Hyperspectral Data. Asim Banskota, Randolph H. Wynne, Shawn P. Serbin, Nilam Kayastha, Valerie A. Thomas, and Philip A. Townsend. July: 653–662

Hausdorff distance-based change detection

Range Image Techniques for Fast Detection and Quantification of Changes in Repeatedly Scanned Buildings. Zhizhong Kang, Liqiang Zhang, Huanyin Yue, and Roderik Lindenbergh. August: 695–707

Hedonic modeling

Remote Sensing-based House Value Estimation Using an Optimized Regional Regression Model. Zhenyu Lu, Jungho Im, Lindi J. Quackenbush, and Sanglim Yoo. September: 809–820

Hexagonal retro-reflective lidar ground target (HRRT)

Assessing Lidar Accuracy with Hexagonal Retro-Reflective Targets. Roberto Canavosio-Zuzelski, James Hogarty, Craig Rodarmel, Mark Lee, and Aaron Braun. July: 663–670

Hierarchical building extraction framework

Hierarchical Method of Urban Building Extraction Inspired by Human Perception. Chao Tao, Yihua Tan, and Zheng-rong Zou. December: 1109–1119

Hierarchical watershed segmentation (HWS)

Developing Efficient Procedures for Automated Sinkhole Extraction from Lidar DEMs. Xin Miao, Xiaomin Qiu, Shuo-Sheng Wu, Jun Luo, Douglas R. Gouzie, and Hongjie Xie. June: 545–554

High-precision GPS surveys

Land Subsidence Characteristics in Bandung City, Indonesia as Revealed by Spaceborne Geodetic Techniques and Hydrogeological Observations. R.S. Chatterjee, Moh. Fifi k Syafi udin, and Hasanuddin Z. Abidin. July: 639–652

High-resolution geological mapping satellite

Basic Products of the ZiYuan-3 Satellite and Accuracy Evaluation. Hongbo Pan, Guo Zhang, Xinming Tang, Deren Li, Xiaoyong Zhu, Ping Zhou, and Yonghua Jiang. December: 1131-1145

High-resolution imagery

An Automated Approach for the Conflation of Vector Parcel Map with Imagery. Wenbo Song, James M. Keller, Timothy L. Haithcoat, Curt H. Davis, and Jason B. Hinsien. June: 535–543

High-resolution satellite remote sensing

Hierarchical Method of Urban Building Extraction Inspired by Human Perception. Chao Tao, Yihua Tan, and Zheng-rong Zou. December: 1109-1119

Robust Affine-Invariant Line Matching for High Resolution Remote Sensing Images. Min Chen and Zhenfeng Shao. August: 753–760

High-resolution scanners

Comparison of Forest Attributes Derived from Two Terrestrial Lidar Systems. Mark J. Ducey, Rasmus Astrup, Stefan Seifert, Hans Pretzsch, Bruce C. Larson, and K. David Coates. March: 245–257

High-spatial resolution color-infrared imagery

Assessing the Relationship between Ground Measurements and Object-Based Image Analysis of Land Cover Classes in Pinyon and Juniper Woodlands. April Hulet, Bruce A. Roundy, Steven L. Petersen, Ryan R. Jensen, and Stephen C. Bunting. September: 799–808

High spatial resolution data

Developing an Object-based Hyperspatial Image Classifier with a Case Study Using WorldView-2 Data. Harini Sridharan and Fang Qiu. November: 1027–1036

The Effects of Data Selection and Thematic Detail on the Accuracy of High Spatial Resolution Wetland Classifications, Joseph F. Knight, Bryan P. Tolser, Jennifer

M. Corcoran, and Lian P. Rampi. July: 613–623

Histograms matching classifiers

Histogram Curve Matching Approaches for Object-based Image Classification of Land Cover and Land Use. Sory I. Toure, Douglas A. Stow, John R. Weeks, and Sunil Kumar. May: 433–440

Historical photographs

Rational Function Model in Processing Historical Aerial Photographs. Ruijin Ma. April: 337–345

Hole-filling algorithm

Developing Efficient Procedures for Automated Sinkhole Extraction from Lidar DEMs. Xin Miao, Xiaomin Qiu, Shuo-Sheng Wu, Jun Luo, Douglas R. Gouzie, and Hongjie Xie. June: 545–554

House value estimation

Remote Sensing-based House Value Estimation Using an Optimized Regional Regression Model. Zhenyu Lu, Jungho Im, Lindi J. Quackenbush, and Sanglim Yoo. September: 809–820

Human environment interface

Statistical Geoinformatics for Human Environment Interface by Myers, Wayne L. and Patil, Ganapati P. Reviewed by Goldin, Sally E. December: 1088, 1090

Human perception

Hierarchical Method of Urban Building Extraction Inspired by Human Perception. Chao Tao, Yihua Tan, and Zheng-rong Zou. December: 1109-1119

Hydrogeological observations

Land Subsidence Characteristics in Bandung City, Indonesia as Revealed by Spaceborne Geodetic Techniques and Hydrogeological Observations. R.S. Chatterjee, Moh. Fifi k Syafi udin, and Hasanuddin Z. Abidin. July: 639–652

Hyperlocal media

A Hot Topic: The Role of the Geoweb after Wildfire. Samantha Brennan and Jon Corbett. October: 955–963

Hyperspatial image classifier–Object-based

Developing an Object-based Hyperspatial Image Classifier with a Case Study Using WorldView-2 Data. Harini Sridharan and Fang Qiu. November: 1027–1036

