Commission VI, WG VI/4

KEY WORDS: Manuscripts, Proceedings, ISPRS Archives, ISPRS Annals, ASPRS, Young Professionals Council, YPC

ABSTRACT:

The ASPRS Young Professionals Council (YPC) is leading a Special Session that will consist of four 20-minute presentations focused on real-world experience with geospatial science and technologies in the workplace. The intent of the session is to encourage private sector professional development by sharing professional proficiencies and accomplishments, and to expand the subject matter in a relaxed, audience engaged environment. Presentation topics will be an overview of a project, details about geospatial programs, data processing protocols, learning experiences, highlights of new software or sensors used in a project, etc.

The ASPRS Young Professionals Council's mission is to support professional development through mentoring, networking and certification. For more information, please contact the YPC chair, Devin Kelley, at dkelley@quantumspatial.com.