Hyperspectral data

An Experimental Comparison of Semi-supervised Learning Algorithms for Multispectral Image Classification. Enmei Tu, Jie Yang, Jiangxiong Fang, Zhenghong Jia, and Nikola Kasabov. April: 347–357

Utility of the Wavelet Transform for LAI Estimation Using Hyperspectral Data. Asim Banskota, Randolph H. Wynne, Shawn P. Serbin, Nilam Kayastha, Valerie A. Thomas, and Philip A. Townsend. July: 653–662

Hyperspectral imagery

Band Grouping *versus* Band Clustering in SVM Ensemble Classification of Hyperspectral Imagery. Behnaz Bigdeli, Farhad Samadzadegan, and Peter Reinartz. June: 523–533

Combining Hyperspectral and Radar Imagery for Mangrove Leaf Area Index Modeling. Frankie K. K. Wong and Tung Fung. May: 479–490

Hyperspectral remote sensing

PE&RS Special Issue: Hyperspectral Remote Sensing of Vegetation and Agricultural Crops. Dr. Prasad S. Thenkabail. April: 329, August: 761, June: 572, May: 418, September: 784

Ikonos (IK) images

A Combined Object- and Pixel-Based Image Analysis Framework for Urban Land Cover Classification of VHR Imagery. Bahram Salehi, Yun Zhang, and Ming Zhong. November: 999–1014

Image access

Trends in Image Management and Dissemination. Peter Becker. October: 880–885

Image acquisition

An Automatic Approach to UAV Flight Planning and Control for Photogrammetric Applications: A Test Case in the Asturias Region (Spain). David Hernandez-Lopez, Beatriz Felipe-Garcia, Diego Gonzalez-Aguilera, and Benjamin Arias-Perez. January: 87–98

Assessing the Relationship between Ground Measurements and Object-Based Image Analysis of Land Cover Classes in Pinyon and Juniper Woodlands. April Hulet, Bruce A. Roundy, Steven L. Petersen, Ryan R. Jensen, and Stephen C. Bunting. September: 799–808

Subject Index

Photogrammetric Techniques for the Determination of Spatio-temporal Velocity Fields at Glaciar San Rafael, Chile. H.-G. Maas, G. Casassa, D. Schneider, E. Schwalbe, and A. Wendt. March: 299-306

Stitching and Processing Gnomonic Projections for Close-Range Photogrammetry. Luigi Barazzetti, Mattia Previtali, and Marco Scaioni. June: 573-582

Image analysis

Change Detection and Deformation Analysis in Point Clouds: Application to Rock Face Monitoring. Marco Scaioni, Riccardo Roncella, and Mario Ivan Alba. May: 441-455

Classification of Coffee-Forest Landscapes Using Landsat TM Imagery and Spectral Mixture Analysis. Mikaela Schmitt-Harsh, Sean P. Sweeney, and Tom P. Evans. May: 457-468

Comparison of Forest Attributes Derived from Two Terrestrial Lidar Systems. Mark J. Ducey, Rasmus Astrup, Stefan Seifert, Hans Pretzsch, Bruce C. Larson, and K. David Coates. March: 245-257

Image analysis-Object-based

A Combined Object- and Pixel-Based Image Analysis Framework for Urban Land Cover Classification of VHR Imagery. Bahram Salehi, Yun Zhang, and Ming Zhong. November: 999-1014

Developing an Object-based Hyperspatial Image Classifier with a Case Study Using WorldView-2 Data. Harini Sridharan and Fang Qiu. November: 1027-1036

Image analysis-Pixel-based

A Combined Object- and Pixel-Based Image Analysis Framework for Urban Land Cover Classification of VHR Imagery. Bahram Salehi, Yun Zhang, and Ming Zhong. November: 999-1014

Image classification-Hyperspectral

Band Grouping *versus* Band Clustering in SVM Ensemble Classification of Hyperspectral Imagery. Behnaz Bigdeli, Farhad

Samadzadegan, and Peter Reinartz. June: 523-533

Image classification-Multi-date

Applicability of Multi-date Land Cover Mapping using Landsat-5 TM Imagery in the Northeastern US. Meghan Graham MacLean and Russell G. Congalton. April: 359-368

Image classification-Multispectral

An Experimental Comparison of Semi-supervised Learning Algorithms for Multispectral Image Classification. Enmei Tu, Jie Yang, Jiangxiong Fang, Zhenghong Jia, and Nikola Kasabov. April: 347-357

Image classification-Object-based

Developing an Object-based Hyperspatial Image Classifier with a Case Study Using WorldView-2 Data. Harini Sridharan and Fang Qiu. November: 1027-1036

Histogram Curve Matching Approaches for Object-based Image Classification of Land Cover and Land Use. Sory I. Toure, Douglas A. Stow, John R. Weeks, and Sunil Kumar. May: 433-440

Image dissemination

Trends in Image Management and Dissemination. Peter Becker. October: 880-885

Image fusion

Mapping Matters. Qassim A. Abdullah. February: 119-120

Image management

Trends in Image Management and Dissemination. Peter Becker. October: 880-885

Image matching

Registration of Optical Images with Lidar Data and Its Accuracy Assessment. Shunyi Zheng, Rongyong Huang, and Yang Zhou. August: 731-741

Robust Affine-Invariant Line Matching for High Resolution Remote Sensing Images. Min Chen and Zhenfeng Shao. August: 753-760

Image motion model

Modeling Image Motion in Airborne Three-Line-Array (TLA) Push-broom Cameras. Guimin Jia, Xiangjun Wang, Hong Wei, and Zhaocai Zhang. January: 67-78

Image orientation parameters

Registration of Optical Images with Lidar Data and Its Accuracy Assessment. Shunyi Zheng, Rongyong Huang, and Yang Zhou. August: 731-741

Image processing

Applicability of Multi-date Land Cover Mapping using Landsat-5 TM Imagery in the Northeastern US. Meghan Graham MacLean and Russell G. Congalton. April: 359-368

Developing an Object-based Hyperspatial Image Classifier with a Case Study Using WorldView-2 Data. Harini Sridharan and Fang Qiu. November: 1027-1036

Fast-Responder: Mobile Access to Remote Sensing for Disaster Response. Bryan G. Talbot and Lisa M. Talbot. October: 945-954

Pedestrian Network Extraction from Fused Aerial Imagery (Orthoimages) and Laser Imagery (Lidar). Piyawan Kasemsupakorn and Hassan A. Karimi. April: 369-379

Image quality

JACIE: A Model Partnership. Kurt Thome, Mitch Goldberg, Dath Mita, and Gregory L. Stensaas. August: 681-682

Image reconstruction

Stitching and Processing Gnomonic Projections for Close-Range Photogrammetry. Luigi Barazzetti, Mattia Previtali, and Marco Scaioni. June: 573-582

Image registration

A Coarse Elevation Map-based Registration Method for Super-resolution of Three line Scanner Images. Rongjun Qin, Jianya Gong, Hongli Li, and Xianfeng Huang. August: 717-730

Range Image Techniques for Fast Detection and Quantification of Changes in Repeatedly Scanned Buildings. Zhizhong Kang, Liqiang Zhang, Huanyin Yue, and Roderik Lindenbergh. August: 695-707

Registration of Aerial Imagery and Lidar Data in Desert Areas Using the Centroids of Bushes as Control Information. Na Li, Xianfeng Huang, Fan Zhang, and Le Wang. August: 743-752

Registration of Optical Images with Lidar Data and Its Accuracy Assessment. Shunyi Zheng, Rongyong Huang, and Yang Zhou. August: 731-741

Image registration-Multi-sensor

Improved Nonsampled Contourlet Transform for Multi-sensor Image Registration. Ruirui Wang, Jianwen Ma, Huaguo Huang, and Wei Shi. January: 51-66

Image segmentation

A Combined Object- and Pixel-Based Image Analysis Framework for Urban Land Cover Classification of VHR Imagery. Bahram Salehi, Yun Zhang, and Ming Zhong. November: 999–1014

Developing an Object-based Hyperspatial Image Classifier with a Case Study Using WorldView-2 Data. Harini Sridharan and Fang Qiu. November: 1027–1036

Image segmentation–Hierarchical

Hybrid Object-based Change Detection and Hierarchical Image Segmentation for Thematic Map Updating. D.C. Duro, S.E. Franklin, and M.G. Dubé. March: 259–268

Image services–Web-based

Worldwide Elevation Data via Web-Based Image Services. Cody Benkelman and Peter Becker. February: 111–114

Image shadow

A Spatial-Spectral Methodology to Detect Narrow Shadows on Satellite Imagery: A Case Study of Calgary, Canada. Ying Zhang and Bert Guindon. March: 269–276

Image space tracking

Photogrammetric Techniques for the Determination of Spatio-temporal Velocity Fields at Glaciar San Rafael, Chile. H.-G. Maas, G. Casassa, D. Schneider, E. Schwalbe, and A. Wendt. March: 299–306

Indonesia

Land Subsidence Characteristics in Bandung City, Indonesia as Revealed by Spaceborne Geodetic Techniques and Hydrogeological Observations. R.S. Chatterjee, Moh. Fifi k Syafi udin, and Hasanuddin Z. Abidin. July: 639–652

Information dissemination

Generation and Dissemination of a National Virtual 3D City and Landscape Model for the Netherlands. Sander Oude Elberink, Jantien Stoter, Hugo Ledoux, and Tom Commandeur. February: 147–158

Intellectual property

Tweeting Up a Storm: The Promise and Perils of Crisis Mapping. Lea A. Shanley, Ryan Burns, Zachary Bastian, and Edward S. Robson. October: 865–879

Intensity - saturation (I-S)

A Spatial-Spectral Methodology to Detect Narrow Shadows on Satellite Imagery: A Case Study of Calgary, Canada. Ying Zhang and Bert Guindon. March: 269–276

Interior orientation parameters (IOP)

Automatic Camera Calibration in Close Range Photogrammetry. Clive S. Fraser. April: 381–388

Intermap bare-earth IFSAR DTM data

Land Cover Dependent Error in Intermap IFSAR DTM: Lidar Comparison and Fusion Potential. Seamus Coveney. March: 277–286

International Society for Photogrammetry and Remote Sensing (ISPRS). March: 233

International Space Station (ISS)

Geolocation Algorithm for Earth Observation Sensors Onboard the International Space Station. Changyong Dou, Xiaodong Zhang, Hojin Kim, Jaganathan Ranganathan, Doug Olsen, and Huadong Guo. July: 625–637

International Space Station Agriculture Camera (ISSAC)

Geolocation Algorithm for Earth Observation Sensors Onboard the International Space Station. Changyong Dou, Xiaodong Zhang, Hojin Kim, Jaganathan Ranganathan, Doug Olsen, and Huadong Guo. July: 625–637

Interoperability–Geospatial

Web-service-based Monitoring and Analysis of Global Agricultural Drought. Meixia Deng, Liping Di, Weiguo Han, Ali L. Yagci, Chunming Peng, and Gil Heo. October: 929–943

Interpolation

A Coarse Elevation Map-based Registration Method for Super-resolution of Three line Scanner Images. Rongjun Qin, Jianya Gong, Hongli Li, and Xianfeng Huang. August: 717–730

A Random Set Approach for Modeling Integrated Uncertainties of Traffic Islands Derived from Airborne Laser Scanning Points. Liang Zhou and Alfred Stein. September: 835–845

Intervallometer mode high-resolution digital camera

Photogrammetric Techniques for the Determination of Spatio-temporal Veloc-

ity Fields at Glaciar San Rafael, Chile. H.-G. Maas, G. Casassa, D. Schneider, E. Schwalbe, and A. Wendt. March: 299–306

Iran

Grids & Datums Column: Islamic Republic of Iran. Clifford J. Mugnier. August: 683–684

Iterative closest point (ICP) algorithm

Range Image Techniques for Fast Detection and Quantification of Changes in Repeatedly Scanned Buildings. Zhizhong Kang, Liqiang Zhang, Huanyin Yue, and Roderik Lindenbergh. August: 695–707

Iterative closest projected point (ICPP) registration algorithm

A Framework for the Registration and Segmentation of Heterogeneous Lidar Data. M. Al-Durgham and A. Habib. February: 135–145

Iterative spectral smooth temperature and emissivity separation (ISSTES) methods

Temperature and Emissivity Separation from Thermal Airborne Hyperspectral Imager (TASI) Data. Yang Hang, Zhang Lifu, Gao Yingqian, Hu Shunshi, Li Xueke, Zhang Genzhong, and Tong Qingxi. December: 1099–1107

J

Joint Agency Commercial Imagery Evaluation (JACIE)

JACIE: A Model Partnership. Kurt Thome, Mitch Goldberg, Dath Mita, and Gregory L. Stensaas. August: 681–682

K

Karst areas

Developing Efficient Procedures for Automated Sinkhole Extraction from Lidar DEMs. Xin Miao, Xiaomin Qiu, Shuo-Sheng Wu, Jun Luo, Douglas R. Gouzie, and Hongjie Xie. June: 545–554

Knife-edge detection

A Coarse Elevation Map-based Registration Method for Super-resolution of Three line Scanner Images. Rongjun Qin, Jianya Gong, Hongli Li, and Xianfeng Huang. August: 717–730

L

Land cover

Assessing the Relationship between Ground Measurements and Object-Based Image Analysis of Land Cover Classes in Pinon and Juniper Woodlands. April Hulet, Bruce A. Roundy, Steven L. Petersen, Ryan R. Jensen, and Stephen C. Bunting. September: 799–808

Classification of Coffee-Forest Landscapes Using Landsat TM Imagery and Spectral Mixture Analysis. Mikaela Schmitt-Harsh, Sean P. Sweeney, and Tom P. Evans. May: 457–468

Hybrid Object-based Change Detection and Hierarchical Image Segmentation for Thematic Map Updating. D.C. Duro, S.E. Franklin, and M.G. Dubé. March: 259–268

Land Cover Dependent Error in Intermap IFSAR DTM: Lidar Comparison and Fusion Potential. Seamus Coveney. March: 277–286

A Multi-Scale Approach to Mapping Canopy Height. Gordon M. Green, Sean C. Ahearn, and Wenge Ni-Meister. February: 183–194

Land cover and land use (LCLU) mapping

Remote Sensing of Land Use and Land Cover: Principles and Applications. Giri, Chandra. Reviewed by Hung, Ming-Chih. November: 989, November: 992

Land-cover change

Markov Land Cover Change Modeling Using Pairs of Time-Series Satellite Images. Priyakant Sinha and Lalit Kumar. November: 1037–1051

Land-cover classification

Selecting Key Features for Remote Sensing Classification by Using Decision-Theoretic Rough Set Model. Feng Xie, Dongmei Chen, John Meligrana, Yi Lin, and Wenwei Ren. September: 787–797

Land cover mapping

Applicability of Multi-date Land Cover Mapping using Landsat-5 TM Imagery in the Northeastern US. Meghan Graham MacLean and Russell G. Congalton. April: 359–368

Classification and Accuracy Assessment for Coarse Resolution Mapping within the Great Lakes Basin, USA. John S. Iames and Ross S. Lunetta. November: 1015–1026

Remote Sensing of Protected Lands by Wang, Yequeiao. Reviewed by Daniels, Richard C. April: 321–322

Parameter estimation

Assessing Lidar Accuracy with Hexagonal Retro-Reflective Targets. Roberto Canavosio-Zuzelski, James Hogarty, Craig Rodarmel, Mark Lee, and Aaron Braun. July: 663–670

Assessing the Performance of Linear Feature Models: An Approach to Computational Inference. Eugenio Y. Arima, Robert T. Walker, and Dante G. Vergara. September: 847–855

Automatic Camera Calibration in Close Range Photogrammetry. Clive S. Fraser. April: 381–388

Combining Hyperspectral and Radar Imagery for Mangrove Leaf Area Index Modeling. Frankie K. K. Wong and Tung Fung. May: 479–490

Comparison of Forest Attributes Derived from Two Terrestrial Lidar Systems. Mark J. Ducey, Rasmus Astrup, Stefan Seifert, Hans Pretzsch, Bruce C. Larson, and K. David Coates. March: 245–257

A Flexible Method for Zoom Lens Calibration and Modeling Using a Planar Checkerboard. Bo Wu, Han Hu, Qing Zhu, and Yeting Zhang. June: 555–571

Improved Nonsampled Contourlet Transform for Multi-sensor Image Registration. Ruirui Wang, Jianwen Ma, Huaguo Huang, and Wei Shi. January: 51–66

New Approaches for Estimating the Local Point Density and its Impact on Lidar Data Segmentation. Zahra Lari and Ayman Habib. February: 195–207

Registration of Aerial Imagery and Lidar Data in Desert Areas Using the Centroids

of Bushes as Control Information. Na Li, Xianfeng Huang, Fan Zhang, and Le Wang. August: 743–752

Parcel-level identification

Parcel-Level Identification of Crop Types Using Different Classification Algorithms and Multi-Resolution Imagery in Southeastern Turkey. Ugur Alganci, Elif Sertel, Mutlu Ozdogan, and Cankut Ormeci. November: 1053–1065

Pedestrian network

Pedestrian Network Extraction from Fused Aerial Imagery (Orthoimages) and Laser Imagery (Lidar). Piyawan Kasemsuppakorn and Hassan A. Karimi. April: 369–379

Philmont Scout Ranch

A Least-Cost Algorithm Approach to Trail Design Using GIS. Ioannis Kokkinidis, Beth R. Stein, Jayashree Surendrababu, Taylor Seigler, Won Hoi Hwang, Laura Lorentz, and Catherine Howey. June: 498–505

Phoenix V system

Metrically Preserving The USGS Aerial Film Archive. Donald Moe and Ryan Longhenry. March: 225–228

Photogrammetric Engineering and Remote Sensing (PE&RS)

April 2014 Special Issue Call for Papers on Remote Sensing of Soils for Environmental Assessment and Management. April: 325, February: 118, May: 478
Instructions for Authors Submitting a Manuscript for Peer Review. April: 335–336, August: 693–694, February: 131–132, January: 23–24, July: 611–612, June: 521–522, March: 243–244, May: 419–420, November: 997–998, October: 899–900, September: 785–786

PE&RS Special Issue: Hyperspectral Remote Sensing of Vegetation and Agricultural Crops. Dr. Prasad S. Thenkabail. April: 329, August: 761, June: 572, May: 418, September: 784

Piecewise transformation

An Automated Approach for the Conflation of Vector Parcel Map with Imagery. Wenbo Song, James M. Keller, Timothy L. Haithcoat, Curt H. Davis, and Jason B. Hinsien. June: 535–543

Subject Index

Pixel-based classification

Pedestrian Network Extraction from Fused Aerial Imagery (Orthoimages) and Laser Imagery (Lidar). Piyawan Kasemsuppakorn and Hassan A. Karimi. April: 369–379

P-J expansion woodlands

Assessing the Relationship between Ground Measurements and Object-Based Image Analysis of Land Cover Classes in Pin-yon and Juniper Woodlands. April Hulet, Bruce A. Roundy, Steven L. Petersen, Ryan R. Jensen, and Stephen C. Bunting. September: 799–808

Planar checkerboard

A Flexible Method for Zoom Lens Calibration and Modeling Using a Planar Checkerboard. Bo Wu, Han Hu, Qing Zhu, and Yeting Zhang. June: 555–571

Planimetric errors

A Random Set Approach for Modeling Integrated Uncertainties of Traffic Islands Derived from Airborne Laser Scanning Points. Liang Zhou and Alfred Stein. September: 835–845

Plant area index (PAI)

Comparison of Forest Attributes Derived from Two Terrestrial Lidar Systems. Mark J. Ducey, Rasmus Astrup, Stefan Seifert, Hans Pretzsch, Bruce C. Larson, and K. David Coates. March: 245–257

Point clouds

Change Detection and Deformation Analysis in Point Clouds: Application to Rock Face Monitoring. Marco Scaioni, Riccardo Roncella, and Mario Ivan Alba. May: 441–455

Range Image Techniques for Fast Detection and Quantification of Changes in Repeatedly Scanned Buildings. Zhizhong Kang, Liqiang Zhang, Huanyin Yue, and Roderik Lindenbergh. August: 695–707

Registration of Aerial Imagery and Lidar Data in Desert Areas Using the Centroids of Bushes as Control Information. Na Li, Xianfeng Huang, Fan Zhang, and Le Wang. August: 743–752

Point matching algorithm

Registration of Aerial Imagery and Lidar Data in Desert Areas Using the Centroids of Bushes as Control Information. Na Li, Xianfeng Huang, Fan Zhang, and Le Wang. August: 743–752

Point segmentation algorithm

A Random Set Approach for Modeling Integrated Uncertainties of Traffic Islands Derived from Airborne Laser Scanning Points. Liang Zhou and Alfred Stein. September: 835–845

Positional accuracy

An Automated Approach for the Conflation of Vector Parcel Map with Imagery. Wenbo Song, James M. Keller, Timothy L. Haithcoat, Curt H. Davis, and Jason B. Hinsin. June: 535–543

A Random Set Approach for Modeling Integrated Uncertainties of Traffic Islands Derived from Airborne Laser Scanning Points. Liang Zhou and Alfred Stein. September: 835–845

Post-wildfire regeneration

Assessing Post-Fire Regeneration in a Mediterranean Mixed Forest Using Lidar Data and Artificial Neural Networks. Haifa Debouk, Ramon Riera-Tatché, and Cristina Vega-García. December: 1121–1130

Power line corridor scene

Point-based Classification of Power Line Corridor Scene Using Random Forests. Heungsik B. Kim and Gunho Sohn. September: 821–833

Predictive modeling

Land Subsidence Characteristics in Bandung City, Indonesia as Revealed by Spaceborne Geodetic Techniques and Hydrogeological Observations. R.S. Chatterjee, Moh. Fifi k Syafi udin, and Hasanuddin Z. Abidin. July: 639–652

Principal component analysis (PCA)

A Combined Object- and Pixel-Based Image Analysis Framework for Urban Land Cover Classification of VHR Imagery. Bahram Salehi, Yun Zhang, and Ming Zhong. November: 999–1014

The Influence of Multi-season Imagery on Models of Canopy Cover: A Case Study. John W. Coulston, Dennis M. Jacobs, Chris R. King, and Ivey C. Elmore. May: 469–477

Product calibration

Metrically Preserving The USGS Aerial Film Archive. Donald Moe and Ryan Longhenry. March: 225–228

Proof-of-concept application

A Multi-Scale Approach to Mapping Canopy Height. Gordon M. Green, Sean C. Ahearn, and Wenge Ni-Meister. February: 183–194

Public health surveillance

Environmental Tracking for Public Health Surveillance by Morain, Stanley A. and Budge, Amelia M. Reviewed by Lodhi, Mahtab A. October: 891

Q

Quality control

New Approaches for Estimating the Local Point Density and its Impact on Lidar Data Segmentation. Zahra Lari and Ayman Habib. February: 195–207

QuickBird–Applications

QuickBird–Imagery

A Combined Object- and Pixel-Based Image Analysis Framework for Urban Land Cover Classification of VHR Imagery. Bahram Salehi, Yun Zhang, and Ming Zhong. November: 999–1014

R

Radar imagery

Combining Hyperspectral and Radar Imagery for Mangrove Leaf Area Index Modeling. Frankie K. K. Wong and Tung Fung. May: 479–490

Radiance calibration

Temperature and Emissivity Separation from Thermal Airborne Hyperspectral Imager (TASI) Data. Yang Hang, Zhang Lifu, Gao Yingqian, Hu Shunshi, Li Xueke, Zhang Genzhong, and Tong Qingxi. December: 1099–1107

Random error distribution

Mapping Matters. Qassim A. Abdullah. April: 319–320

Random forest algorithm

Developing Efficient Procedures for Automated Sinkhole Extraction from Lidar DEMs. Xin Miao, Xiaomin Qiu, Shuo-Sheng Wu, Jun Luo, Douglas R. Gouzie, and Hongjie Xie. June: 545–554

The Influence of Multi-season Imagery on Models of Canopy Cover: A Case Study. John W. Coulston, Dennis M. Jacobs,

- Chris R. King, and Ivey C. Elmore. May: 469–477
- Point-based Classification of Power Line Corridor Scene Using Random Forests. Heungsik B. Kim and Gunho Sohn. September: 821–833
- Remote Sensing-based House Value Estimation Using an Optimized Regional Regression Model. Zhenyu Lu, Jungho Im, Lindi J. Quackenbush, and Sanglim Yoo. September: 809–820
- Random forest regression**
A Methodology to Characterize Vertical Accuracies in Lidar-derived Products at Landscape Scales. Wade T. Tinkham, Chad M. Hoffman, Michael J. Falkowski, Alistair M.S. Smith, Hans-Peter Marshall, and Timothy E. Link. August: 709–716
- Random set approach**
A Random Set Approach for Modeling Integrated Uncertainties of Traffic Islands Derived from Airborne Laser Scanning Points. Liang Zhou and Alfred Stein. September: 835–845
- RANSAC (RANDOM SAMPLE CONSENSUS)**
Range Image Techniques for Fast Detection and Quantification of Changes in Repeatedly Scanned Buildings. Zhizhong Kang, Liqiang Zhang, Huanyin Yue, and Roderik Lindenbergh. August: 695–707
- Registration of Aerial Imagery and Lidar Data in Desert Areas Using the Centroids of Bushes as Control Information. Na Li, Xianfeng Huang, Fan Zhang, and Le Wang. August: 743–752
- RapidEye imagery**
A Spatial-Spectral Methodology to Detect Narrow Shadows on Satellite Imagery: A Case Study of Calgary, Canada. Ying Zhang and Bert Guindon. March: 269–276
- Rational function model (RFM)**
Basic Products of the ZiYuan-3 Satellite and Accuracy Evaluation. Hongbo Pan, Guo Zhang, Xinming Tang, Deren Li, Xiaoyong Zhu, Ping Zhou, and Yonghua Jiang. December: 1131–1145
- Rational Function Model in Processing Historical Aerial Photographs. Ruijin Ma. April: 337–345
- Real time decision making**
Geospatial Web Services for Responding to Ecological Risks Posed by Oil Spills. Anas Altartouri, Eva Ehrnsten, Inari Helle, Riikka Venesjärvi, and Ari Jolma. October: 905–914
- Reflectance spectra**
Developing an Object-based Hyperspatial Image Classifier with a Case Study Using WorldView-2 Data. Harini Sridharan and Fang Qiu. November: 1027–1036
- Utility of the Wavelet Transform for LAI Estimation Using Hyperspectral Data. Asim Banskota, Randolph H. Wynne, Shawn P. Serbin, Nilam Kayastha, Valerie A. Thomas, and Philip A. Townsend. July: 653–662
- Region-growing-based segmentation algorithm**
A Framework for the Registration and Segmentation of Heterogeneous Lidar Data. M. Al-Durgham and A. Habib. February: 135–145
- Registration primitives**
Registration of Aerial Imagery and Lidar Data in Desert Areas Using the Centroids of Bushes as Control Information. Na Li, Xianfeng Huang, Fan Zhang, and Le Wang. August: 743–752
- Registration problem**
Registration of Aerial Imagery and Lidar Data in Desert Areas Using the Centroids of Bushes as Control Information. Na Li, Xianfeng Huang, Fan Zhang, and Le Wang. August: 743–752
- Regression models**
Combining Hyperspectral and Radar Imagery for Mangrove Leaf Area Index Modeling. Frankie K. K. Wong and Tung Fung. May: 479–490

Subject Index

Spatial decision support systems (SDSS)

Design and Function of the European Forest Fire Information System. Daniel McInerney, Jesus San-Miguel-Ayanz, Paolo Corti, Ceri Whitmore, Cristiano Giovando, and Andrea Camia. October: 965–973

Spatial information

A Combined Object- and Pixel-Based Image Analysis Framework for Urban Land Cover Classification of VHR Imagery. Bahram Salehi, Yun Zhang, and Ming Zhong. November: 999–1014

Spatial resolution

Photogrammetric Techniques for the Determination of Spatio-temporal Velocity Fields at Glaciar San Rafael, Chile. H.-G. Maas, G. Casassa, D. Schneider, E. Schwalbe, and A. Wendt. March: 299–306

Spatial resolution

Classification and Accuracy Assessment for Coarse Resolution Mapping within the Great Lakes Basin, USA. John S. Iiames and Ross S. Lunetta. November: 1015–1026

Histogram Curve Matching Approaches for Object-based Image Classification of Land Cover and Land Use. Sory I. Toure, Douglas A. Stow, John R. Weeks, and Sunil Kumar. May: 433–440

Parcel-Level Identification of Crop Types Using Different Classification Algorithms and Multi-Resolution Imagery in Southeastern Turkey. Ugur Alganci, Elif Sertel, Mutlu Ozdogan, and Cankut Ormeci. November: 1053–1065

Spatial-spectral shadow detection method

A Spatial-Spectral Methodology to Detect Narrow Shadows on Satellite Imagery: A Case Study of Calgary, Canada. Ying Zhang and Bert Guindon. March: 269–276

Spatial variability

A Methodology to Characterize Vertical Accuracies in Lidar-derived Products at Landscape Scales. Wade T. Tinkham, Chad M. Hoffman, Michael J. Falkowski, Alistair M.S. Smith, Hans-Peter Marshall, and Timothy E. Link. August: 709–716

Spatio-statistical prediction

Spatio-statistical Predictions of Vernal Pool Locations in Massachusetts: Incorporating the Spatial Component into Ecological Modeling. Tina A. Cormier, Russell G. Congalton, and Kimberly J. Babbitt. January: 25–35

Spatio-temporal dynamics

Understanding the Spatio-Temporal Pattern of Tweets. Yue Li and Jie Shan. September: 769–773

Spatio-temporal velocity fields

Photogrammetric Techniques for the Determination of Spatio-temporal Velocity Fields at Glaciar San Rafael, Chile. H.-G. Maas, G. Casassa, D. Schneider, E. Schwalbe, and A. Wendt. March: 299–306

Spectral angle mapper (SAM)

Parcel-Level Identification of Crop Types Using Different Classification Algorithms and Multi-Resolution Imagery in Southeastern Turkey. Ugur Alganci, Elif Sertel, Mutlu Ozdogan, and Cankut Ormeci. November: 1053–1065

Spectral information

A Combined Object- and Pixel-Based Image Analysis Framework for Urban Land Cover Classification of VHR Imagery. Bahram Salehi, Yun Zhang, and Ming Zhong. November: 999–1014

Combining Hyperspectral and Radar Imagery for Mangrove Leaf Area Index Modeling. Frankie K. K. Wong and Tung Fung. May: 479–490

Spectral shadow measure (SSM)

A Spatial-Spectral Methodology to Detect Narrow Shadows on Satellite Imagery: A Case Study of Calgary, Canada. Ying Zhang and Bert Guindon. March: 269–276

Spectral vegetation indices (SVI)

Utility of the Wavelet Transform for LAI Estimation Using Hyperspectral Data. Asim Banskota, Randolph H. Wynne, Shawn P. Serbin, Nilam Kayastha, Valerie A. Thomas, and Philip A. Townsend. July: 653–662

SRKE (Super-Resolution based on Knife-Edge) method

A Coarse Elevation Map-based Registration Method for Super-resolution of Three

line Scanner Images. Rongjun Qin, Jianya Gong, Hongli Li, and Xianfeng Huang. August: 717–730

Standard deviation

Mapping Matters. Qassim A. Abdullah. April: 319–320

Standardization

Moving Toward Consistent ALS Monitoring of Forest Attributes across Canada: A Consortium Approach. Chris Hopkinson, Laura Chasmer, David Colville, Richard A. Fournier, Ronald J. Hall, Joan E. Luther, Trevor Milne, Richard M. Petrone, and Benoît St-Onge. February: 159–173

Statistical geoinformatics

Statistical Geoinformatics for Human Environment Interface by Myers, Wayne L. and Patil, Ganapati P. Reviewed by Goldin, Sally E. December: 1088, 1090

Influence of a Dense, Low-height Shrub Species on the Accuracy of a Lidar derived DEM. May: 421-431

Goldberg, Mitch

JACIE: A Model Partnership. August: 681-682

Goldin, Sally E.

Book review: Statistical Geoinformatics for Human Environment Interface. December: 1088, 1090

Report on the 33rd Asian Conference on Remote Sensing. February: 125

Gong, Jianya

A Coarse Elevation Map-based Registration Method for Super-resolution of Three line Scanner Images. August: 717-730

Gonzalez-Aguilera, Diego

An Automatic Approach to UAV Flight Planning and Control for Photogrammetric Applications: A Test Case in the Asturias Region (Spain). January: 87-98

Gould, Samuel B.

Influence of a Dense, Low-height Shrub Species on the Accuracy of a Lidar derived DEM. May: 421-431

Gouzie, Douglas R.

Developing Efficient Procedures for Automated Sinkhole Extraction from Lidar DEMs. June: 545-554

Green, Edwin J.

Illustrating the Temporal Progress of Environmental Change. December: 1159-1170

Green, Gordon M.

A Multi-Scale Approach to Mapping Canopy Height. February: 183-194

Guindon, Bert

A Spatial-Spectral Methodology to Detect Narrow Shadows on Satellite Imagery: A Case Study of Calgary, Canada. March: 269-276

Guo, Huadong

Geolocation Algorithm for Earth Observation Sensors Onboard the International Space Station. July: 625-637

Guo, Qinghua

Predicting Surface Fuel Models and Fuel Metrics Using Lidar and CIR Imagery in a Dense, Mountainous Forest. January: 37-49

H

Habib, A.

A Framework for the Registration and Segmentation of Heterogeneous Lidar Data. February: 135-145

Habib, Ayman

New Approaches for Estimating the Local Point Density and its Impact on Lidar Data Segmentation. February: 195-207

Haithcoat, Timothy L.

An Automated Approach for the Conflation of Vector Parcel Map with Imagery. June: 535-543

Hall, Ronald J.

Moving Toward Consistent ALS Monitoring of Forest Attributes across Canada: A Consortium Approach. February: 159-173

Hang, Yang

Temperature and Emissivity Separation from Thermal Airborne Hyperspectral Imager (TASI) Data. December: 1099-1107

Han, Weiguo

Web-service-based Monitoring and Analysis of Global Agricultural Drought. October: 929-943

Harvey, Joann W.

Illustrating the Temporal Progress of Environmental Change. December: 1159-1170

Helle, Inari

Geospatial Web Services for Responding to Ecological Risks Posed by Oil Spills. October: 905-914

Heo, Gil

Web-service-based Monitoring and Analysis of Global Agricultural Drought. October: 929-943

Hernandez-Lopez, David

An Automatic Approach to UAV Flight Planning and Control for Photogrammetric Applications: A Test Case in the Asturias Region (Spain). January: 87-98

Hinsen, Jason B.

An Automated Approach for the Conflation of Vector Parcel Map with Imagery. June: 535-543

Hoffman, Chad M.

A Methodology to Characterize Vertical Accuracies in Lidar-derived Products at Landscape Scales. August: 709-716

Hogarty, James

Assessing Lidar Accuracy with Hexagonal Retro-Reflective Targets. July: 663-670

Author Index

Hopkinson, Chris

Moving Toward Consistent ALS Monitoring of Forest Attributes across Canada: A Consortium Approach. February: 159-173

Howey, Catherine

A Least-Cost Algorithm Approach to Trail Design Using GIS. June: 498-505

Huang, Huaguo

Improved Nonsubsampled Contourlet Transform for Multi-sensor Image Registration. January: 51-66

Huang, Rongyong

Registration of Optical Images with Lidar Data and Its Accuracy Assessment. August: 731-741

Huang, Xianfeng

A Coarse Elevation Map-based Registration Method for Super-resolution of Three line Scanner Images. August: 717-730
Registration of Aerial Imagery and Lidar Data in Desert Areas Using the Centroids of Bushes as Control Information. August: 743-752

Hu, Chuli

Geospatial Web-based Sensor Information Model for Integrating Satellite Observation: An Example in The Field of Flood Disaster Management. October: 915-927

Hu, Han

A Flexible Method for Zoom Lens Calibration and Modeling Using a Planar Checkerboard. June: 555-571

Hulet, April

Assessing the Relationship between Ground Measurements and Object-Based Image Analysis of Land Cover Classes in Pinyon and Juniper Woodlands. September: 799-808

Hung, Ming-Chih

Book review: Remote Sensing of Land Use and Land Cover: Principles and Applications. November: 989, November: 992

Hwang, Won Hoi

A Least-Cost Algorithm Approach to Trail Design Using GIS. June: 498-505
